Introduction

CHSSN: Networking and Partnership Initiative

The CHSSN Networking and Partnership Initiative Program¹ (NPI) contributes to the vitality of Quebec's English-speaking communities by developing partnerships with the public health and social service system to improve, develop, and maintain access to a full range of services for Quebec's English-speaking language minority.

The Program, a measure of "Canada's Roadmap for Linguistic Duality", funds the development of community networks within English-speaking communities that align with the territories served by Quebec's health and a social service centres (CSSS). A *community network* (often referred to as an *NPI network*) is a formal grouping of community, institutional and other partners within the health and social service sector. The network improves access to health and social services through collaboration with the public system, provision of information on community needs and priorities, support for the volunteer and community resources sector and the promotion of innovative services adapted to the needs of English-speaking people.

About the 2013-2014 report

This volume of the BDR series presents selected demographic characteristics of the English-speaking population residing in the CSSS territories of the areas covered by the organizations participating in the Networking and Partnership Initiative (NPI). The information presented is drawn from the 2011 National Household Survey (NHS) and organized by province, region and CSSS territory. The selection of characteristics is guided by their importance as determinants of the health status and vitality of Quebec's official language minority community.

Baseline Data Report Series

The Baseline Data Report Series is intended to serve as a resource that will allow local communities to better understand the demographic factors and health determinants affecting them and to assist institutional partners and community leaders in developing strategies to improve the well-being of their constituencies. The Baseline Data Report 2013-2014 (BDR) is the eleventh volume in the series. The full series and data source for each is presented in the table in Appendix "A".

Determinants of Health

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working

¹ http://www.chssn.org/En/Networking_Partnership.html

conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.²

Methodological Notes

Data Source and Constraints

This report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2011 National Household Survey (NHS).

It should be noted that there are differences between the 2011 National Household Survey (NHS) estimates and census counts. The 2011 Census of Population and the 2011 National Household Survey (NHS) both provide information on the Canadian population for various levels of geography and for numerous topics (e.g., demography, marital status, family and language) including characteristics associated with these topics. There are two reasons which explain the differences between the counts for the 2011 Census and the 2011 National Household Survey:

- the target population for the 2011 Census includes usual residents in collective dwellings and persons living abroad, whereas the target population for the NHS excludes them.
- the NHS estimates are derived from a sample survey and are therefore subject to sampling error and are also subject to potentially higher non-response error than in the census due to the survey's voluntary nature.

Given the limits to the NHS data mentioned above and due to the fact that cross-tabulations of small populations produce even smaller population counts which are unreliable for statistical analysis, profiles have not been produced for territories where the number of English speakers falls below 250 persons. In this 2013-2014 Baseline Data Report, profiles will be produced for 72

² Public Health Agency of Canada. "What Determines Health?" www.phac-aspc.gc.ca/ph-sp/determinants/index-eng.php Accessed March 2014.

CSSS territories and 83 CLSC territories. Data for individual sub-items (ex. Population living alone) is also suppressed when the count is less than 25.

Percentages may not always add up to 100% due to rounding.

Linguistic definitions

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

Geographic Regions

The 2013-2014 Baseline Data Report consists of a series of stand-alone documents which present key data for the CSSS and CLSC territories in Quebec in which there are at least 250 English-speaking residents.

Demographic and Socio-economic Characteristics

The demographic and socio-economic variables addressed in the 2013-2014 BDR are:

- Population size
- Age structure
- Household living arrangements
- Educational attainment
- Labour force activity
- Income
- Low-income cut-off (LICO)

Statistics Canada Definitions

While for the most part the meanings of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the National Household Survey³ may also be consulted.

Demographic Size

Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users' satisfaction with the services received.⁴ In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

Table 1 - Population Size

Population Size		RSS de Montréal	CSSS du Coeur-de-l'Île	CLSC Villeray
FOLS - English speakers	number	610,705	12,153	7,110
	percentage	33.1%	11.6%	12.1%
FOLS - French speakers	number	1,266,845	93,235	51,780
	percentage	68.7%	88.9%	88.1%
Total population	number	1,844,495	104,830	58,790
	percentage	100.0%	100.0%	100.0%

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French.

- Across the RSS de Montréal, there were 610,705 English speakers, representing 33.1% of the regional population.
- There were 12,153 English speakers living in the CSSS du Coeur-de-l'Île territory where they represented 11.6% of the population. This share is much lower than the overall regional share for English speakers.
- In CLSC Villeray, we find 7,110 English speakers where they represented 12.1% of the population. This proportion is similar to that represented by English speakers across the CSSS du Coeur-de-l'Île territory.

"The Need for More Research on Language Barriers in Health Care: A Proposed Research Agenda". *The Millbank Quarterly*, Vol. 84, No. 1, pp. 111-133.

Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires awareness of the problems that are pressing for the minority and may be overlooked in the focus on the majority, and, awareness of problems that are shared by both language groups but are being met with solutions that are not equally accessible for both.

Table 2 - Age Structure of the Population

Age Structure of the Population	RSS de Montréal		CSSS du Coeur-de-l'Île		CLSC Villeray	
	English	French	English	French	English	French
Total - Age groups	610,705	1,266,845	12,153	93,235	7,110	51,780
0-14 years	86,760	197,545	1,223	11,990	863	7,185
15-24 years	88,300	161,615	1,183	11,305	728	6,390
25-44 years	192,353	398,055	5,878	39,055	3,088	20,765
45-64 years	162,890	333,330	2,983	21,525	1,800	11,830
65+ years	80,403	176,300	885	9,345	638	5,605

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French.

Children (aged 0-14)

- Across the RSS de Montréal, there were 86,760 English-speaking children aged 0-14, representing 14.2% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in the RSS de Montréal region.
- There were 1,223 English-speaking children aged 0-14 living in CSSS du Coeur-de-l'Île where they account for 10.1% of the population. The proportion of children in this territory's English-speaking population is much lower than their proportion in the French-speaking majority population. This proportion is much lower than the level for English-speaking children across the region.
- In CLSC Villeray, we find 863 English-speaking children aged 0-14 where they represent 12.1% of the population. This share is much higher than that exhibited by English-speaking children across CSSS du Coeur-de-l'Île. The proportion of children in the territory's English-speaking population is lower than the share in the CLSC Villeray French-speaking majority population.

Seniors (aged 65 and over)

- Across the RSS de Montréal, there were 80,403 English-speaking seniors aged 65+ representing 13.2% of the English-speaking population. The proportion of seniors in the English-speaking population is lower than that found in the French-speaking majority population in the RSS de Montréal region.
- There were 885 English-speaking seniors aged 65+ living in CSSS du Coeur-de-l'Île where they accounted for 7.3% of the population. This share is much lower than that of English-speaking seniors across the RSS de Montréal. The proportion of seniors in this territory's English-speaking population is much lower than their proportion in the French-speaking majority population.
- In CLSC Villeray, we find 638 English-speaking seniors aged 65+ where they account for 9.0% of the population. This share is lower than that of English-speaking seniors across CSSS du Coeur-de-l'Île. The proportion of seniors in the English-speaking population of CLSC Villeray is much higher than the proportion in the French-speaking majority population.

Income

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.⁵ For vulnerable low-income households language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution lead to increases in social problems and poorer health among the population as a whole⁶.

Table 3 - Income

Population 15+ years, by Income Group	RSS de Montréal		CSSS du Coeur-de-l'Île		CLSC Villeray	
	English	French	English	French	English	French
Population 15+ by total income	523,950	1,069,305	10,930	81,240	6,253	44,595
Less than \$20,000	247,120	471,110	5,315	34,755	3,008	19,645
\$20,000 - \$49,999	170,213	383,210	3,980	31,225	2,340	17,220
\$50,000 +	106,615	214,985	1,638	15,270	908	7,730

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French.

Income under \$20k

- Across the RSS de Montréal in 2011, there were 247,120 English speakers aged 15+ with income under \$20k. This group represents 47.2% of the English-speaking population aged 15 and over. The proportion of English speakers with income under \$20k is higher than that found in the French-speaking majority population in the RSS de Montréal region.
- There were 5,315 English speakers with income under \$20k in CSSS du Coeur-de-l'Île where they represent 48.6% of the English-speaking population aged 15 and over. This share is similar to that displayed by the regional English-speaking population. The proportion of those with income under \$20k in CSSS du Coeur-de-l'Île's English-speaking population is higher than the proportion in the French-speaking majority population.

⁵ Public Health Agency of Canada, <http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence> Accessed March 2014

⁶ Ibid

- In CLSC Villeray, we find 3,008 English speakers with income under \$20k where they account for 48.1% of the population. This share is similar to that experienced by English speakers across CSSS du Coeur-de-l'Île. The proportion of those with income under \$20k in the territory's English-speaking population is higher than the proportion for the French-speaking majority population in CLSC Villeray.

Earning \$50k and over

- Across the RSS de Montréal, there were 106,615 English speakers with income over \$50k who represented 20.3% of the English-speaking population aged 15 and over. The proportion of high earners in the English-speaking population is similar to that found in the French-speaking majority population the RSS de Montréal region.
- There were 1,638 English speakers with income over \$50k living in CSSS du Coeur-de-l'Île where they represented 15.% of the population. This proportion was much lower than the proportion of English-speaking high earners across the RSS de Montréal. The proportion of high earners in the English-speaking population is much lower than the share of high earners in the French-speaking majority population in CSSS du Coeur-de-l'Île.
- In CLSC Villeray, we find 908 English-speaking high earners where they represent 14.5% of the population. This share is similar to that experienced by English-speaking high earners across CSSS du Coeur-de-l'Île. The proportion of high earners in the territory's English-speaking population is lower than the proportion of high earners in the territory's French-speaking majority population.

Household Living Arrangements

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. For example, the Quebec Social and Health Survey (1998) revealed that parents of minors living in lone parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.⁷ Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to illness or aging.

Table 4 - Population by Household Living Arrangements

Population by Household Living Arrangements	RSS de Montréal		CSSS du Coeur-de-l'Île		CLSC Villeray	
	English	French	English	French	English	French
Total - Household living arrangements	523,950	1,069,300	10,928	81,240	6,253	44,595
Total persons in households with at least one census family	401,410	744,290	7,293	47,095	4,540	27,090
Married spouses, common-law partners	267,010	508,360	5,168	34,085	3,075	19,280
Lone parents	29,790	67,050	538	4,520	335	2,615
Children in families with two parents present	64,895	91,225	798	3,635	618	2,230
Children in families with one parent present	30,343	59,395	633	3,660	440	2,270
Persons not in census families, living with non-relatives only	3,230	7,485	83	690	43	365
Total persons in non-census family households	122,540	325,010	3,640	34,145	1,708	17,500
Living with relatives	8,115	17,095	260	1,370	185	860
Living with non-relatives only	25,333	64,295	908	8,350	298	4,250
Living alone	89,100	243,630	2,473	24,425	1,228	12,400

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French.

⁷ For discussion of the survey, see Pocock, J. (2008) "Baseline Data Report 2007-2008. Quebec's Social and Health Survey Information." *Community Health and Social Services Network (CHSSN)*. www.chssn.org

Living in census families⁸

- Across the RSS de Montréal, there were 401,410 English speakers living in households with at least one census family. This group represents 76.6% of the 15+ English-speaking population. The proportion of English speakers living in households with at least one census family is higher than that found in the French-speaking majority population in the RSS de Montréal region.
- There were 7,293 English speakers living in households with at least one census family in CSSS du Coeur-de-l'Île where they comprise 66.7% of the population. This share is lower than that displayed by the English-speaking population across the RSS de Montréal. The proportion of those living in households with at least one census family in CSSS du Coeur-de-l'Île's English-speaking population is higher than the proportion in the French-speaking majority population.
- In CLSC Villeray, we find 4,540 English speakers living in households with at least one census family where they account for 72.6% of the population. This share is higher than that accounted for by English speakers across CSSS du Coeur-de-l'Île. The proportion of persons living in households with at least one census family in the CLSC Villeray English-speaking population is higher than the proportion represented by the French-speaking majority population in this territory.

Living in lone-parent families

- Across the RSS de Montréal, there were 29,790 English speakers living in lone-parent families. This group represents 5.7% of the English-speaking population. The proportion of English speakers living in lone-parent families is lower than the proportion found in the French-speaking majority population in the RSS de Montréal region.
- There were 538 English speakers living in lone-parent families in CSSS du Coeur-de-l'Île where they account for 4.9% of the population. The proportion of those living in lone-parent families in this territory's English-speaking population is lower than the proportion found in the French-speaking majority population. The proportion is lower than that found in the RSS de Montréal English-speaking population.
- In CLSC Villeray, we find 335 English speakers living in lone-parent families where they represent 5.4% of the population. This is lower than the proportion represented by the French-speaking majority population in this territory. The proportion of English speakers living in lone-parent families in the CLSC Villeray English-speaking population is lower than the proportion we find for English speakers across CSSS du Coeur-de-l'Île.

⁸ Under Statistics Canada's terminology, a census family refers "a married couple (with or without children of either and/or both spouses), a common-law couple (with or without children of either and/or both partners) or a lone parent of any marital status, with at least one child. A couple may be of opposite sex or same sex. 'Children' in a census family include grandchildren living with their grandparent(s) but with no parents present." (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

Living alone

- Across the RSS de Montréal, there were 89,100 English speakers living alone. This group represents 17.0% of the English-speaking population. The proportion of English speakers living alone is much lower than the level in the French-speaking majority population in the RSS de Montréal region.
- There were 2,473 English speakers living alone in CSSS du Coeur-de-l'Île where they account for 22.6% of the population. This level is much higher than that displayed by the regional English speaking population. The proportion of those living alone in the CSSS du Coeur-de-l'Île English speaking population is much lower than the proportion found in the French-speaking majority population.
- In CLSC Villeray, we find 1,228 English speakers living alone where they represent 19.6% of the population. This share is lower than that exhibited by English speakers across CSSS du Coeur-de-l'Île. The proportion of those living alone in the CLSC Villeray English speaking population is much lower than the proportion exhibited by the French-speaking majority population in this territory.

Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low Income Cut-Offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low income cut-off category. People who live below income cut-offs may be said to live in “straitened circumstances.”⁹ The following table considers the population living below LICO by language, administrative territory and age group.

Table 5 - Population Living Below LICO, Within Age Groups

Population Living Below the Low-Income Cut-off (LICO), Across Age Groups	RSS de Montréal		CSSS du Coeur-de-l'Île		CLSC Villeray	
	English	French	English	French	English	French
Total - Age groups	130,955	289,055	3,378	23,350	1,880	12,925
0-14 years	17,203	50,750	313	2,490	243	1,585
15-24 years	113,753	238,305	3,070	20,860	1,630	11,340
25-44 years	46,665	92,810	1,438	8,680	748	4,595
45-64 years	30,583	64,730	923	5,045	478	2,770
65+ years	10,405	31,060	243	2,575	138	1,455

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French. The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in "Table 2 - Age Structure of the Population" of this document.

Population living below the low income cut-off (LICO)

- Across the RSS de Montréal, there were 130,955 English speakers living below LICO. This group accounts for 21.4% of the English-speaking population. The proportion of English speakers living below LICO is lower than the proportion in the French-speaking majority population in the RSS de Montréal region.
- There were 3,378 English speakers living below LICO in CSSS du Coeur-de-l'Île where they represent 27.8% of the English-speaking population. The proportion of those living below LICO in CSSS du Coeur-de-l'Île's English-speaking population is higher than the proportion found in the French-speaking majority population. This English-speaking proportion in CSSS du Coeur-de-l'Île is much higher than the proportion for the region's English speakers in general.
- In CLSC Villeray, we find 1,880 English speakers living below LICO where they represent 26.4% of the English-speaking population. This level is higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living

⁹ See “Low Income in Canada: 2000-2007 Using the Market Basket Measure” August 2009 by Human Resources and Skills Development Canada for a breakdown on various Low Income Measurements. Available online at <http://www.hrsdc.gc.ca/eng/publications>

below LICO in the territory's English-speaking population is similar to the proportion for English speakers across CSSS du Coeur-de-l'Île.

Children (0-14) Living below the low income cut-off (LICO)

- Across the RSS de Montréal, there were 17,203 English-speaking children living below LICO. This group represents 19.8% of the population of children. The proportion of English-speaking children living below LICO is much lower than the proportion found for children in the French-speaking majority population in the RSS de Montréal region.
- There were 313 English-speaking children living below LICO in the CSSS du Coeur-de-l'Île where they account for 25.6% of the children in the territory's English-speaking population. The proportion of children living below LICO in the territory's English-speaking population is much higher than the proportion in the French-speaking majority children's population. This proportion is much higher than that displayed by English-speaking children across the region.
- In CLSC Villeray, we find 243 English-speaking children living below LICO where they represent 28.2% of the English-speaking children's population. This proportion is much higher than the proportion experienced by children in the French-speaking majority in the same territory. The proportion of children living below LICO in the territory's English-speaking population is higher than the proportion experienced by English-speaking children across CSSS du Coeur-de-l'Île.

Seniors (65+) Living below the low income cut-off (LICO)

- Across the RSS de Montréal, there were 10,405 English-speaking seniors living below LICO. This group represents 12.9% of the English-speaking senior population. The proportion of English-speaking seniors living below LICO is much lower than the proportion of seniors living below LICO in the French-speaking majority population in the RSS de Montréal region.
- There were 243 English-speaking seniors living below LICO in CSSS du Coeur-de-l'Île where they account for 27.5% of the territory's English-speaking senior population. The proportion of those seniors living below LICO in the territory's English-speaking senior population is similar to the proportion in the French-speaking majority senior population. This proportion is much higher than that experienced by English-speaking seniors across the region.
- In CLSC Villeray, we find 138 English-speaking seniors living below LICO where they represent 21.6% of the English-speaking senior population. This is lower than the proportion experienced by the French-speaking majority senior population living below LICO in the same territory. The proportion of seniors living below LICO in the territory's English-speaking population is much lower than the level displayed by English-speaking seniors across the CSSS du Coeur-de-l'Île territory.

Table 6 - Population Living Below LICO, by Household Living Arrangements

Population Living Below the Low-Income Cut-off Level, by Household Living Arrangements	RSS de Montréal		CSSS du Coeur-de-l'Île		CLSC Villeray	
	English	French	English	French	English	French
Total - Household living arrangements	113,753	238,305	3,070	20,860	1,630	11,340
Total persons in households with at least one census family	59,220	110,180	1,403	6,930	845	4,105
Married spouses, common-law partners	34,633	61,340	825	3,890	505	2,375
Lone parents	8,680	19,365	203	1,280	110	740

Living with non-relatives only	16,078	35,435	495	4,350	203	2,240
Living alone	35,793	87,810	1,103	9,310	545	4,830

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document.

Persons in Census Family Households living below the low income cut-off (LICO)

- Across the RSS de Montréal, there were 59,220 English-speaking persons in census family households living below LICO. This group represents 14.8% of the English-speaking population in census family households. The proportion of English-speaking persons in census family households living below LICO is similar to the proportion found in the French-speaking majority population in this region living below LICO in census family households.
-

There were 1,403 English-speaking persons in census family households living below LICO in CSSS du Coeur-de-l'Île where they represent 19.2% of the regional English-speaking population. The proportion of persons in census family households living below LICO in the CSSS du Coeur-de-l'Île English-speaking population is much higher than the proportion in the French-speaking majority population. The proportion in the territory's English-speaking population is much higher than that found in the regional English-speaking population.

- In CLSC Villeray, we find 845 English-speaking persons in census family households living below LICO where they account for 18.6% of the English-speaking population. This level is much higher than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is similar to the proportion found in the English-speaking population of CSSS du Coeur-de-l'Île.

Persons in Lone-Parent Families Living below the low income cut-off (LICO)

- Across the RSS de Montréal, there were 8,680 English-speaking persons in lone-parent families living below LICO. This group represents 29.1% of the English-speaking population living in lone-parent families. The proportion of English-speaking persons in lone-parent families living below LICO is similar to the proportion found in the French-speaking majority population in the RSS de Montréal living in lone parent families.
- There were 203 English-speaking persons in lone-parent families living below LICO in CSSS du Coeur-de-l'Île where they account for 37.7% of the territory's English-speaking lone-parent family population. The proportion of persons in lone-parent families living below LICO in the English-speaking population of CSSS du Coeur-de-l'Île is much higher than the proportion in the French-speaking majority population. The level for the English-speaking territory's population is much higher than that found in the regional English-speaking population.
- In CLSC Villeray, we find 110 English-speaking persons in lone-parent families living below LICO where they account for 32.8% of the English-speaking lone-parent family population. This is higher than the proportion experienced by the French-speaking majority lone-parent family population in the same territory. The proportion of persons in lone-parent families living below LICO in the territory's English-speaking population is lower than the proportion experienced by English speakers across the CSSS du Coeur-de-l'Île territory.

Persons living alone and living below the low income cut-off (LICO)

- Across the RSS de Montréal, there were 35,793 English-speaking persons living alone and below LICO. This group represents 40.2% of the English-speaking population living alone. The proportion of English-speaking persons living alone and below LICO is higher than that found in the region's French-speaking majority population living alone.
- There were 1,103 English-speaking persons living alone and below LICO in CSSS du Coeur-de-l'Île where they account for 44.6% of the English-speaking population living alone. The proportion of those persons living alone and below LICO in the territory's English-speaking population is higher than the proportion in the French-speaking majority population. This English-speaking proportion is higher than that experienced by the RSS de Montréal's English-speaking population.
- In CLSC Villeray, we find 545 English-speaking persons living alone and below LICO where they represent 44.4% of the English-speaking population living alone. This is higher than the proportion experienced by the French-speaking majority population living alone in the same territory. The proportion of those persons living alone and below LICO in the territory's English-speaking population is similar to the proportion experienced by English speakers across the CSSS du Coeur-de-l'Île territory.

Highest Educational Attainment

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members¹⁰.

Population aged 15+, high school diploma or less

- Across the RSS de Montréal, there were 202,805 English speakers aged 15 and over with a high school diploma or less. This group accounts for 38.7% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over across the region.
- There were 4,075 English speakers aged 15 and over with a high school diploma or less in CSSS du Coeur-de-l'Île where they account for 37.3% of the territory's English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the territory's English-speaking population is higher than the proportion in the French-speaking majority population. The level for the territory's English-speaking proportion is similar to that exhibited by English speakers across the RSS de Montréal.
- In CLSC Villeray, we find 2,548 English speakers aged 15 and over with a high school diploma or less where they represent 40.7% of the English-speaking population aged 15 and over. This level is much higher than the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is higher than the proportion exhibited by the English speakers across the CSSS du Coeur-de-l'Île territory.

Population 25-44, high school diploma or less

- Across the RSS de Montréal region, there were 46,245 English speakers aged 25-44 with a high school diploma or less. This group represents 24.0% of the regional English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the regional French-speaking majority population in the same age cohort.
- There were 1,283 English speakers aged 25-44 with a high school diploma or less in CSSS du Coeur-de-l'Île where they account for 21.8% of the territory's English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the English-speaking population is much higher than the proportion in the territory's French-speaking majority population in that age group. This proportion is lower than that exhibited by English speakers across the RSS de Montréal region in the same age cohort.
- In CLSC Villeray, we find 780 English speakers aged 25-44 with a high school diploma or less where they comprise 25.2% of the English-speaking 25-44 cohort. This is much higher than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the CSSS du Coeur-de-l'Île territory.

Population 45-64, high school diploma or less

- In the RSS de Montréal, there were 59,765 English-speaking aged 45-64 with a high school diploma or less. This group represents 36.7% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort of the regional French-speaking majority population.
- There were 1,503 English speakers aged 45-64 with a high school diploma or less in the CSSS du Coeur-de-l'Île territory where they account for 50.4% of the English-speaking population there. The proportion of those aged 45-64 with a high school diploma or less in this territory's English-speaking population is much higher than the proportion in the territory's French-speaking majority population. This English-speaking proportion is much higher than that exhibited by the RSS de Montréal region's English speakers.
- In CLSC Villeray, we find 905 English speakers aged 45-64 with a high school diploma or less where they comprise 50.3% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is similar to the proportion exhibited by English speakers across the CSSS du Coeur-de-l'Île territory.

Population aged 15+, university degree or higher

- In the RSS de Montréal, there were 169,095 English-speaking aged 15 and over with a university degree or higher. This group represents 32.3% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is higher than that found in the same age cohort in the French-speaking majority population in the RSS de Montréal region.
- There were 4,040 English speakers aged 15 and over with a university degree or higher in the CSSS du Coeur-de-l'Île territory where they account for 37.0% of the territory's English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is similar to the proportion in the French-speaking majority population. This English-speaking proportion is higher than that exhibited by the RSS de Montréal region's English speakers.
- In CLSC Villeray, we find 2,035 English speakers aged 15 and over with a university degree or higher where they represent 32.5% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is lower than the proportion exhibited by English speakers across CSSS du Coeur-de-l'Île.

Population 25-44, university degree or higher

- In the RSS de Montréal, there were 88,080 English speakers aged 25-44 with a university degree or higher. This group accounts for 45.8% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is higher than that found in the same age cohort in the French-speaking majority population across the region.
- There were 3,050 English speakers aged 25-44 with a university degree or higher in CSSS du Coeur-de-l'Île where they represent 51.9% of the territory's English-speaking population. The proportion of those aged 25-44 with a university degree or higher in this territory's English-speaking population is similar to the proportion in the French-speaking majority population. This territory's English-speaking proportion is higher than that exhibited by English speakers across the RSS de Montréal region.
- In CLSC Villeray, we find 1,428 English speakers aged 25-44 with a university degree or higher where they comprise 46.2% of the English-speaking population. This is lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is lower than the proportion exhibited by English speakers across CSSS du Coeur-de-l'Île.

Population 45-64, university degree or higher

- Across the RSS de Montréal region, there were 52,475 English speakers aged 45-64 with a university degree or higher. This group represents 32.2% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is higher than that found in the same age cohort in the RSS de Montréal region's French-speaking majority population.
- There were 710 English speakers aged 45-64 with a university degree or higher in CSSS du Coeur-de-l'Île where they represent 23.8% of the English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is lower than the proportion in the French-speaking majority population. This territory's English-speaking proportion is much lower than that exhibited by the region's English speakers.
- In CLSC Villeray, we find 428 English speakers aged 45-64 with a university degree or higher where they comprise 23.8% of the English-speaking population. This level is lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is similar to the proportion exhibited by English speakers across CSSS du Coeur-de-l'Île.

Labour Force Activity

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.¹¹

Table 8 - Labour Force Activity

Labour Force Activity	RSS de Montréal		CSSS du Coeur-de-l'Île		CLSC Villeray	
	English	French	English	French	English	French
Total - Labour force activity	523,950	1,069,300	10,928	81,240	6,253	44,595
In the labour force	334,508	685,875	7,735	58,320	4,298	31,070
Employed	301,225	620,090	6,910	53,310	3,823	28,245
Unemployed	33,283	65,785	825	5,005	475	2,820
Out of the labour force	189,445	383,435	3,193	22,920	1,958	13,520

Source: Statistics Canada, 2011 National Household Survey. The linguistic concept used is First Official Language Spoken with multiple responses proportionately distributed between the English and the French.

Unemployed

- Across the RSS de Montréal, there are 33,283 English speakers who are unemployed resulting in an unemployment rate of 9.9%. The unemployment rate of the region's English speakers is similar to the unemployment rate of the French-speaking majority.
- There are 825 unemployed English speakers in the CSSS du Coeur-de-l'Île territory where they experience an unemployment rate of 10.7%. The unemployment rate of the territory's English-speaking population is much higher than the unemployment rate in the French-speaking majority population. Their unemployment rate is higher than that experienced by the region's English-speaking population.
- In CLSC Villeray, we find 475 unemployed English speakers resulting in an unemployment rate of 11.1%. This is much higher than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is similar to the unemployment rate experienced by English speakers across CSSS du Coeur-de-l'Île.

¹¹ For further discussion of employment and working conditions as health determinants and the Population Health Model see J. Carter, A Community Guide to the Population Health Approach, Community Health and Social Services Network (CHSSN), www.chssn.org, March 2003. See also D. Raphael (ed.) (2009) Social Determinants of Health: Canadian Perspectives, 2nd Edition. Toronto: Canadian Scholar's Press.

Out of the labour force¹²

- Across the RSS de Montréal, there were 189,445 English speakers out of the labour force. This group represents 36.2% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is similar to that found in the regional French-speaking majority population aged 15 and over.
- There were 3,193 English speakers out of the labour force in the CSSS du Coeur-de-l'Île territory where they comprise 29.2% of the English-speaking population aged 15+. The proportion of those out of the labour force in the territory's English-speaking population is similar to the proportion in the French-speaking majority population. This territory's English-speaking proportion is lower than that exhibited by the region's English-speaking population.
- In CLSC Villeray, we find 1,958 English speakers aged 15+ out of the labour force where they account for 31.3% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in this territory's English-speaking population is higher than the proportion exhibited by English speakers across CSSS du Coeur-de-l'Île.

¹² The Statistics Canada category "[out of the labour force](http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf)" refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an "off" season who were not looking for work because of a long-term illness or disability. (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)
