Introduction

About the 2017-2018 report series

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI). The information presented is drawn from the 2016 Census of Canada and organized by province and RTS and RLS territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Quebec’s official language minority community.

Baseline Data Report Series

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region. A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix “B”.

Determinants of Health

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.¹

Language Barriers

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and impression formation which impacts the evaluation and treatment of individuals seeking health and social services.

Methodological Notes

Data Source

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2016 Census of Canada. The population included here are those in private householders, drawing on the long-form census which has a 25% sample of the Canadian population.

Linguistic definitions

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

Geographic Regions

The 2017-2018 Baseline Data Report consists of a series of stand-alone documents which present key data for the RTS and RLS territories in Quebec in which there are at least 250 English-speaking residents.

In 2015, as part of the re-organization of health services by the MSSS, a series of new health territories known as the RTS (réseau territorial de services) and the RLS (réseau local de service) were established.²

The RTS is the réseau territorial des services which corresponds to the territories covered by the CISSS and CIUSSS bodies that were created recently by the government.

The 25 RTS regions were based on the former RSS (région socio-sanitaire or health regions) territories with these important changes:

- The RSS Gaspésie - Îles-de-la-Madeline was divided into RTS de la Gaspésie and RTS des Îles-de-la-Madeleine.
- The RSS Montréal was divided into five RTS regions.
- Part of the former RSS Montérégie territory was assigned to the Estrie region, newly named as RTS Estrie et Centre universitaire de Sherbrooke.
- The remaining area for RSS Montérégie was divided into three RTS territories.

As part of the 2015 re-organization, the territories of the former CSSS (Centre de santé et de services sociaux) were transformed into 96 RLS territories and many were re-named.

It is useful to note that many RLS territories are identical to CLSC territories while others are comprised of multiple CLSC territories.

The 166 CLSC territories remained unchanged although some were re-named.

² Appendix A of this document provides tables which set out the population and hierarchy of the new health geographic areas for a given RSS and its RTS and RLS territories.

Demographic and Socio-economic Characteristics

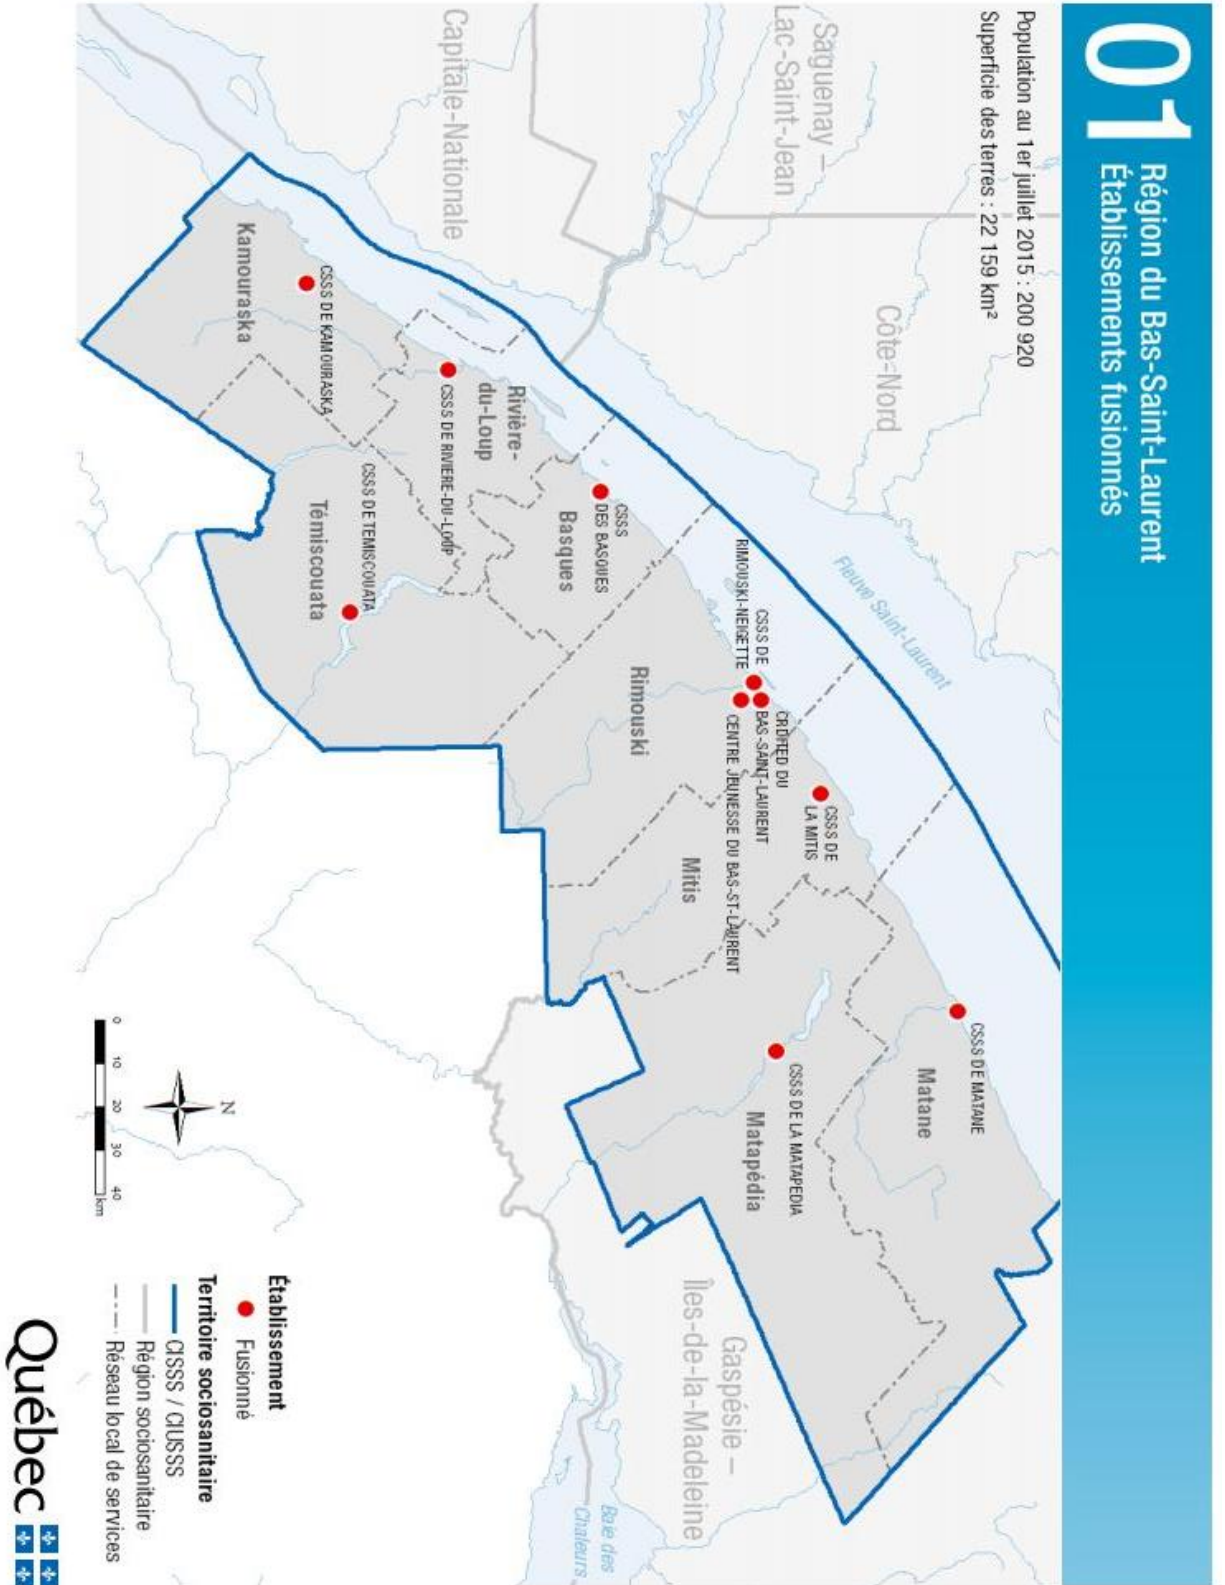

The demographic and socio-economic variables addressed in the 2017-2018 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)
- Educational attainment
- Labour force activity

Statistics Canada Definitions

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2016 Census may also be consulted.

Demographic Size

Quebec’s English speakers form one of Canada’s official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users’ satisfaction with the services received.³ In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

Table 1 - Population Size

Size of Population		Québec	RTS du Bas-Saint-Laurent	RLS de Rimouski
FOLS - English speakers	number	1,097,925	1,080	400
	percentage	13.8%	0.6%	0.7%
FOLS - French speakers	number	6,795,280	188,850	54,235
	percentage	85.3%	99.4%	99.2%
Total population	number	7,965,450	189,975	54,650
	percentage	100.0%	100.0%	100.0%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

³ See Bowen, S. (2001). Language Barriers in Access to Health Care, Ottawa: Health Canada. And, Bowen, S. et al. (2010). From ‘multicultural health’ to ‘knowledge translation’ – rethinking strategies to promote language access within a risk management framework. *The Journal of Specialized Translation (Jostrans)*, Issue 14, http://www.jostrans.org/issue14/art_bowen.php. (2006). “The Need for More Research on Language Barriers in Health Care: A Proposed Research Agenda”. *The Millbank Quarterly*, Vol. 84, No. 1, pp. 111-133.

- Across Québec, there were 1,097,925 English speakers, representing 13.8% of the provincial population.
- In 2016, there were 1,080 English speakers living in the RTS du Bas-Saint-Laurent region where they represented 0.6% of the population. This share is much lower than the overall provincial share for English speakers.
- In RLS de Rimouski, we find 400 English speakers where they represented 0.7% of the population. This proportion is much higher than that represented by English speakers across the RTS du Bas-Saint-Laurent territory.

Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires awareness of the problems that are pressing for the minority and may be overlooked in the focus on the majority, and, awareness of problems that are shared by both language groups but are being met with solutions that are not equally accessible for both.

Table 2 - Age Structure of the Population

Age Structure of the Population	Québec		RTS du Bas-Saint-Laurent		RLS de Rimouski	
	English	French	English	French	English	French
Total - Age groups	1,097,925	6,795,280	1,080	188,850	400	54,235
0-14 years	165,085	1,143,060	90	28,290	40	8,095
15-24 years	146,460	776,310	105	18,775	55	6,030
25-44 years	320,930	1,728,440	270	40,355	110	12,605
45-64 years	305,775	1,995,460	365	61,055	150	16,840
65+ years	159,670	1,152,005	255	40,375	55	10,665
Total - Age groups	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
0-14 years	15.0%	16.8%	8.3%	15.0%	10.0%	14.9%
15-24 years	13.3%	11.4%	9.7%	9.9%	13.8%	11.1%
25-44 years	29.2%	25.4%	25.0%	21.4%	27.5%	23.2%
45-64 years	27.9%	29.4%	33.8%	32.3%	37.5%	31.1%
65+ years	14.5%	17.0%	23.6%	21.4%	13.8%	19.7%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

Children (aged 0-14)

- Across Québec, there were 165,085 English-speaking children aged 0-14, representing 15.0% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 90 English-speaking children aged 0-14 living in RTS du Bas-Saint-Laurent where they account for 8.3% of the population. The proportion of children in the regional English-speaking population is much lower than their proportion in the regional French-speaking majority population. This proportion is much lower than the level for English-speaking children across the province.
- In RLS de Rimouski, we find 40 English-speaking children aged 0-14 where they represent 10.0% of the population. This share is higher than that exhibited by English-speaking children across the RTS du Bas-Saint-Laurent region. The proportion of children in the territory's English-speaking population is much lower than the share in the RLS de Rimouski French-speaking majority population.

Seniors (aged 65 and over)

- Across Québec, there were 159,670 English-speaking seniors aged 65+ representing 14.5% of the English-speaking population. The proportion of seniors in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 255 English-speaking seniors aged 65+ living in the RTS du Bas-Saint-Laurent region where they accounted for 23.6% of the population. This share is much higher than that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is higher than their proportion in the French-speaking majority population.
- In RLS de Rimouski, we find 55 English-speaking seniors aged 65+ where they account for 13.8% of the population. This share is much lower than that of English-speaking seniors across the RTS du Bas-Saint-Laurent region. The proportion of seniors in the English-speaking population is much lower than the proportion in the French-speaking majority population in the RLS de Rimouski.

Income

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.⁴ For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution lead to increases in social problems and poorer health among the population as a whole⁵.

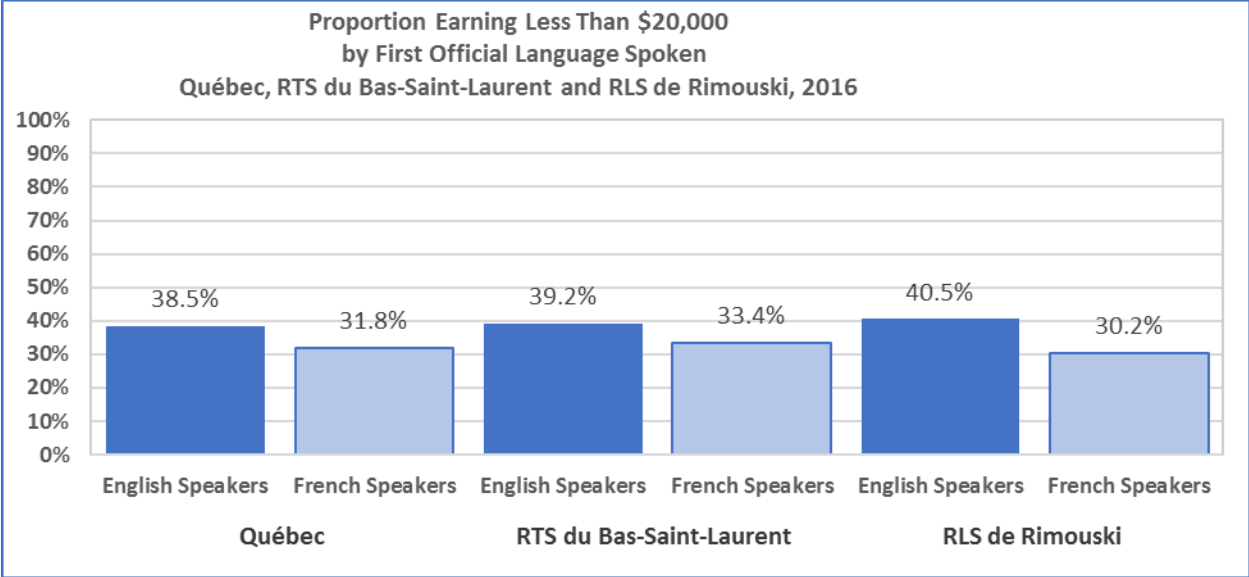

Table 3 - Income

Population by Income Group	Québec		RTS du Bas-Saint-Laurent		RLS de Rimouski	
	English	French	English	French	English	French
Total Population 15+	932,835	5,652,215	995	160,560	370	46,140
Less than \$20,000	359,020	1,799,170	390	53,645	150	13,955
\$20,000 - \$49,999	328,605	2,235,010	385	71,380	100	19,685
\$50,000 +	245,210	1,618,025	210	35,520	110	12,495
Total Population 15+	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Less than \$20,000	38.5%	31.8%	39.2%	33.4%	40.5%	30.2%
\$20,000 - \$49,999	35.2%	39.5%	38.7%	44.5%	27.0%	42.7%
\$50,000 +	26.3%	28.6%	21.1%	22.1%	29.7%	27.1%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

⁴ Public Health Agency of Canada, <http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence> Accessed March 2014.

⁵ *Ibid.*

Income under \$20k

- Across Québec in 2016, there were 359,020 English speakers aged 15+ with income under \$20k. This group represents 38.5% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2016, there were 390 English speakers aged 15+ with income under \$20k in the RTS du Bas-Saint-Laurent region where they represent 39.2% of the English-speaking population aged 15 and over. This share is similar to that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is higher than the proportion in the French-speaking majority population.
- In RLS de Rimouski, we find 150 English speakers aged 15+ with income under \$20k where they account for 40.5% of the population. This share is similar to that experienced by English speakers across RTS du Bas-Saint-Laurent. The proportion of those with income under \$20k in the territory's English-speaking population is much higher than the proportion for the French-speaking majority population in RLS de Rimouski.

Earning \$50k and over

- Across Québec, there were 245,210 English speakers aged 15+ with income over \$50k, who represented 26.3% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 210 English speakers aged 15+ with income over \$50k living in the RTS du Bas-Saint-Laurent region, where they represented 21.1% of the population. This proportion was lower than the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is similar to the share of high earners in the French-speaking majority population in the region.
- In RLS de Rimouski, we find 110 English-speaking high earners aged 15+, where they represent 29.7% of the population. This share is much higher than that experienced by English-speaking high earners across the RTS du Bas-Saint-Laurent region. The proportion of high earners in the territory's English-speaking population is higher than the proportion of high earners in the territory's French-speaking majority population.

Household Living Arrangements

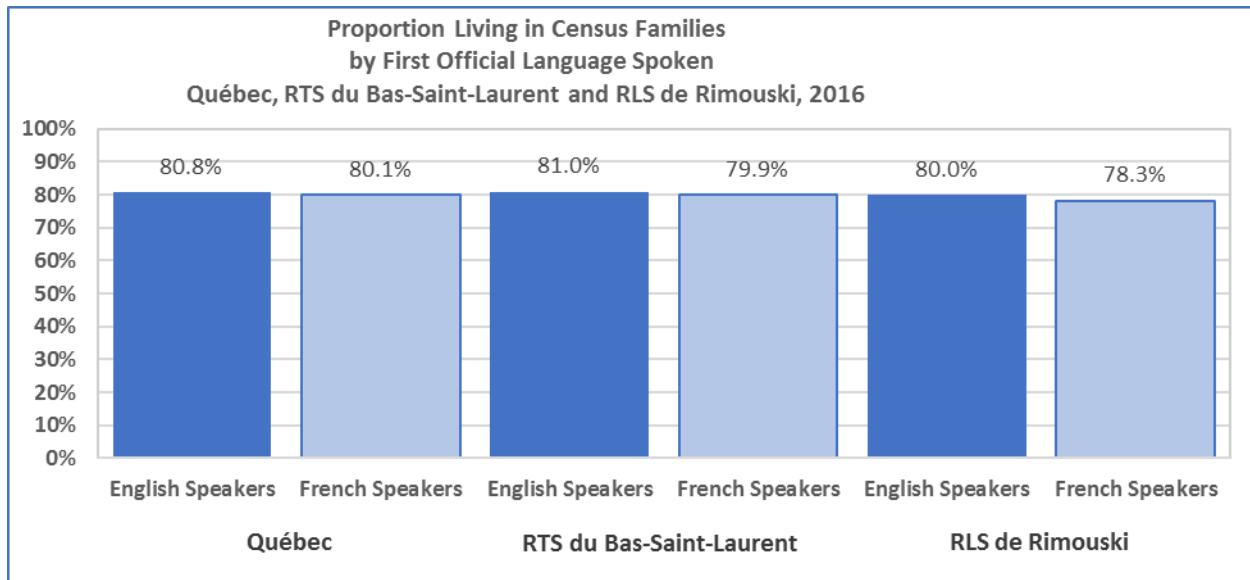

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. For example, the Quebec Social and Health Survey (1998) revealed that parents of minors living in lone parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.⁶ Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to illness or aging.

Table 4 - Population by Household Living Arrangements

Population by Household Living Arrangements	Québec		RTS du Bas-Saint-Laurent		RLS de Rimouski	
	English	French	English	French	English	French
Total - Household living arrangements	1,097,925	6,795,280	1,080	188,850	400	54,235
Total persons in census family households	886,705	5,443,560	875	150,850	320	42,450
Persons in two-parent households	750,650	4,640,895	800	132,925	275	37,300
Persons in single-parent households	136,050	802,660	75	17,920	45	5,150
Total persons in non-census family households	211,215	1,351,720	210	38,000	85	11,785
Living alone	146,855	1,021,795	160	31,230	60	9,360
Total - Household living arrangements	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Total persons in census family households	80.8%	80.1%	81.0%	79.9%	80.0%	78.3%
Persons in two-parent households	68.4%	68.3%	74.1%	70.4%	68.8%	68.8%
Persons in single-parent households	12.4%	11.8%	6.9%	9.5%	11.3%	9.5%
Total persons in non-census family households	19.2%	19.9%	19.4%	20.1%	21.3%	21.7%
Living alone	13.4%	15.0%	14.8%	16.5%	15.0%	17.3%

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

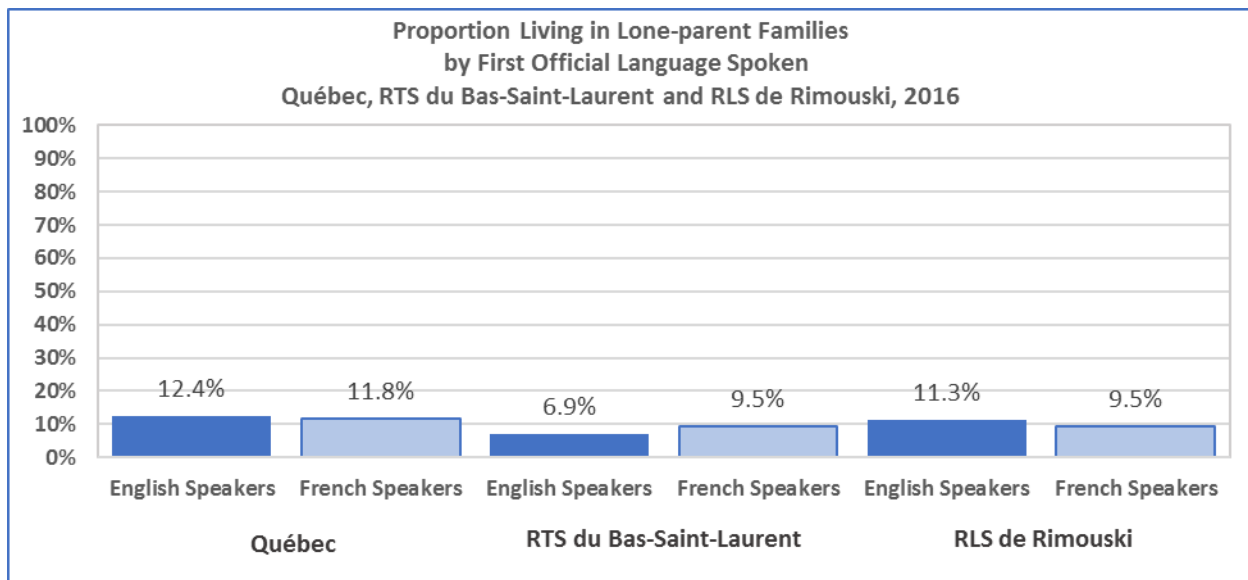

⁶ For discussion of the survey, see Pocock, J. (2008) "Baseline Data Report 2007-2008. Quebec's Social and Health Survey Information." *Community Health and Social Services Network (CHSSN)*. www.chssn.org

Living in census families⁷

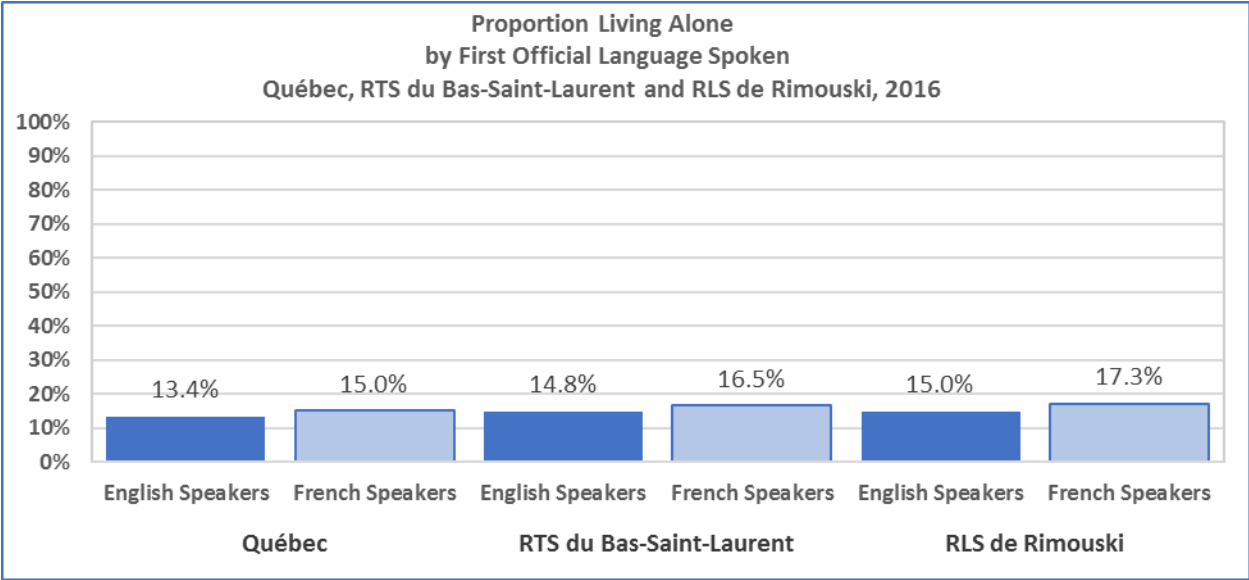

- Across Québec, there were 886,705 English speakers living in census family households. This group represents 80.8% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2016, there were 875 English speakers living in census family households in the RTS du Bas-Saint-Laurent where they comprise 81.0% of the population. This share is similar to that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population.
- In RLS de Rimouski, we find 320 English speakers living in census family households where they account for 80.0% of the population. This share is similar to that accounted for by English speakers across the RTS du Bas-Saint-Laurent region. The proportion of persons living in census family households in the English-speaking population is similar to the proportion represented by the French-speaking majority population in RLS de Rimouski.

⁷ Under Statistics Canada's terminology, a census family refers "a married couple (with or without children of either and/or both spouses), a common-law couple (with or without children of either and/or both partners) or a lone parent of any marital status, with at least one child. A couple may be of opposite sex or same sex. 'Children' in a census family include grandchildren living with their grandparent(s) but with no parents present." (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

Living in lone-parent families

- Across Québec, there were 136,050 English speakers living in lone-parent families. This group represents 12.4% of the English-speaking population. The proportion of English speakers living in lone-parent families is similar to the proportion found in the French-speaking majority population in Quebec.
- In 2016, there were 75 English speakers living in lone-parent families in the RTS du Bas-Saint-Laurent where they account for 6.9% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is much lower than the proportion found in the regional French-speaking majority population. The proportion is much lower than that found in the provincial English-speaking population.
- In RLS de Rimouski, we find 45 English speakers living in lone-parent families where they represent 11.3% of the population. This is much lower than the proportion represented by the French-speaking majority population in RLS de Rimouski. The proportion of English speakers living in lone-parent families in the RLS de Rimouski English-speaking population is much lower than the proportion we find for English speakers across the RTS du Bas-Saint-Laurent region.

Living alone

- Across Québec, there were 146,855 English speakers living alone. This group represents 13.4% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 160 English speakers living alone in the RTS du Bas-Saint-Laurent, where they account for 14.8% of the population. This level is higher than that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is lower than the proportion found in the regional French-speaking majority population.
- In RLS de Rimouski we find 60 English speakers living alone, where they represent 15.0% of the population. This share is similar to that exhibited by English speakers across the RTS du Bas-Saint-Laurent region. The proportion of those living alone in the territory's English-speaking population is lower than the proportion exhibited by the French-speaking majority population in RLS de Rimouski.

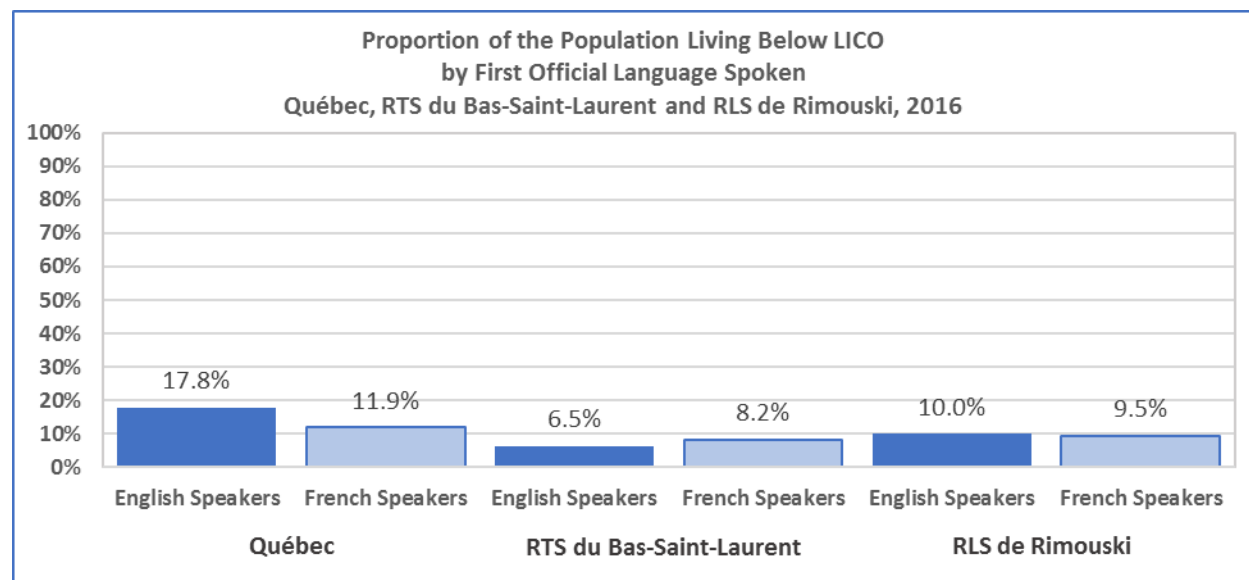

Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in “straitened circumstances.”⁸ The following table considers the population living below LICO by language, administrative territory and age group.

Table 5 - Population Living Below LICO, by Household Living Arrangements

Population Living Below the Low-Income Cut-off Level, by Household Living Arrangements	Québec		RTS du Bas-Saint-Laurent		RLS de Rimouski	
	English	French	English	French	English	French
Total - Household living arrangements	195,300	811,110	70	15,525	40	5,165
Total persons in non-census family households	88,300	439,810	50	10,210	30	3,725
Proportion of those below LICO, by household living arrangements						
Total - Household living arrangements	17.8%	11.9%	6.5%	8.2%	10.0%	9.5%
Total persons in non-census family households	41.8%	32.5%	23.8%	26.9%	35.3%	31.6%

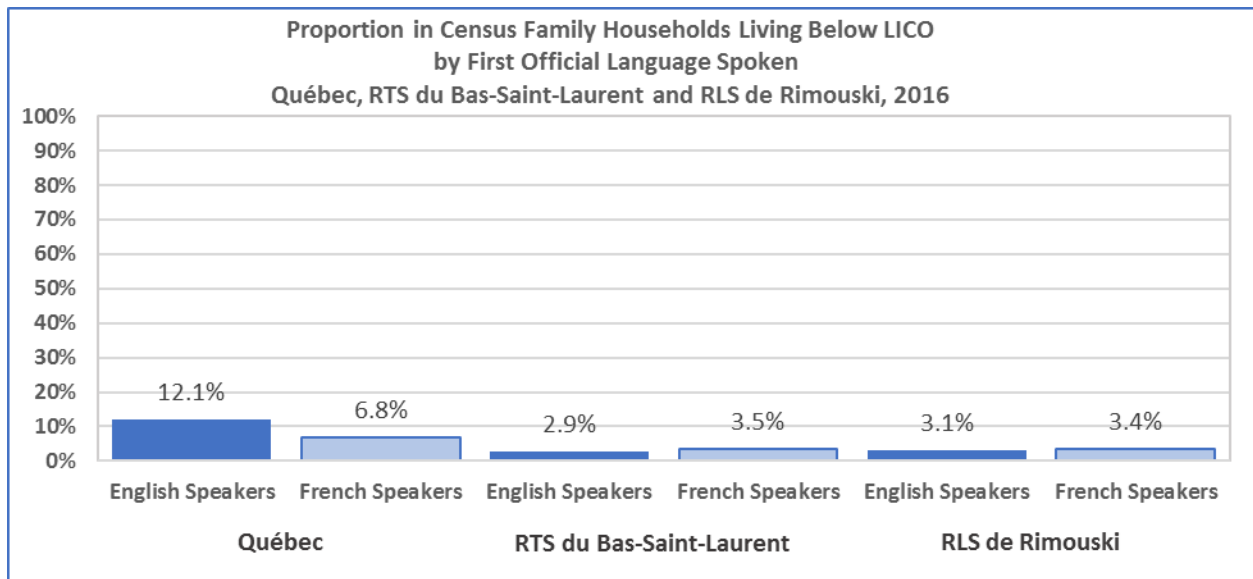

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document.

⁸ See “Low income cut-offs” (dated 2015-11-2) <https://www.statcan.gc.ca/pub/75f0002m/2012002/lico-sfr-eng.htm> for explanation of how LICOs are calculated.

Population living below the low-income cut-off (LICO)

- Across Québec, there were 195,300 English speakers living below LICO. This group accounts for 18.1% of the English-speaking population. The proportion of English speakers living below LICO is much higher than the proportion in the French-speaking majority population in Quebec.
- In 2016, there were 70 English speakers living below LICO in the RTS du Bas-Saint-Laurent region, where they represent 6.5% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is much lower than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in RTS du Bas-Saint-Laurent is much lower than the proportion for Quebec's English speakers in general.
- In RLS de Rimouski, we find 40 English speakers living below LICO, where they represent 10.0% of the English-speaking population. This level is higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much higher than the proportion for English speakers across RTS du Bas-Saint-Laurent.

Population living in census family households below the low-income cut-off (LICO)

- Across Québec, there were 107,000 English-speaking persons in census family households living below LICO. This group represents 12.1% of the English-speaking population in census family households. The proportion of English-speaking persons in census family households living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living below LICO in census family households.
- In 2016, there were 25 English-speaking persons in census family households living below LICO in the RTS du Bas-Saint-Laurent, where they represent 2.9% of the regional English-

speaking population. The proportion of persons in census family households living below LICO in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. The proportion in the regional English-speaking population is much lower than that found in the provincial English-speaking population.

- In RLS de Rimouski, we find 10 English-speaking persons in census family households living below LICO, where they account for 3.1% of the English-speaking population. This level is lower than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is higher than the proportion found in the English-speaking population of the RTS du Bas-Saint-Laurent region.

Highest Educational Attainment

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members⁹.

Table 6 - Highest Educational Certification, for Selected Age Groups

Total Population by Highest Educational Certification		Québec		RTS du Bas-Saint-Laurent		RLS de Rimouski

Population aged 15+, high school diploma or less

- Across Québec, there were 380,050 English speakers aged 15 and over with a high school diploma or less. This group accounts for 40.7% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Quebec.
- In 2016, there were 420 English speakers aged 15 and over with a high school diploma or less in the RTS du Bas-Saint-Laurent region where they account for 42.2% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is similar to that exhibited by English speakers across the province.
- In RLS de Rimouski, we find 150 English speakers aged 15 and over with a high school diploma or less where they represent 40.5% of the English-speaking population aged 15 and over. This level is higher than the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is similar to the proportion exhibited by the English speakers across the RTS du Bas-Saint-Laurent region.

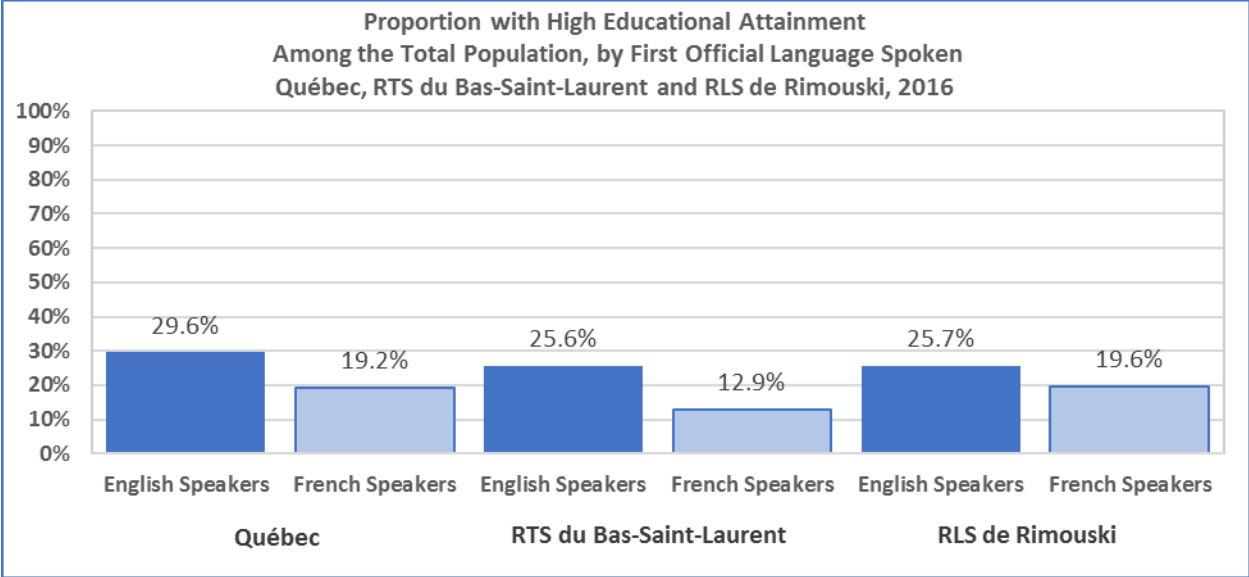

Population 25-44, high school diploma or less

- Across Québec, there were 84,680 English speakers aged 25-44 with a high school diploma or less. This group represents 26.4% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2016, there were 75 English speakers aged 25-44 with a high school diploma or less in the RTS du Bas-Saint-Laurent region where they account for 27.3% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population in that age group. This proportion is similar to that exhibited by English speakers across the province in the same age cohort.
- In RLS de Rimouski, we find 15 English speakers aged 25-44 with a high school diploma or less where they comprise 13.6% of the English-speaking 25-44 cohort. This is much lower than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the RTS du Bas-Saint-Laurent region.

Population 45-64, high school diploma or less

- In Québec in 2016, there were 116,390 English-speaking aged 45-64 with a high school diploma or less. This group represents 38.1% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 110 English speakers aged 45-64 with a high school diploma or less in the RTS du Bas-Saint-Laurent region where they account for 30.1% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is much lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that exhibited by the province's English speakers.
- In RLS de Rimouski, we find 50 English speakers aged 45-64 with a high school diploma or less where they comprise 33.3% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the region.

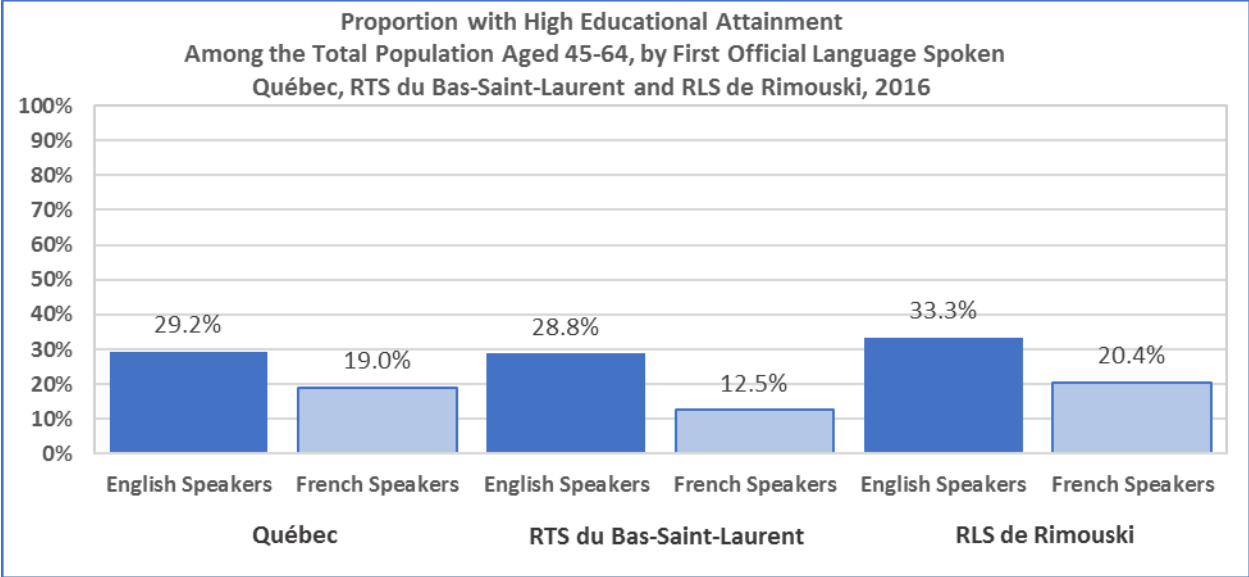

Population aged 15+, university degree or higher

- In Québec in 2016, there were 275,800 English-speaking aged 15 and over with a university degree or higher. This group represents 29.6% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 255 English speakers aged 15 and over with a university degree or higher in the RTS du Bas-Saint-Laurent where they account for 25.6% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the province's English speakers.
- In RLS de Rimouski, we find 95 English speakers aged 15 and over with a university degree or higher where they represent 25.7% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is similar to the proportion exhibited by English speakers across the region.

Population 25-44, university degree or higher

- In Québec in 2016, there were 136,960 English speakers aged 25-44 with a university degree or higher. This group accounts for 42.7% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 90 English speakers aged 25-44 with a university degree or higher in the RTS du Bas-Saint-Laurent where they represent 32.7% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much lower than that exhibited by the province's English speakers.
- In RLS de Rimouski, we find 35 English speakers aged 25-44 with a university degree or higher where they comprise 31.8% of the English-speaking population. This is higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is similar to the proportion exhibited by English speakers across the region.

Population 45-64, university degree or higher

- In Québec in 2016, there were 89,255 English speakers aged 45-64 with a university degree or higher. This group represents 29.2% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 105 English speakers aged 45-64 with a university degree or higher in the RTS du Bas-Saint-Laurent region where they represent 28.8% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is similar to that exhibited by the province's English speakers.
- In RLS de Rimouski, we find 50 English speakers aged 45-64 with a university degree or higher where they comprise 33.3% of the English-speaking population. This level is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the region.

Labour Force Activity

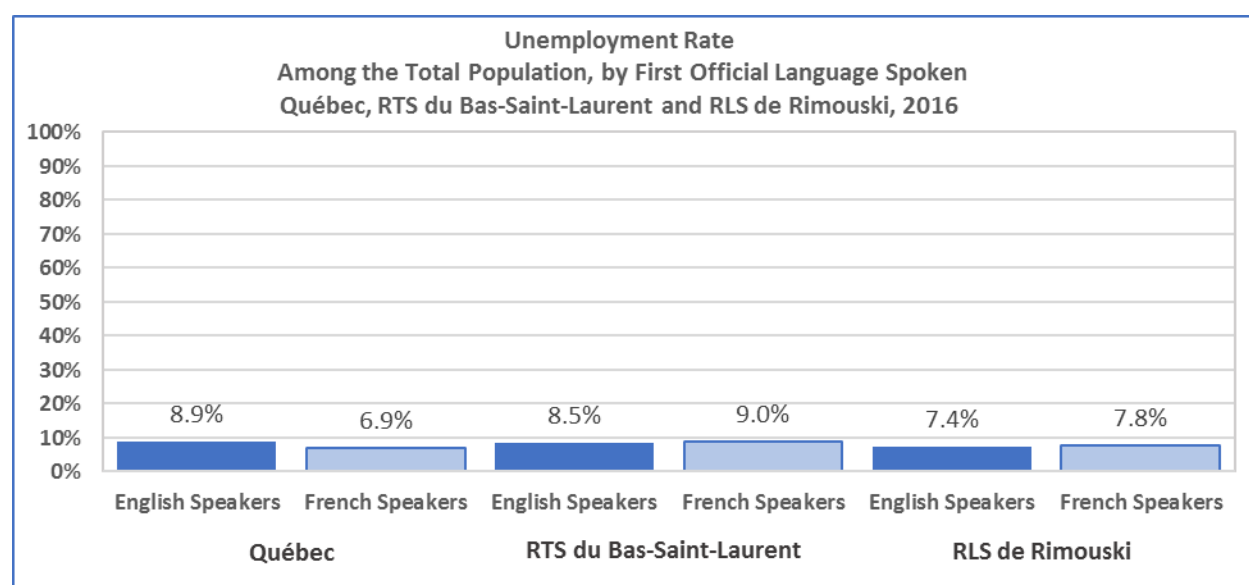

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.¹⁰

Table 7 - Labour Force Activity

Total Population by Labour Force Activity	Québec		RTS du Bas-Saint-Laurent		RLS de Rimouski	
	English	French	English	French	English	French
Total - Labour force activity	932,840	5,652,215	995	160,560	365	46,135
In the labour force	608,050	3,636,980	590	93,960	270	27,890
Employed	553,945	3,386,575	545	85,545	255	25,700
Out of the labour force	324,790	2,015,230	405	66,600	95	18,250
Total - Labour force activity	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
In the labour force	65.2%	64.3%	59.3%	58.5%	74.0%	60.5%
Employed	91.1%	93.1%	92.4%	91.0%	94.4%	92.1%
Unemployed	8.9%	6.9%	8.5%	9.0%	7.4%	7.8%
Out of the labour force	34.8%	35.7%	40.7%	41.5%	26.0%	39.6%

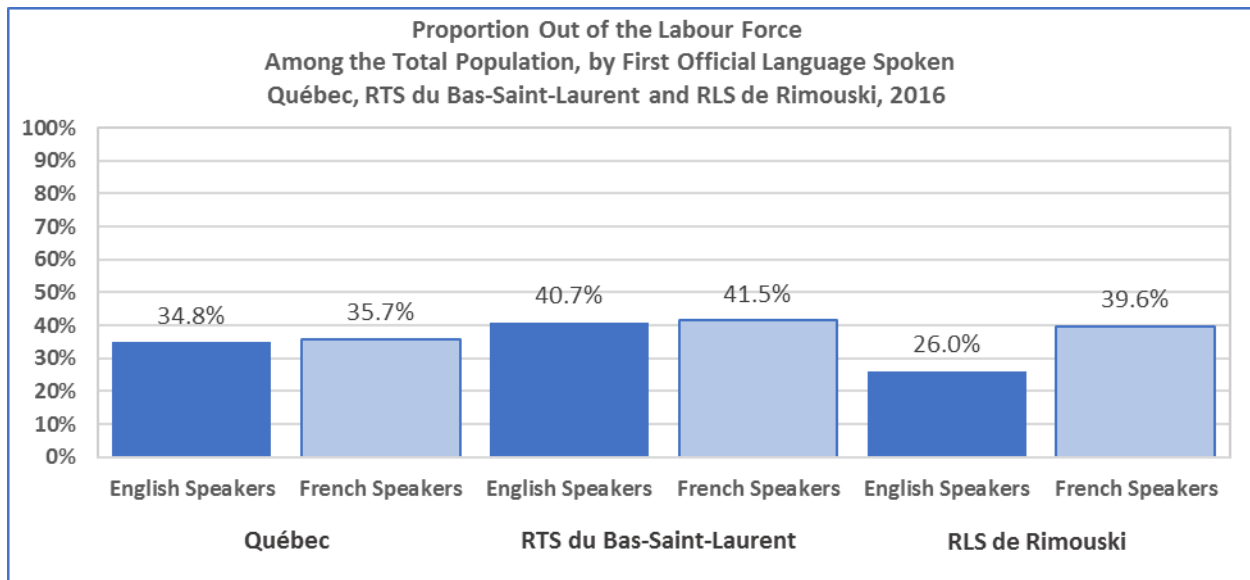

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

¹⁰ For further discussion of employment and working conditions as health determinants and the Population Health Model see J. Carter, A Community Guide to the Population Health Approach, Community Health and Social Services Network (CHSSN), www.chssn.org, March 2003. See also D. Raphael (ed.) (2009) Social Determinants of Health: Canadian Perspectives, 2nd Edition. Toronto: Canadian Scholar's Press.

Unemployed

- Across Québec in 2016, there were 54,105 English speakers who were unemployed resulting in an unemployment rate of 8.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2016, there were 50 unemployed English speakers in the RTS du Bas-Saint-Laurent region where they experienced an unemployment rate of 8.5%. The unemployment rate of the regional English-speaking population was lower than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was similar to that experienced by the provincial English-speaking population.
- In RLS de Rimouski, we find 20 unemployed English speakers resulting in an unemployment rate of 7.4%. This is lower than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is lower than the unemployment rate experienced by English speakers across the RTS du Bas-Saint-Laurent region.

Out of the labour force¹¹

- Across Québec in 2016, there were 324,790 English speakers out of the labour force in 2016. This group represents 34.8% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is similar to that found in the French-speaking majority population in Quebec aged 15 and over.

¹¹ The Statistics Canada category “[out of the labour force](#)” refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an “off” season who were not looking for work because of a long-term illness or disability. (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

- In 2016, there were 405 English speakers out of the labour force in the RTS du Bas-Saint-Laurent region where they comprise 40.7% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is higher than that exhibited by the provincial English-speaking population.
- In RLS de Rimouski, we find 95 English speakers aged 15+ out of the labour force where they account for 26.0% of the English-speaking population. This is lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the RTS du Bas-Saint-Laurent region.

Appendix A – English speakers and French speakers by RSS, RTS and RLS, 2016¹²

Number and Proportion of English and French Speakers in RSS du Bas-Saint-Laurent, by Territory, 2016				
Geography	Total Population	French Speakers	English Speakers	Proportion of English Speakers
RSS du Bas-Saint-Laurent	189,975	188,850	1,080	0.6%
RTS du Bas-Saint-Laurent	189,975	188,850	1,080	0.6%
RLS de Kamouraska	20,105	20,000	90	0.4%
RLS de Rivière-du-Loup	32,600	32,440	145	0.4%
RLS de Témiscouata	18,845	18,745	105	0.6%
RLS des Basques	8,270	8,230	40	0.5%
RLS de Rimouski	54,650	54,235	400	0.7%
RLS de La Mitis	17,530	17,390	135	0.8%
RLS de Matane	20,585	20,470	115	0.6%
RLS de La Matapédia	17,385	17,335	50	0.3%
