Introduction

About the 2017-2018 report series

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI). The information presented is drawn from the 2016 Census of Canada and organized by province and RTS and RLS territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Quebec's official language minority community.

Baseline Data Report Series

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region. A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix "B".

Determinants of Health

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.¹

Language Barriers

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and impression formation which impacts the evaluation and treatment of individuals seeking health and social services.

Methodological Notes

Data Source

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2016 Census of Canada. The population included here are those in private householders, drawing on the long-form census which has a 25% sample of the Canadian population.

Linguistic definitions

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

Geographic Regions

The 2017-2018 Baseline Data Report consists of a series of stand-alone documents which present key data for the RTS and RLS territories in Quebec in which there are at least 250 English-speaking residents.

In 2015, as part of the re-organization of health services by the MSSS, a series of new health territories known as the RTS (réseau territorial de services) and the RLS (réseau local de service) were established.²

The RTS is the réseau territorial des services which corresponds to the territories covered by the CISSS and CIUSSS bodies that were created recently by the government.

The 25 RTS regions were based on the former RSS (région socio-sanitaire or health regions) territories with these important changes:

- The RSS Gaspésie - Îles-de-la-Madeline was divided into RTS de la Gaspésie and RTS des Îles-de-la-Madeleine.
- The RSS Montréal was divided into five RTS regions.
- Part of the former RSS Montérégie territory was assigned to the Estrie region, newly named as RTS Estrie et Centre universitaire de Sherbrooke.
- The remaining area for RSS Montérégie was divided into three RTS territories.

As part of the 2015 re-organization, the territories of the former CSSS (Centre de santé et de services sociaux) were transformed into 96 RLS territories and many were re-named.

It is useful to note that many RLS territories are identical to CLSC territories while others are comprised of multiple CLSC territories.

The 166 CLSC territories remained unchanged although some were re-named.

² Appendix A of this document provides tables which set out the population and hierarchy of the new health geographic areas for a given RSS and its RTS and RLS territories.

Demographic and Socio-economic Characteristics

The demographic and socio-economic variables addressed in the 2017-2018 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)
- Educational attainment
- Labour force activity

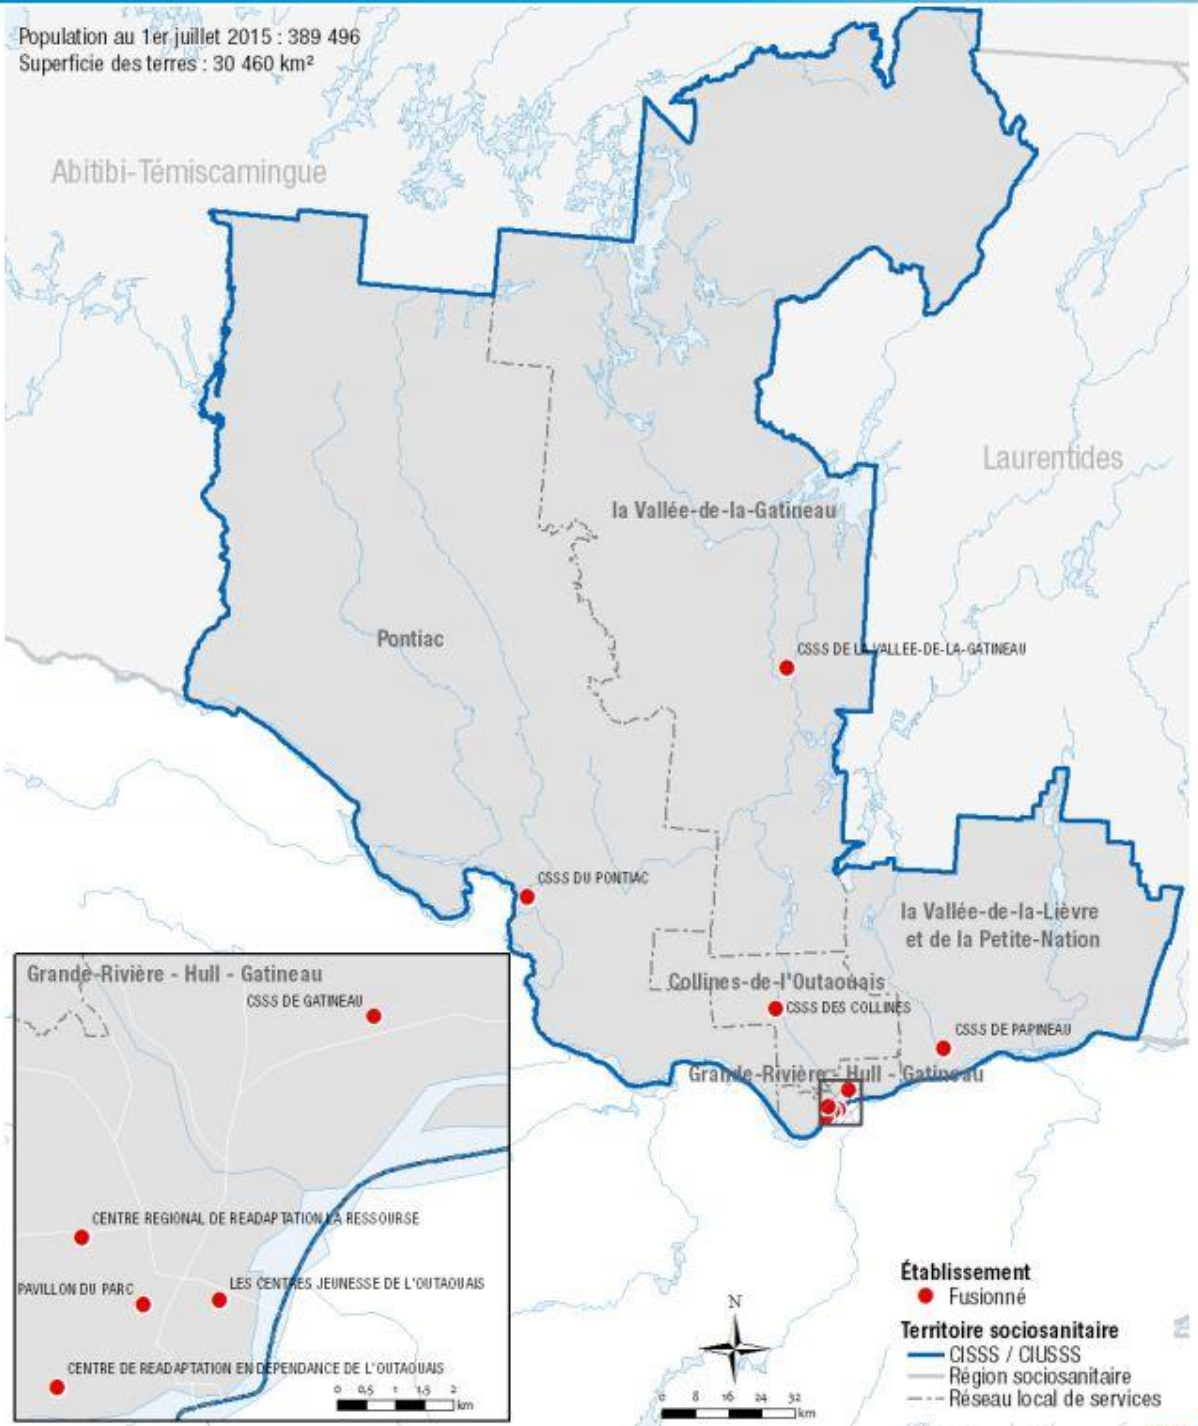

Statistics Canada Definitions

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2016 Census may also be consulted.

Demographic Size

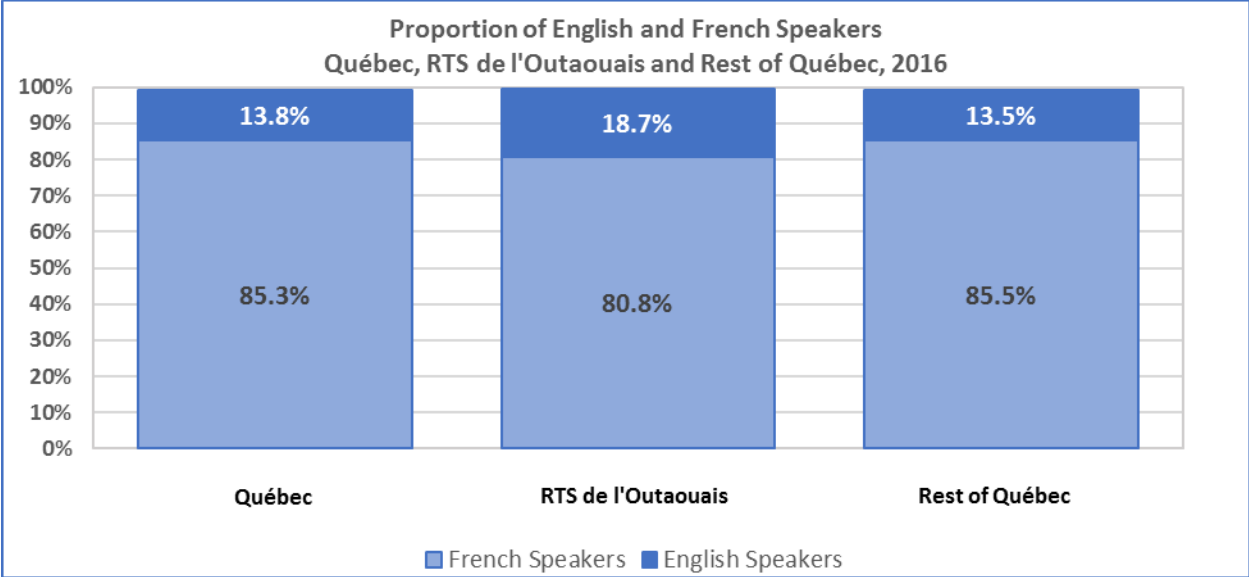

Quebec’s English speakers form one of Canada’s official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users’ satisfaction with the services received.³ In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

Table 1 - Population Size

| Size of Population | | Québec | RTS de l'Outaouais | Rest of Québec |
|-------------------------|------------|-----------|--------------------|----------------|
| FOLS - English speakers | number | 1,097,925 | 70,575 | 1,027,350 |
| | percentage | 13.8% | 18.7% | 13.5% |
| FOLS - French speakers | number | 6,795,280 | 304,625 | 6,490,655 |
| | percentage | 85.3% | 80.8% | 85.5% |
| Total population | number | 7,965,450 | 376,905 | 7,588,545 |
| | percentage | 100.0% | 100.0% | 100.0% |

(2006). “The Need for More Research on Language Barriers in Health Care: A Proposed Research Agenda”. *The Millbank Quarterly*, Vol. 84, No. 1, pp. 111-133.

- Across Québec, there were 1,097,925 English speakers, representing 13.8% of the provincial population.
- In 2016, there were 70,575 English speakers living in the RTS de l'Outaouais region where they represented 18.7% of the population. This share is much higher than the overall provincial share for English speakers.
- In the rest of Québec, we find 1,027,350 English speakers where they represented 13.5% of the population. This proportion is much lower than that represented by English speakers across the RTS de l'Outaouais territory.

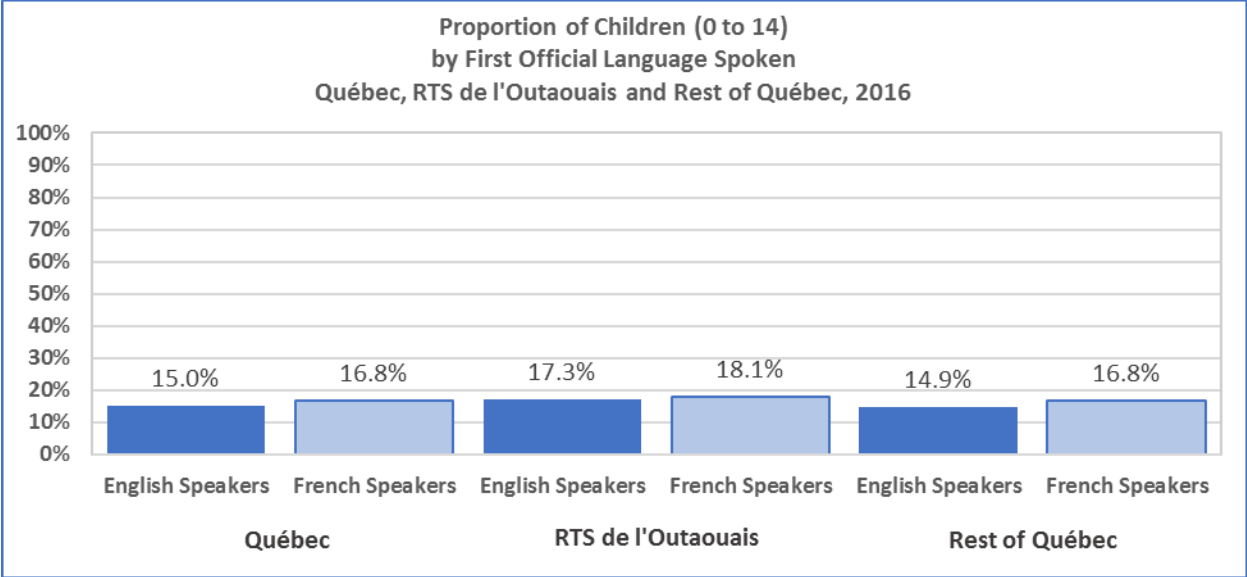

Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires awareness of the problems that are pressing for the minority and may be overlooked in the focus on the majority, and, awareness of problems that are shared by both language groups but are being met with solutions that are not equally accessible for both.

Table 2 - Age Structure of the Population

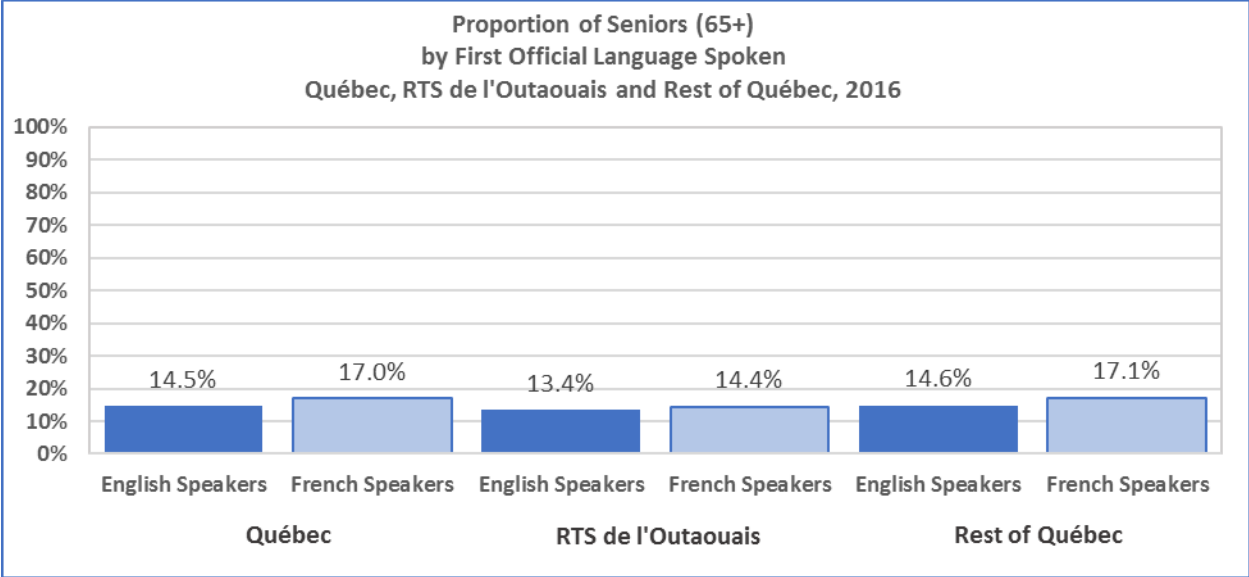

| Age Structure of the Population | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|---------------------------------|-----------|-----------|--------------------|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total - Age groups | 1,097,925 | 6,795,280 | 70,575 | 304,625 | 1,027,350 | 6,490,655 |
| 0-14 years | 165,085 | 1,143,060 | 12,205 | 55,025 | 152,880 | 1,088,035 |
| 15-24 years | 146,460 | 776,310 | 7,920 | 36,250 | 138,540 | 740,060 |
| 25-44 years | 320,930 | 1,728,440 | 20,440 | 77,185 | 300,490 | 1,651,255 |
| 45-64 years | 305,775 | 1,995,460 | 20,530 | 92,285 | 285,245 | 1,903,175 |
| 65+ years | 159,670 | 1,152,005 | 9,475 | 43,880 | 150,195 | 1,108,125 |
| Total - Age groups | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| 0-14 years | 15.0% | 16.8% | 17.3% | 18.1% | 14.9% | 16.8% |
| 15-24 years | 13.3% | 11.4% | 11.2% | 11.9% | 13.5% | 11.4% |
| 25-44 years | 29.2% | 25.4% | 29.0% | 25.3% | 29.2% | 25.4% |
| 45-64 years | 27.9% | 29.4% | 29.1% | 30.3% | 27.8% | 29.3% |
| 65+ years | 14.5% | 17.0% | 13.4% | 14.4% | 14.6% | 17.1% |

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

Children (aged 0-14)

- Across Québec, there were 165,085 English-speaking children aged 0-14, representing 15.0% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2016, there were 12,205 English-speaking children aged 0-14 living in RTS de l'Outaouais where they account for 17.3% of the population. The proportion of children in the regional English-speaking population is similar to their proportion in the regional French-speaking majority population. This proportion is higher than the level for English-speaking children across the province.
- In the rest of Québec, we find 152,880 English-speaking children aged 0-14 where they represent 14.9% of the population. This share is lower than that exhibited by English-speaking children across the RTS de l'Outaouais region. The proportion of children in the territory's English-speaking population is lower than the share in the rest of Québec French-speaking majority population.

Seniors (aged 65 and over)

- Across Québec, there were 159,670 English-speaking seniors aged 65+ representing 14.5% of the English-speaking population. The proportion of seniors in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 9,475 English-speaking seniors aged 65+ living in the RTS de l'Outaouais region where they accounted for 13.4% of the population. This share is lower than that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is lower than their proportion in the French-speaking majority population.
- In the rest of Québec, we find 150,195 English-speaking seniors aged 65+ where they account for 14.6% of the population. This share is lower than that of English-speaking seniors across the RTS de l'Outaouais region. The proportion of seniors in the English-speaking population is higher than the proportion in the French-speaking majority population in the rest of Québec.

Income

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.⁴ For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution lead to increases in social problems and poorer health among the population as a whole⁵.

Table 3 - Income

| Population by Income Group | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|-------------------------------|---------|-----------|--------------------|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total Population 15+ | 932,835 | 5,652,215 | 58,365 | 249,600 | 874,470 | 5,402,615 |
| Less than \$20,000 | 359,020 | 1,799,170 | 20,440 | 74,075 | 338,580 | 1,725,095 |
| \$20,000 - \$49,999 | 328,605 | 2,235,010 | 19,320 | 87,745 | 309,285 | 2,147,265 |
| \$50,000 + | 245,210 | 1,618,025 | 18,605 | 87,790 | 226,605 | 1,530,235 |
| Total Population 15+ | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| Less than \$20,000 | 38.5% | 31.8% | 35.0% | 29.7% | 38.7% | 31.9% |
| \$20,000 - \$49,999 | 35.2% | 39.5% | 33.1% | 35.2% | 35.4% | 39.7% |
| \$50,000 + | 26.3% | 28.6% | 31.9% | 35.2% | 25.9% | 28.3% |

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

⁵ *Ibid.*

Income under \$20k

- Across Québec in 2016, there were 359,020 English speakers aged 15+ with income under \$20k. This group represents 38.5% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2016, there were 20,440 English speakers aged 15+ with income under \$20k in the RTS de l'Outaouais region where they represent 35.0% of the English-speaking population aged 15 and over. This share is lower than that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is higher than the proportion in the French-speaking majority population.
- In the rest of Québec, we find 338,580 English speakers aged 15+ with income under \$20k where they account for 38.7% of the population. This share is higher than that experienced by English speakers across RTS de l'Outaouais. The proportion of those with income under \$20k in the territory's English-speaking population is much higher than the proportion for the French-speaking majority population in the rest of Québec.

Earning \$50k and over

- Across Québec, there were 245,210 English speakers aged 15+ with income over \$50k, who represented 26.3% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2016, there were 18,605 English speakers aged 15+ with income over \$50k living in the RTS de l'Outaouais region, where they represented 31.9% of the population. This proportion was much higher than the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is lower than the share of high earners in the French-speaking majority population in the region.
- In the rest of Québec, we find 226,605 English-speaking high earners aged 15+, where they represent 25.9% of the population. This share is lower than that experienced by English-speaking high earners across the RTS de l'Outaouais region. The proportion of high earners in the territory's English-speaking population is lower than the proportion of high earners in the territory's French-speaking majority population.

Household Living Arrangements

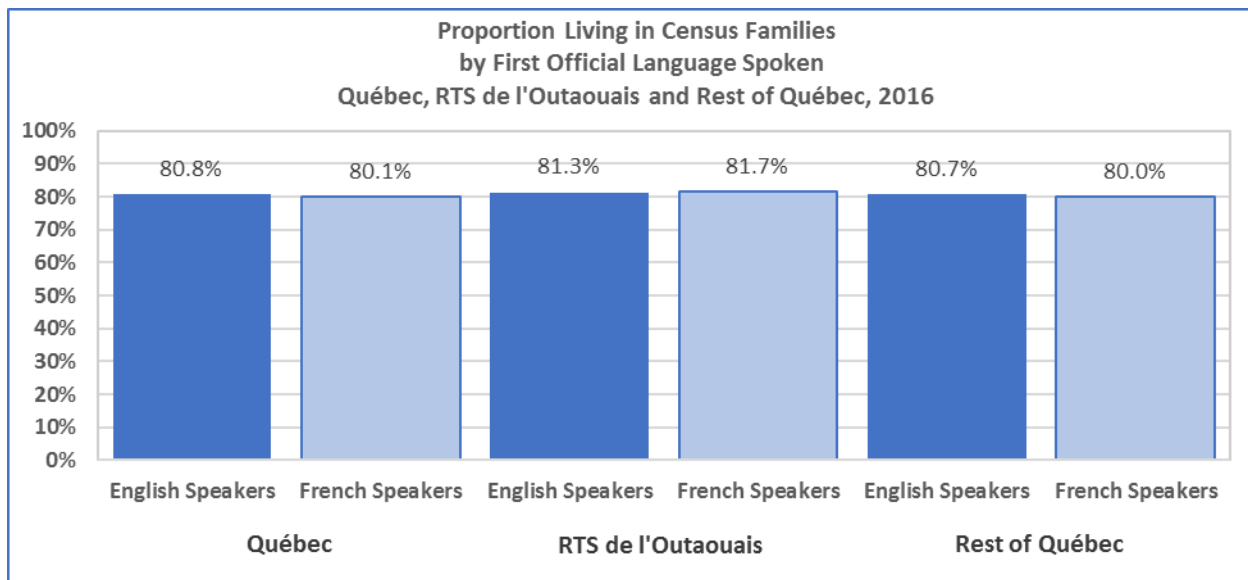

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. For example, the Quebec Social and Health Survey (1998) revealed that parents of minors living in lone parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.⁶ Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to illness or aging.

Table 4 - Population by Household Living Arrangements

| Population by Household Living Arrangements | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|--|-----------|-----------|--------------------|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total - Household living arrangements | 1,097,925 | 6,795,280 | 70,575 | 304,625 | 1,027,350 | 6,490,655 |
| Total persons in census family households | 886,705 | 5,443,560 | 57,400 | 248,765 | 829,305 | 5,194,795 |
| Persons in two-parent households | 750,650 | 4,640,895 | 48,020 | 207,405 | 702,630 | 4,433,490 |
| Persons in single-parent households | 136,050 | 802,660 | 9,375 | 41,360 | 126,675 | 761,300 |
| Total persons in non-census family households | 211,215 | 1,351,720 | 13,175 | 55,855 | 198,040 | 1,295,865 |
| Living with relatives | 23,435 | 116,660 | 1,410 | 5,770 | 22,025 | 110,890 |
| Living with non-relatives only | 40,935 | 213,270 | 2,090 | 9,490 | 38,845 | 203,780 |
| Living alone | 146,855 | 1,021,795 | 9,680 | 40,595 | 137,175 | 981,200 |
| Total - Household living arrangements | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| Total persons in census family households | 80.8% | 80.1% | 81.3% | 81.7% | 80.7% | 80.0% |
| Persons in two-parent households | 68.4% | 68.3% | 68.0% | 68.1% | 68.4% | 68.3% |
| Persons in single-parent households | 12.4% | 11.8% | 13.3% | 13.6% | 12.3% | 11.7% |
| Total persons in non-census family households | 19.2% | 19.9% | 18.7% | 18.3% | 19.3% | 20.0% |
| Living with relatives | 2.1% | 1.7% | 2.0% | 1.9% | 2.1% | 1.7% |
| Living with non-relatives only | 3.7% | 3.1% | 3.0% | 3.1% | 3.8% | 3.1% |
| Living alone | 13.4% | 15.0% | 13.7% | 13.3% | 13.4% | 15.1% |

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

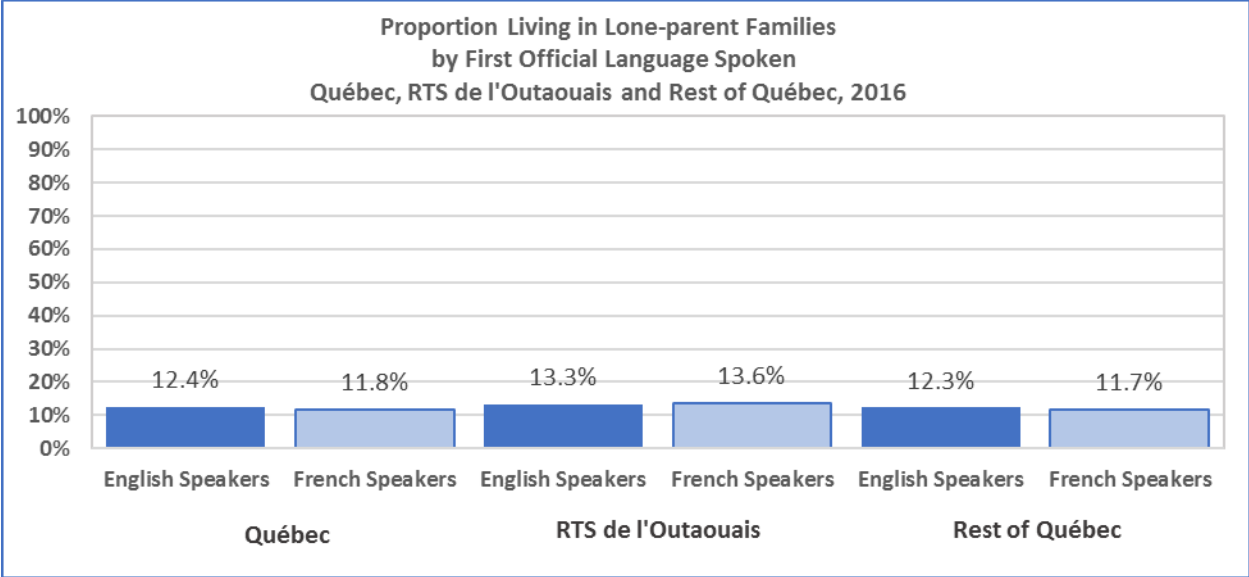

⁶ For discussion of the survey, see Pocock, J. (2008) "Baseline Data Report 2007-2008. Quebec's Social and Health Survey Information." *Community Health and Social Services Network (CHSSN)*. www.chssn.org

Living in census families⁷

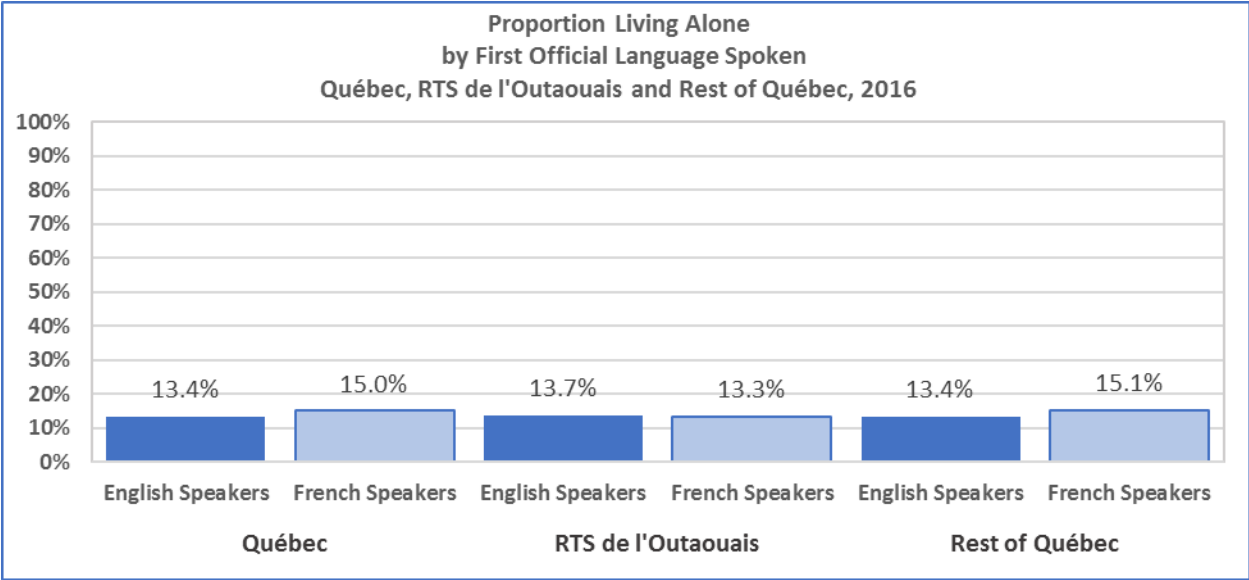

- Across Québec, there were 886,705 English speakers living in census family households. This group represents 80.8% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2016, there were 57,400 English speakers living in census family households in the RTS de l'Outaouais where they comprise 81.3% of the population. This share is similar to that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population.
- In the rest of Québec, we find 829,305 English speakers living in census family households where they account for 80.7% of the population. This share is similar to that accounted for by English speakers across the RTS de l'Outaouais region. The proportion of persons living in census family households in the English-speaking population is similar to the proportion represented by the French-speaking majority population in the rest of Québec.

⁷ Under Statistics Canada's terminology, a census family refers "a married couple (with or without children of either and/or both spouses), a common-law couple (with or without children of either and/or both partners) or a lone parent of any marital status, with at least one child. A couple may be of opposite sex or same sex. 'Children' in a census family include grandchildren living with their grandparent(s) but with no parents present." (<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>)

Living in lone-parent families

- Across Québec, there were 136,050 English speakers living in lone-parent families. This group represents 12.4% of the English-speaking population. The proportion of English speakers living in lone-parent families is similar to the proportion found in the French-speaking majority population in Quebec.
- In 2016, there were 9,375 English speakers living in lone-parent families in the RTS de l'Outaouais where they account for 13.3% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is similar to the proportion found in the regional French-speaking majority population. The proportion is higher than that found in the provincial English-speaking population.
- In the rest of Québec, we find 126,675 English speakers living in lone-parent families where they represent 12.3% of the population. This is similar to the proportion represented by the French-speaking majority population in the rest of Québec. The proportion of English speakers living in lone-parent families in the rest of Québec's English-speaking population is higher than the proportion we find for English speakers across the RTS de l'Outaouais region.

Living alone

- Across Québec, there were 146,855 English speakers living alone. This group represents 13.4% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Québec.
- In 2016, there were 9,680 English speakers living alone in the RTS de l'Outaouais, where they account for 13.7% of the population. This level is similar to that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is similar to the proportion found in the regional French-speaking majority population.
- In the rest of Québec we find 137,175 English speakers living alone, where they represent 13.4% of the population. This share is similar to that exhibited by English speakers across the RTS de l'Outaouais region. The proportion of those living alone in the territory's English-speaking population is lower than the proportion exhibited by the French-speaking majority population in the rest of Québec.

Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in “straitened circumstances.”⁸ The following table considers the population living below LICO by language, administrative territory and age group.

Table 5 - Population Living Below LICO, Within Age Groups

| Population Living Below the Low-Income Cut-off (LICO), Across Age Groups | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|--|---------|---------|--------------------|--------|----------------|---------|
| | English | French | English | French | English | French |
| Total - Age groups | 195,300 | 811,110 | 10,280 | 33,720 | 185,020 | 777,390 |
| 0-14 years | 25,480 | 125,400 | 1,850 | 6,030 | 23,630 | 119,370 |
| 15-24 years | 35,280 | 118,175 | 1,720 | 5,200 | 33,560 | 112,975 |
| 25-44 years | 60,205 | 193,170 | 2,865 | 8,050 | 57,340 | 185,120 |
| 45-64 years | 48,885 | 221,935 | 2,865 | 9,330 | 46,020 | 212,605 |
| 65+ years | 25,445 | 152,425 | 975 | 5,115 | 24,470 | 147,310 |
| Proportion of those below LICO across age groups | | | | | | |
| Total - Age groups | 18.1% | 12.0% | 14.8% | 11.1% | 18.0% | 12.0% |
| 0-14 years | 16.0% | 11.0% | 15.5% | 11.0% | 16.1% | 11.0% |
| 15-24 years | 24.7% | 15.3% | 22.2% | 14.4% | 24.8% | 15.3% |
| 25-44 years | 19.1% | 11.2% | 14.2% | 10.4% | 19.4% | 11.3% |
| 45-64 years | 16.2% | 11.1% | 14.1% | 10.1% | 16.4% | 11.2% |
| 65+ years | 16.1% | 13.2% | 10.4% | 11.7% | 16.4% | 13.3% |

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in 'Table 2 - Age Structure of the Population' of this document.

⁸ See “Low income cut-offs” (dated 2015-11-2) <https://www.statcan.gc.ca/pub/75f0002m/2012002/lico-sfr-eng.htm> for explanation of how LICOs are calculated.

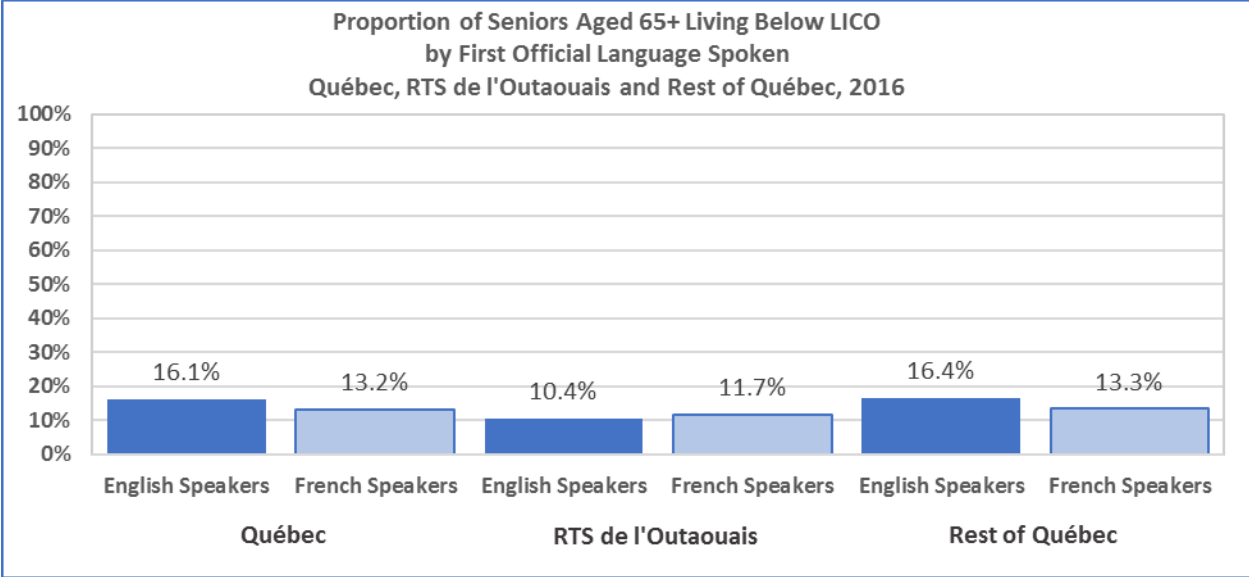

Population living below the low-income cut-off (LICO)

- Across Québec, there were 195,300 English speakers living below LICO. This group accounts for 18.1% of the English-speaking population. The proportion of English speakers living below LICO is much higher than the proportion in the French-speaking majority population in Quebec.
- In 2016, there were 10,280 English speakers living below LICO in the RTS de l'Outaouais region, where they represent 14.8% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is much higher than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in RTS de l'Outaouais is lower than the proportion for Quebec's English speakers in general.
- In the rest of Québec, we find 185,020 English speakers living below LICO, where they represent 18.0% of the English-speaking population. This level is much higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much higher than the proportion for English speakers across RTS de l'Outaouais.

Children (0-14) Living below the low-income cut-off (LICO)

- Across Québec, there were 25,480 English-speaking children living below LICO. This group represents 16.0% of the population of children. The proportion of English-speaking children living below LICO is much higher than the proportion found for children in the French-speaking majority population in Quebec.
- In 2016, there were 1,850 English-speaking children living below LICO in the RTS de l'Outaouais where they account for 15.5% of the children in the regional English-speaking population. The proportion of children living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority children's population. This proportion is similar to that displayed by English-speaking children across the province.
- In the rest of Québec, we find 23,630 English-speaking children living below LICO where they represent 16.1% of the English-speaking children's population. This proportion is much higher than the proportion experienced by children in the French-speaking majority in the same territory. The proportion of children living below LICO in the territory's English-speaking population is similar to the proportion experienced by English-speaking children across the RTS de l'Outaouais region.

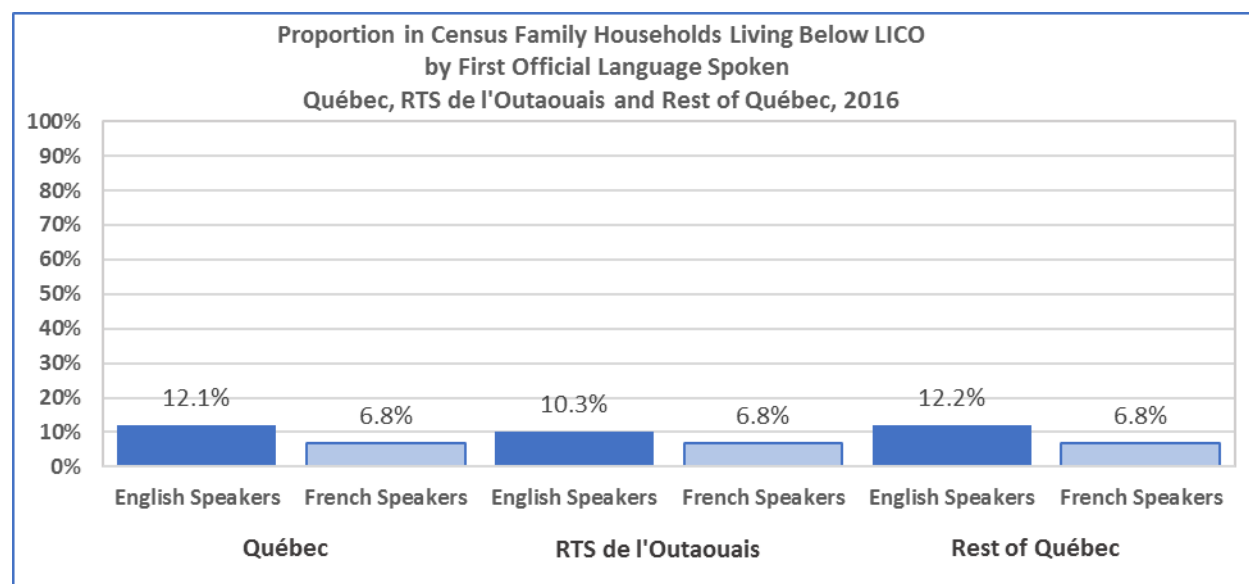

Seniors (65+) Living below the low-income cut-off (LICO)

- Across Québec, there were 25,445 English-speaking seniors living below LICO. This group represents 16.1% of the English-speaking senior population. The proportion of English-speaking seniors living below LICO is much higher than the proportion of seniors living below LICO in the French-speaking majority population in Quebec.
- In 2016, there were 975 English-speaking seniors living below LICO in the RTS de l'Outaouais where they account for 10.4% of the regional English-speaking senior population. The proportion of those seniors living below LICO in the regional English-speaking senior population is lower than the proportion in the regional French-speaking majority senior population. This proportion is much lower than that experienced by English-speaking seniors across the province.
- In the rest of Québec, we find 24,470 English-speaking seniors living below LICO where they represent 16.4% of the English-speaking senior population. This is much higher than the proportion experienced by the French-speaking majority senior population living below LICO in the same territory. The proportion of seniors living below LICO in the territory's English-speaking population is much higher than the level displayed by English-speaking seniors across the RTS de l'Outaouais region.

Table 6 - Population Living Below LICO, by Household Living Arrangements

| Population Living Below the Low-Income Cut-off Level, by Household Living Arrangements | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|--|---------|---------|--------------------|--------|----------------|---------|
| | English | French | English | French | English | French |
| Total - Household living arrangements | 195,300 | 811,110 | 10,280 | 33,720 | 185,020 | 777,390 |
| Total persons in census family households | 107,000 | 371,305 | 5,890 | 16,840 | 101,110 | 354,465 |
| Persons in two-parent households | 72,245 | 213,605 | 3,415 | 9,060 | 68,830 | 204,545 |
| Persons in single-parent households | 34,755 | 157,700 | 2,470 | 7,780 | 32,285 | 149,920 |
| Total persons in non-census family households | 88,300 | 439,810 | 4,385 | 16,880 | 83,915 | 422,930 |

| Living with non-relatives only | 25,910 | 107,000 | 1,180 | 4,565 | 24,730 | 102,435 |
| Living alone | 57,435 | 317,095 | 3,000 | 11,370 | 54,435 | 305,725 |
| Proportion of those below LICO, by household living arrangements | | | | | | |
| Total - Household living arrangements | 17.8% | 11.9% | 14.6% | 11.1% | 18.0% | 12.0% |
| Total persons in census family households | 12.1% | 6.8% | 10.3% | 6.8% | 12.2% | 6.8% |
| Persons in two-parent households | 9.6% | 4.6% | 7.1% | 4.4% | 9.8% | 4.6% |
| Persons in single-parent households | 25.5% | 19.6% | 26.3% | 18.8% | 25.5% | 19.7% |
| Total persons in non-census family households | 41.8% | 32.5% | 33.3% | 30.2% | 42.4% | 32.6% |
| Living with relatives | 21.1% | 13.5% | 14.5% | 16.4% | 21.5% | 13.3% |
| Living with non-relatives only | 63.3% | 50.2% | 56.5% | 48.1% | 63.7% | 50.3% |
| Living alone | 39.1% | 31.0% | 31.0% | 28.0% | 39.7% | 31.2% |

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document.

Persons in Census Family Households living below the low-income cut-off (LICO)

- Across Québec, there were 107,000 English-speaking persons in census family households living below LICO. This group represents 12.1% of the English-speaking population in census family households. The proportion of English-speaking persons in census family

households living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living below LICO in census family households.

- In 2016, there were 5,890 English-speaking persons in census family households living below LICO in the RTS de l'Outaouais, where they represent 10.3% of the regional English-speaking population. The proportion of persons in census family households living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The proportion in the regional English-speaking population is lower than that found in the provincial English-speaking population.
- In the rest of Québec, we find 101,110 English-speaking persons in census family households living below LICO, where they account for 12.2% of the English-speaking population. This level is much higher than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is higher than the proportion found in the English-speaking population of the RTS de l'Outaouais region.

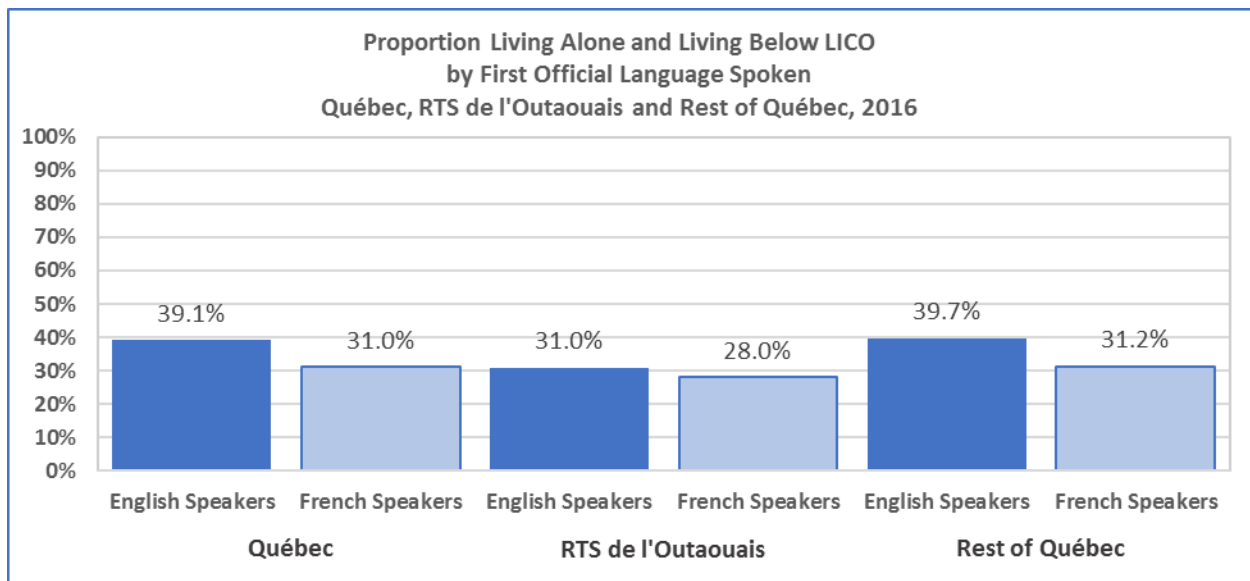

Persons in Lone-Parent Families Living below the low-income cut-off (LICO)

- Across Québec, there were 34,755 English-speaking persons in lone-parent families living below LICO. This group represents 25.5% of the English-speaking population living in lone-parent families. The proportion of English-speaking persons in lone-parent families living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living in lone parent families.
- In 2016, there were 2,470 English-speaking persons in lone-parent families living below LICO in the RTS de l'Outaouais where they account for 26.3% of the regional English-speaking lone-parent family population. The proportion of persons in lone-parent families living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The level for the English-

speaking regional population is similar to that found in the provincial English-speaking population.

- In the rest of Québec, we find 32,285 English-speaking persons in lone-parent families living below LICO where they account for 25.5% of the English-speaking lone-parent family population. This is much higher than the proportion experienced by the French-speaking majority lone-parent family population in the same territory. The proportion of persons in lone-parent families living below LICO in the territory's English-speaking population is similar to the proportion experienced by English speakers across the RTS de l'Outaouais region.

Persons living alone and living below the low-income cut-off (LICO)

- Across Québec, there were 57,435 English-speaking persons living alone and below LICO. This group represents 39.1% of the English-speaking population living alone. The proportion of English speaking persons living alone and below LICO is much higher than that found in the French-speaking majority population in Quebec living alone.
- In 2016, there were 3,000 English-speaking persons living alone and below LICO in the RTS de l'Outaouais where they account for 31.0% of the regional English-speaking population living alone. The proportion of those persons living alone and below LICO in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that experienced by the provincial English-speaking population.
- In the rest of Québec, we find 54,435 English-speaking persons living alone and below LICO where they represent 39.7% of the English-speaking population living alone. This is much higher than the proportion experienced by the French-speaking majority population living alone in the same territory. The proportion of those persons living alone and below LICO in the territory's English-speaking population is much higher than the proportion experienced by English speakers across the RTS de l'Outaouais region.

Highest Educational Attainment

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members⁹.

Table 7 - Highest Educational Certification, for Selected Age Groups

| Total Population by Highest Educational Certification | | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|--|-------------|---------|-----------|--------------------|---------|----------------|-----------|
| | | English | French | English | French | English | French |
| Total | Total | 932,840 | 5,652,215 | 58,375 | 249,595 | 874,465 | 5,402,620 |
| | 25-44 years | 320,930 | 1,728,440 | 20,445 | 77,180 | 300,485 | 1,651,260 |

Toronto: Canadian Scholar's Press.

Population aged 15+, high school diploma or less

- Across Québec, there were 380,050 English speakers aged 15 and over with a high school diploma or less. This group accounts for 40.7% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Quebec.
- In 2016, there were 25,570 English speakers aged 15 and over with a high school diploma or less in the RTS de l'Outaouais region where they account for 43.8% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is higher than that exhibited by English speakers across the province.
- In the rest of Québec, we find 354,480 English speakers aged 15 and over with a high school diploma or less where they represent 40.5% of the English-speaking population aged 15 and over. This level is similar to the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is lower than the proportion exhibited by the English speakers across the RTS de l'Outaouais region.

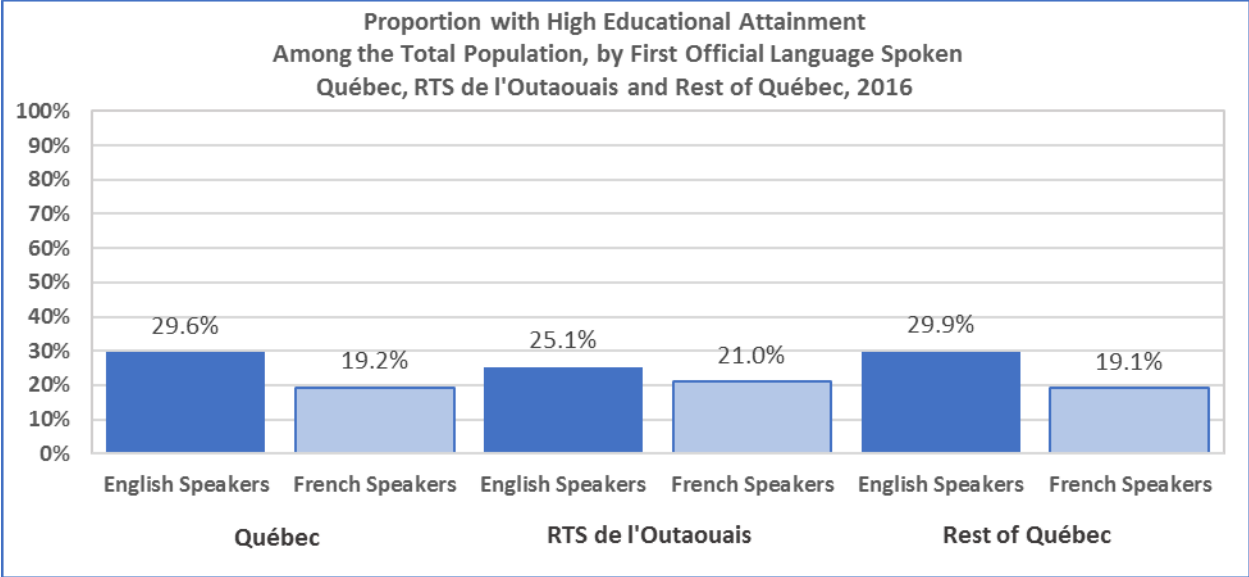

Population 25-44, high school diploma or less

- Across Québec, there were 84,680 English speakers aged 25-44 with a high school diploma or less. This group represents 26.4% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2016, there were 6,240 English speakers aged 25-44 with a high school diploma or less in the RTS de l'Outaouais region where they account for 30.5% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population in that age group. This proportion is higher than that exhibited by English speakers across the province in the same age cohort.
- In the rest of Québec, we find 78,440 English speakers aged 25-44 with a high school diploma or less where they comprise 26.1% of the English-speaking 25-44 cohort. This is higher than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the RTS de l'Outaouais region.

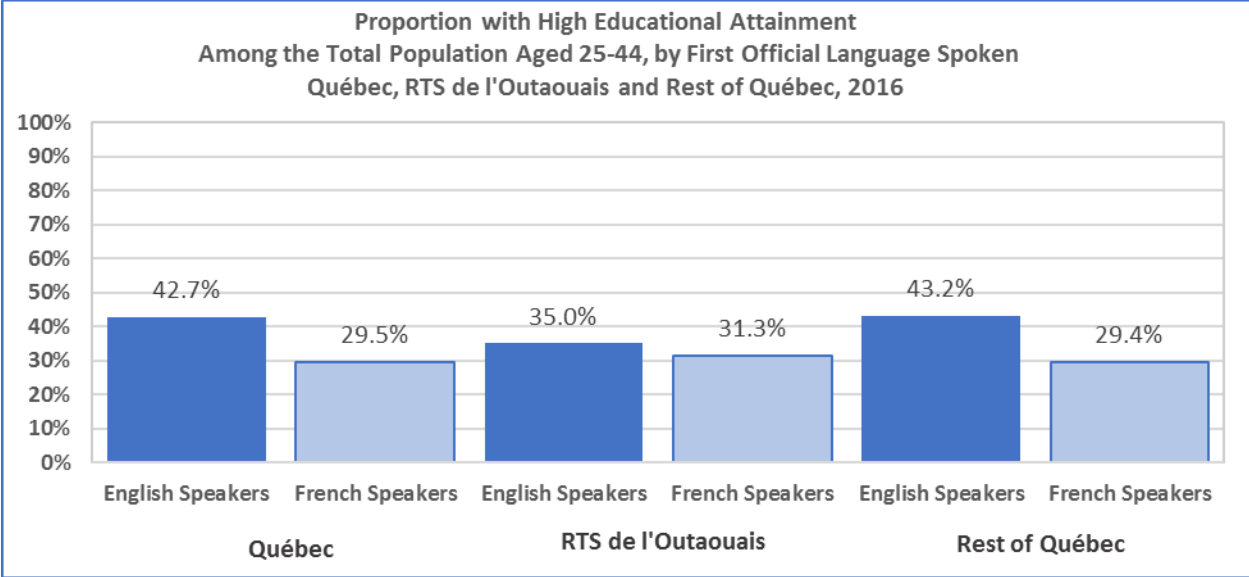

Population 45-64, high school diploma or less

- In Québec in 2016, there were 116,390 English-speaking aged 45-64 with a high school diploma or less. This group represents 38.1% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2016, there were 8,400 English speakers aged 45-64 with a high school diploma or less in the RTS de l'Outaouais region where they account for 40.9% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 107,990 English speakers aged 45-64 with a high school diploma or less where they comprise 37.9% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the region.

Population aged 15+, university degree or higher

- In Québec in 2016, there were 275,800 English-speaking aged 15 and over with a university degree or higher. This group represents 29.6% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 14,670 English speakers aged 15 and over with a university degree or higher in the RTS de l'Outaouais where they account for 25.1% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the province's English speakers.
- In the rest of Québec, we find 261,130 English speakers aged 15 and over with a university degree or higher where they represent 29.9% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the region.

Population 25-44, university degree or higher

- In Québec in 2016, there were 136,960 English speakers aged 25-44 with a university degree or higher. This group accounts for 42.7% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 7,165 English speakers aged 25-44 with a university degree or higher in the RTS de l'Outaouais where they represent 35.0% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is lower than that exhibited by the province's English speakers.
- In the rest of Québec, we find 129,795 English speakers aged 25-44 with a university degree or higher where they comprise 43.2% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the region.

Population 45-64, university degree or higher

- In Québec in 2016, there were 89,255 English speakers aged 45-64 with a university degree or higher. This group represents 29.2% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2016, there were 5,245 English speakers aged 45-64 with a university degree or higher in the RTS de l'Outaouais region where they represent 25.5% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is lower than that exhibited by the province's English speakers.
- In the rest of Québec, we find 84,010 English speakers aged 45-64 with a university degree or higher where they comprise 29.5% of the English-speaking population. This level is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the region.

Labour Force Activity

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

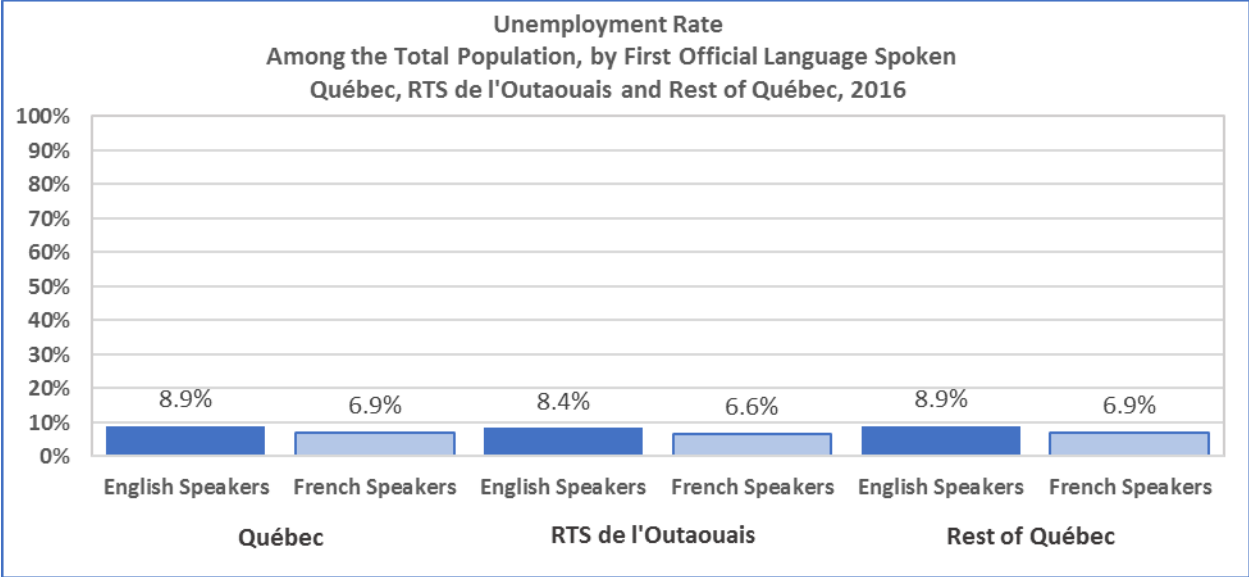

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.¹⁰

Table 8 - Labour Force Activity

| Total Population by Labour Force Activity | Québec | | RTS de l'Outaouais | | Rest of Québec | |
|--|---------|-----------|--------------------|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total - Labour force activity | 932,840 | 5,652,215 | 58,375 | 249,595 | 874,465 | 5,402,620 |
| In the labour force | 608,050 | 3,636,980 | 39,220 | 164,370 | 568,830 | 3,472,610 |
| Employed | 553,945 | 3,386,575 | 35,935 | 153,470 | 518,010 | 3,233,105 |
| Unemployed | 54,105 | 250,410 | 3,285 | 10,900 | 50,820 | 239,510 |
| Out of the labour force | 324,790 | 2,015,230 | 19,155 | 85,230 | 305,635 | 1,930,000 |
| Total - Labour force activity | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| In the labour force | 65.2% | 64.3% | 67.2% | 65.9% | 65.0% | 64.3% |
| Employed | 91.1% | 93.1% | 91.6% | 93.4% | 91.1% | 93.1% |
| Unemployed | 8.9% | 6.9% | 8.4% | 6.6% | 8.9% | 6.9% |
| Out of the labour force | 34.8% | 35.7% | 32.8% | 34.1% | 35.0% | 35.7% |

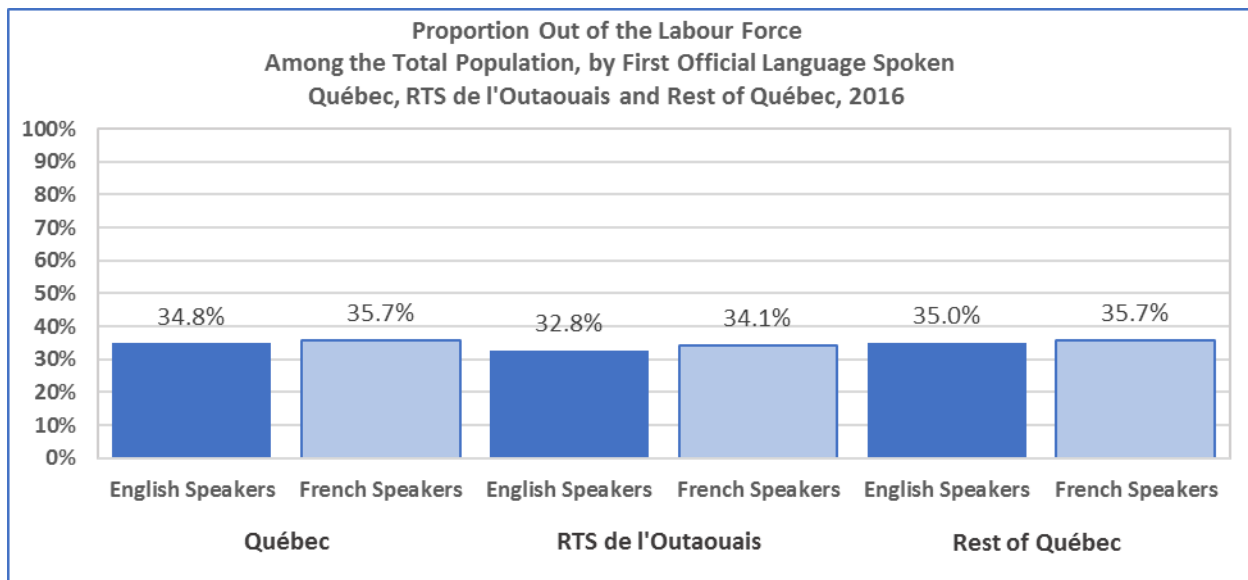

Source: JPocock Research Consulting, 2016 Census, Statistics Canada. Population in private households - 25% sample. The linguistic concept is First Official Language Spoken with multiple responses distributed equally between English and French.

¹⁰ For further discussion of employment and working conditions as health determinants and the Population Health Model see J. Carter, A Community Guide to the Population Health Approach, Community Health and Social Services Network (CHSSN), www.chssn.org, March 2003. See also D. Raphael (ed.) (2009) Social Determinants of Health: Canadian Perspectives, 2nd Edition. Toronto: Canadian Scholar's Press.

Unemployed

- Across Québec in 2016, there were 54,105 English speakers who were unemployed resulting in an unemployment rate of 8.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2016, there were 3,285 unemployed English speakers in the RTS de l'Outaouais region where they experienced an unemployment rate of 8.4%. The unemployment rate of the regional English-speaking population was much higher than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was lower than that experienced by the provincial English-speaking population.
- In the rest of Québec, we find 50,820 unemployed English speakers resulting in an unemployment rate of 8.9%. This is much higher than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is higher than the unemployment rate experienced by English speakers across the RTS de l'Outaouais region.

Out of the labour force¹¹

- Across Québec in 2016, there were 324,790 English speakers out of the labour force in 2016. This group represents 34.8% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is similar to that found in the French-speaking majority population in Quebec aged 15 and over.
- In 2016, there were 19,155 English speakers out of the labour force in the RTS de l'Outaouais region where they comprise 32.8% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the provincial English-speaking population.
- In the rest of Québec, we find 305,635 English speakers aged 15+ out of the labour force where they account for 35.0% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the RTS de l'Outaouais region.

¹¹ The Statistics Canada category “[out of the labour force](#)” refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an “off” season who were not looking for work because of a long-term illness or disability.
