ERCC Development Model

Passive

Local residents and organizations of the ESC are getting informed on issues and priorities by institutions and governments.

Reactive

Local residents and organizations of the ESC are identifying their assets, priorities and providing input into institutions and governments.

Participative

Local residents and organizations of the ESC are recognized stakeholders in influencing priorities and resources offered by institutions and governments.

Empowerment

Local residents and organizations of the ESC have a common vision and are working in shared planning and development with institutions and governments.

Leadership

Local residents and organizations of the ESC are taking responsibility for their own development and initiating change in collaboration with institutions and governments.
