CHSSN Early Childhood, Youth and Families Program | LOGIC MODEL

ULTIMATE OUTCOME	Children, youth, and families in English-speaking communities in Quebec have improved well-being and educational success		
LONGER-TERM OUTCOME	English-speaking communities have improved access to health promotion (HEY) and other culturally and linguistically appropriate programs and services for children, youth (BB), and families		Health inequities are reduced for English-speaking communities in Quebec (specifically for children 0-6)
INTERMEDIATE OUTCOMES	 Outcomes seen in Partner Organizations (Bright Beginnings) Service providers adapted their programs to facilitate the access by ESC and/or new programs/services were developed to make up for the lack of services available to the ESC Projects were implemented in collaboration with local, regional, and provincial partners* Bright Beginnings) Representative organizations (e.g. NPIs & CHSSN) have been integrated into planning processes There has been increased recognition of ESC needs by government and service providers 		 Outcomes seen in Individual Participants (Healthy Early Years) Program participants gain resources, knowledge, and/or skills Program participants have improved health behaviors Program participants have improved their well-being
SHORT-TERM OUTCOMES	 Stronger collaborations and partnerships were developed Gov't & service providers are sensitized and have enhanced knowledge of ESC priorities and needs, and can therefore work to decrease barriers to participation Increased mobilization & leadership for ESC children, youth & families 		
ACTIVITIES / OUTPUTS	 Develop projects focused on early child, youth & family with provincial orgs Build relationships with gov't and provincial organizations Offer networking, training, capacity building & learning events on evidence-based practices, including a community of practice of NPIs working on early childhood, youth and families Develop knowledge products Program management and implementation support 	 Build relationships with gov't and service providers Network and representation with gov't and service providers Outreach to connect families to existing resources Develop early childhood, youth & family activities (when necessary) 	 Planning and outreach activities to help communities assess strengths and needs for the delivery of HEY, and engage community members and potential partners^{**} Community-based activities to increase knowledge of early childhood development and develop parenting skills. Capacity building activities to enhance the skills of community workers to deliver and support effective prenatal and early childhood development programs as well as build the capacity of the community to improve health outcomes for children 0-6 years.
INPUTS	 Program Manager Program Administrator Project funding to provincial organizations Funding for knowledge products Funding for training & learning events Evaluation Consultants In-kind contribution of leadership and admin. 	 Project funding to 21 NPIs NPI in-kind contributions (e.g. staff, locale, admin., materials) 	 Project funding to 22 NPIs NPI in-kind contributions (e.g. staff, locale, admin., materials) PHAC-produced educational material for community activities PHAC-produced information pamphlets & infographics for community members
PROGRAMS			

Objectives: Manage and support the implementation of NPI projects, and engage stakeholders involved with children 0-17 and their families, with the aim of increasing their awareness and knowledge of realities of English-speaking communities as well as encourage adapting practices and services to better reach and support children and families.

Objectives: Bright Beginnings enables NPIs and CHSSN to engage stakeholders offering programs and services to children 0-17 and their families. The aim of these collaborations is to provide new and adapted services to better reach and support English-speaking children and families.**

HEY

Objectives: HEY is a Public Health Agency of Canada program that supports early childhood health promotion programming in official language minority communities across Canada. It allows NPIs to develop culturally and linguistically appropriate programs to support families and children (0-6).**

ALIGNMENT **OF BB AND HEY PROGRAMS**

Together Bright Beginnings and Healthy Early Years programs weave a supportive environment for individuals and families, and for organizations, as they strive to support children, youth and families. Both aim to develop strong and effective partnerships between NPIs and relevant stakeholders with the goal of adapting or creating programs & services and making them more accessible to the English-speaking population. The HEY program has a more direct focus on improving individual participant well-being.

READ FROM BOTTOM TO TOP

- * Partnership projects are made possible thanks to the funding support from the Public Health Agency of Canada's HEY Program. ** Made possible thanks to the funding support from Bright Beginnings Program, funded by the Lucie and André Chagnon Foundation. *** 1. "Enable communities to develop comprehensive, culturally and linguistically appropriate programs to improve the health and development of children (0-6 years) and their families living in OLMC; 2. Improve access to early childhood health promotion programming for children and their families living in OLMC and reduce early childhood health inequities." **** "Our Bright Beginnings program is an innovative approach that supports the mobilization of local, regional and provincial partners, with the aim of enhancing the well-being and educational success of English-speaking children and youth in Quebec."
