Papalampropoulou-
Tsiridou, Project
administrator

Objectives of this presentation

Demonstate how

- The analysis of local administrative health and census data
 - Improves the management and development of the health service offer
 - Improves the development of a deeper understanding of health service needs at the local, regional and provincial levels.

Introduce the use of the Geodata platform

- Local analysis of English language health services for mental health during the pandemic (2019-2020) in the CIUSSS de la Capitale-Nationale
 - Overall distribution of the English-speaking population at different scales (RTS, and CT-CSD)
 - Distribution of the population aged 65 and over according to the use of health care and mental health services
 - Distribution de la population de 65 ans et plus dans le CIUSSS-de la Capitale-Nationale (03) par CT-CSD
 - Distribution de la population de 65 ans selon l'utilisation des services de santé

The challenges of official language minority communities

- The resolution of issues concerning OLMCs (Linguistic Minority Communities) must consider the number and geographical distribution of their characteristics, their proximity
- The "GeoData" project meets this need
 - Uses health service user data and cross-references this information with census data
 - Locate by neighborhood or district

Geodata Project

Context of the Geodata project

Under-utilisation of clinical-administrative data on the use of health services in English by the English-speaking population of Quebec to improve the distribution of services in the territory.

The SCLA Jeffrey Hale data model

Main features (out of 170)

1. Service acts - JHCS – CIUSSSCN

2. Gender

- ✓ Female/Male

3. Age

- ✓ Age at the moment of intervention
- ✓ Age groups

4. Geographic location of users

- ✓ 28 territorial scales from local to provincial

The Geodata Project

- Is an initiative of the Jeffery Hale Community Services in English (SCJH)
- Developed a protocol for geolocation and anonymization of clinical-administrative health data
- Contextualized English-language service user information according to socio-demographic data profiles
 - 380 variables according to :
 - Language
 - Age groups
 - six geographic scales including local scale by census tract and municipality (CT-CSD)
- 48,330 acts of service by SCJH from 2015-2020 (services in English)
- 1,700,000 acts of service by CIUSSS de la Capitale-Nationale from 2019 to 2020
- An online analysis and dissemination infrastructure (dashboards and story maps)

Geodata Project

Data from different sources

RTS

Systemic challenges to be addressed

The geodata project allows:

- Integration of data from different resources
- The crossing of databases to obtain information
- The geolocation of administrative data usage

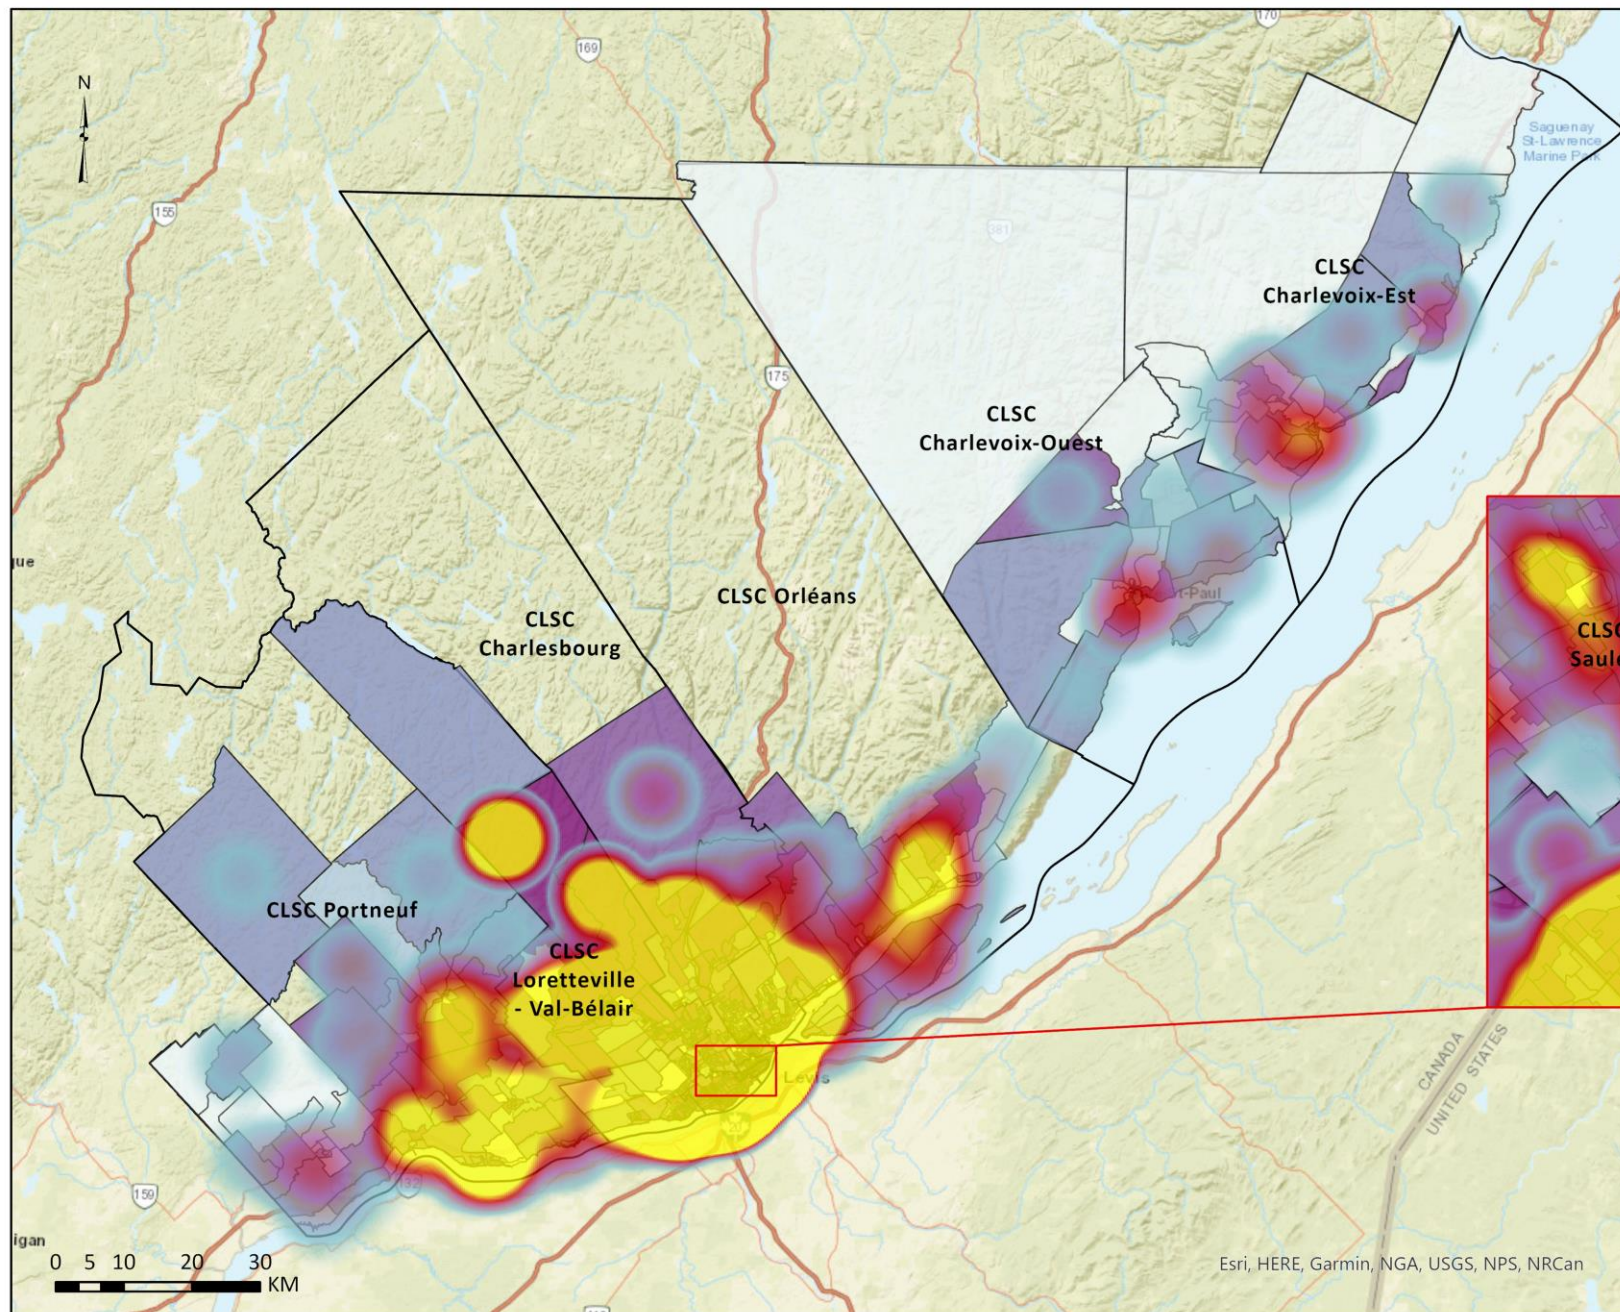

The English-speaking population

Their number is a fraction of the majority French-speaking population in Quebec

- 1,103,475 or 13.1% (2016) of the total population of Quebec

The geographical distribution varies unevenly

- 80% of the FOLS English population is in the Montreal area
- 20% distributed in sometimes isolated concentrations in the rest of Quebec
 - 14,870 or 2.1% (2016) of the total population in the Quebec City area, the CIUSSS de la Capitale-Nationale
- Distribution by 25 territorial service networks (RTS)
 - Each population class represents 20% of the population
 - High concentration in Western Quebec
- Distribution by local neighbourhood (census tracts and municipalities)
 - Dispersion from west to east with a strong concentration around Montreal
 - At a local level (CT-CSD) there are clusters of high concentration outside of Montreal

Mental Health Services 2019 and 2020, SCLA | JHSB CIUSSS-CN

1 Service acts

- 5910 – Psychosocial services for trouble youth and their families
- 5930 – Front line outpatient mental health services
- 5940 – Community supports for people with serious mental illness
- 6560 – Psychosocial Services

2 Number and proportion of total mental health procedures

3 Comparison 2019 and 2020

Health service acts and number of user 2019 - 2020

Total users and health service acts (Jeffery Hale)

| SCLA | Year | Users and acts | 4 mental health service acts | |
|-------|------|----------------|------------------------------|---|
| Users | 2019 | 672 | 504 | 1 |
| | 2020 | 774 | 529 | |
| Acts | 2019 | 5485 | 3662 | 2 |
| | 2020 | 8409 | 6009 | |
| Rate | 2019 | 8.2 | 7.3 | 3 |
| | 2020 | 10.9 | 11.4 | |

Change of service by age group and gender

| Age group and gender | SCJH - 2019 | SCJH - 2020 | Total | Change | SCJH - 2019 % de 13 actes | SCJH - 2020 % de 13 actes |
|----------------------|-------------|-------------|-------|--------|------------------------------|---------------------------------|
| 0-17 years | 1267 | 1941 | 3208 | 674 | 20.0% | 20.3% |
| 18-54 years | 1178 | 1442 | 2620 | 264 | 18.6% | 15.1% |
| 55 years and over | 1217 | 2626 | 3843 | 1409 | 19.2% | 27.4% |
| Women | 1722 | 2894 | 4616 | 1172 | 27.1% | 30.2% |
| Men | 1940 | 3115 | 5055 | 1175 | 30.6% | 32.5% |
| Total 4 actes | 3662 | 6009 | 9671 | 2347 | 57.7% | 62.7% |
| Total 13 actes | 6350 | 9577 | 15927 | 3227 | 100.0% | 100.0% |

| 2019 | Men | 508 | 338 | 188 | 906 | 1940 |
| | Women | 713 | 388 | 30 | 591 | 1722 |
| | Total | 1221 | 726 | 218 | 1497 | 3662 |
| 2020 | Men | 550 | 340 | 194 | 2031 | 3115 |
| | Women | 779 | 428 | 99 | 1588 | 2894 |
| | Total | 1329 | 768 | 293 | 3619 | 6009 |
| % Change | Men | 8.3% | 0.6% | 3.2% | 124.2% | 60.6% |
| | Women | 9.3% | 10.3% | 230.0% | 168.7% | 68.1% |
| | Total | 8.8% | 5.8% | 34.4% | 141.8% | 64.1% |

Mental Health Services, SCLA

- 64.1% overall increase in services
- Increase in each service category ranging from 8.8% (5910) to 141.8% (6560)
- Increase in services for women from 9.3% (5910) to 230% (5940)
- Questions raised: number of users?
- Sociodemographic context (social determinants of health?): geolocation and analysis

SCLA | JHSB use of service acts from 2015 to 2020 for those 65 years and older

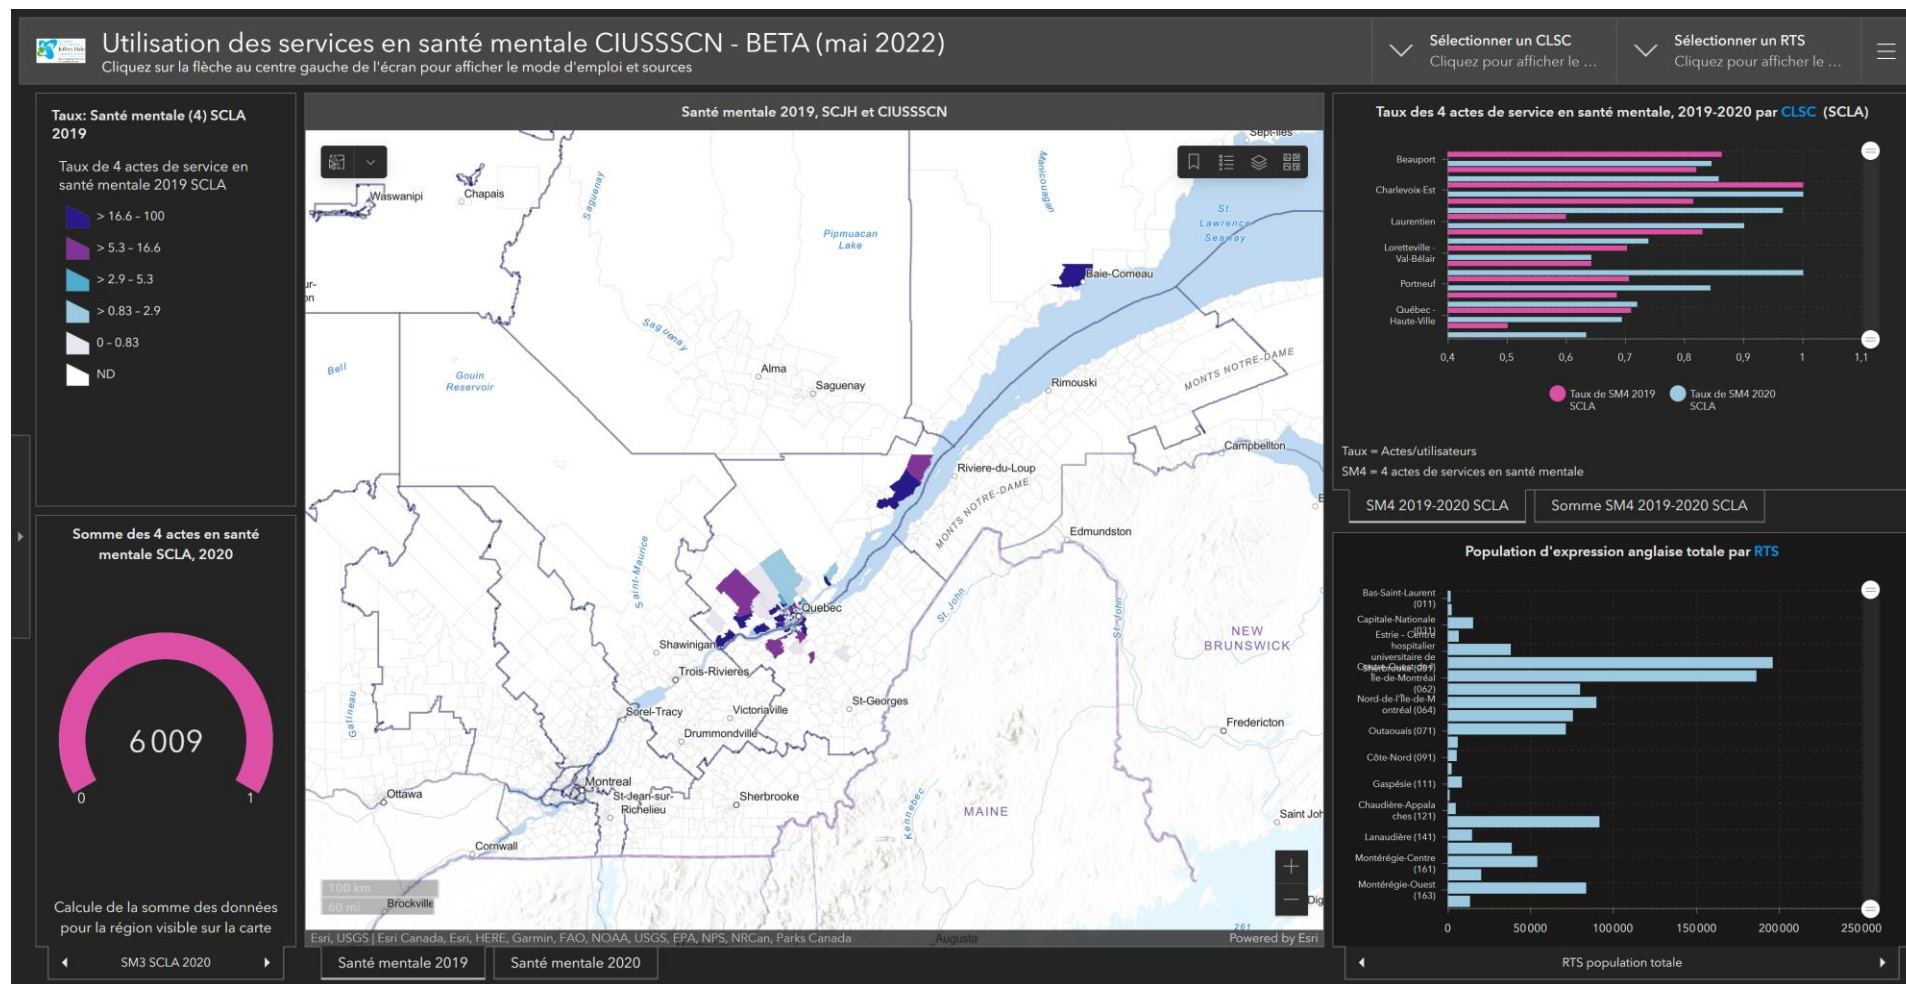

Conclusion and next steps

- Gaps in services have been identified
 - changing dynamics / changing needs
- Geodata knowledge base targeted local needs
- Adapted tools solicited constructive feedback
- Adaptation to change in health use parameters
 - Adaptation of knowledge tools
 - Adaptation of targeted policies and programs
 - Magnifying effect of the pandemic on linguistic minority health service issues (especially elderly)

A dashboard is a view of geographic information and data

Designed to display multiple visualizations that work together on a single screen

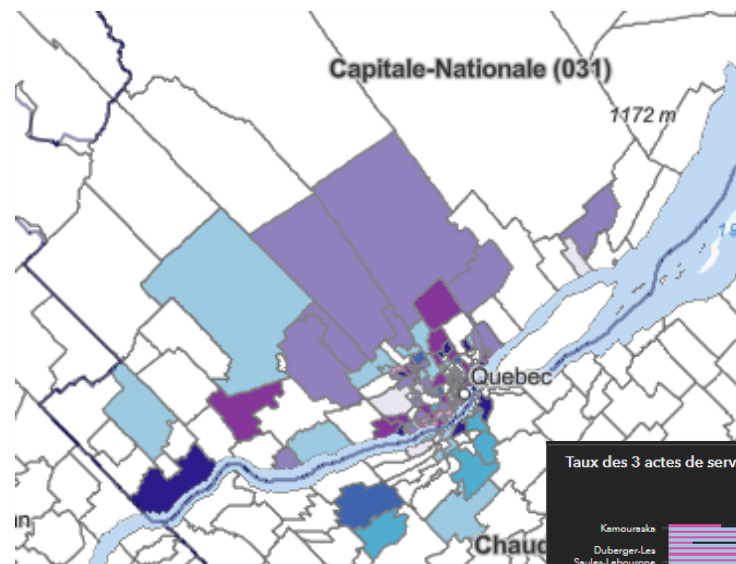

Offer a complete view of your data and provide key information for at-a-glance decision making.

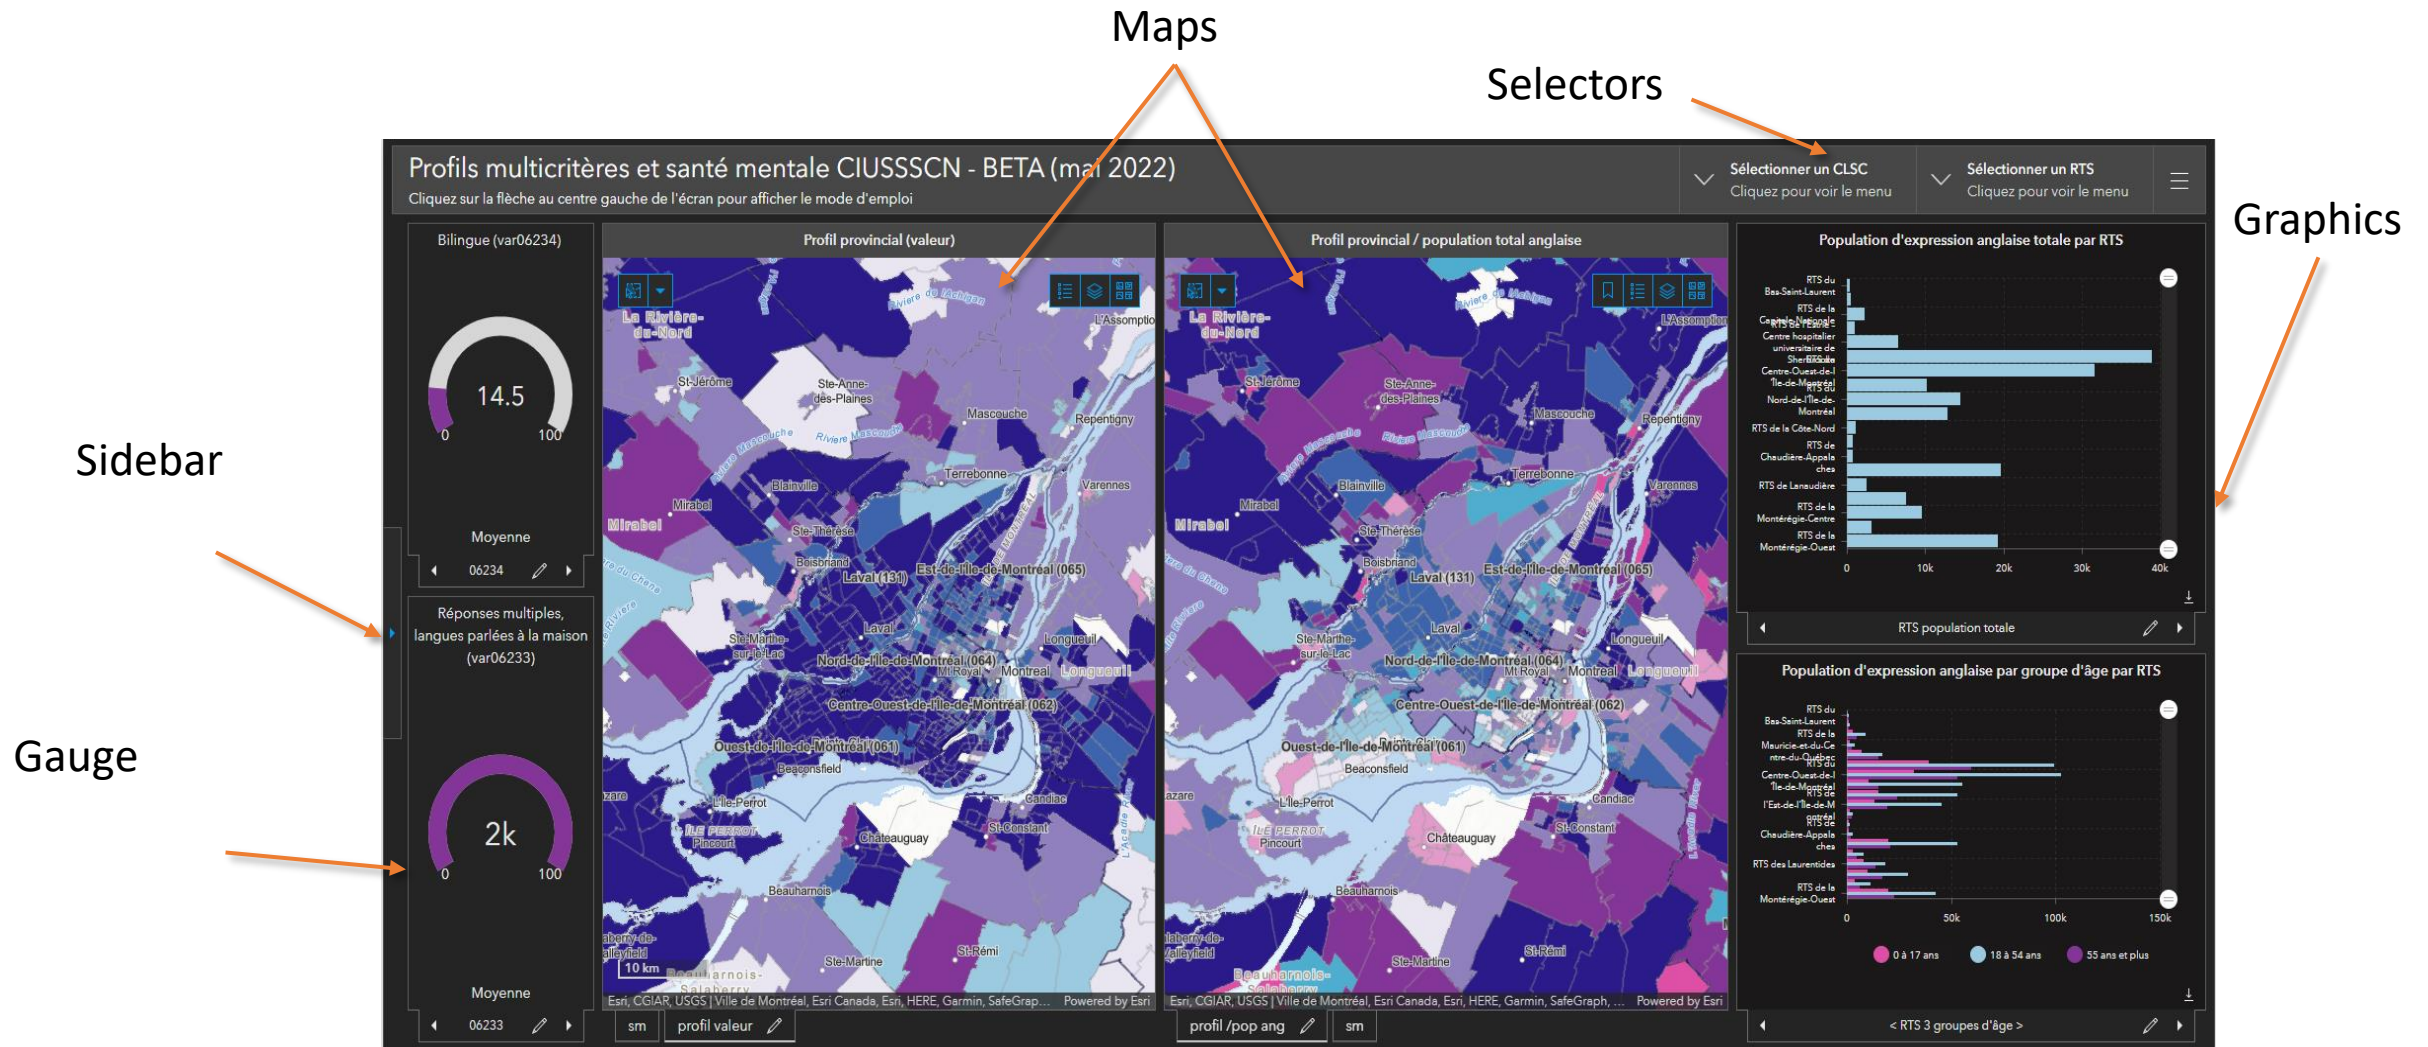

Composed of configurable elements, such as maps, lists, graphs, gauges, indicators and tables, and occupy 100% of the application's browser window.
