Introduction

About the 2022-2023 Report Series

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI)¹. The information presented is drawn from the 2021 Census of Canada and organized by province, RTS and RLS territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Québec's official language minority community.

Baseline Data Report Series

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region.

A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix "B".

Determinants of Health

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.²

Language Barriers

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and

Methodological Notes

Data Source

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2021 Census of Canada. The statistics are drawn from two different Statistics Canada data sources which vary according (1) to the definition of the population surveyed and (2) by the questionnaire that was administered.

The statistics for table 1 (Population Size) and table 2 (Age Structure) and the accompanying graphs are based on a 100% sample of Canadians including people in non-institutional collective dwellings. These individuals answered Statistics Canada's 2021 short form census questionnaire.

The statistics for all other tables and accompanying graphs are based on a 25% sample of Canadians living in private households. This sample excludes individuals in institutions and non-institutional collective dwellings. These individuals answered Statistics Canada's 2021 long form questionnaire.

The short form census questionnaire reaches a larger population, but the long form census is the primary source of exhaustive demographic data in Canada. Without the long form, the socio-demographic characteristics provided by tables 3 through 8 of this BDR report would not be attainable.

Linguistic definitions

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed among declared languages since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three Census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

Geographic Regions

The 2022-2023 Baseline Data Report consists of a series of stand-alone documents which present key data for the RTS and RLS territories in Québec in which there are at least 250 English-speaking residents.

Demographic and Socio-economic Characteristics

The demographic and socio-economic variables addressed in the 2022-2023 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)

- Educational attainment
- Labour force activity

Statistics Canada Definitions

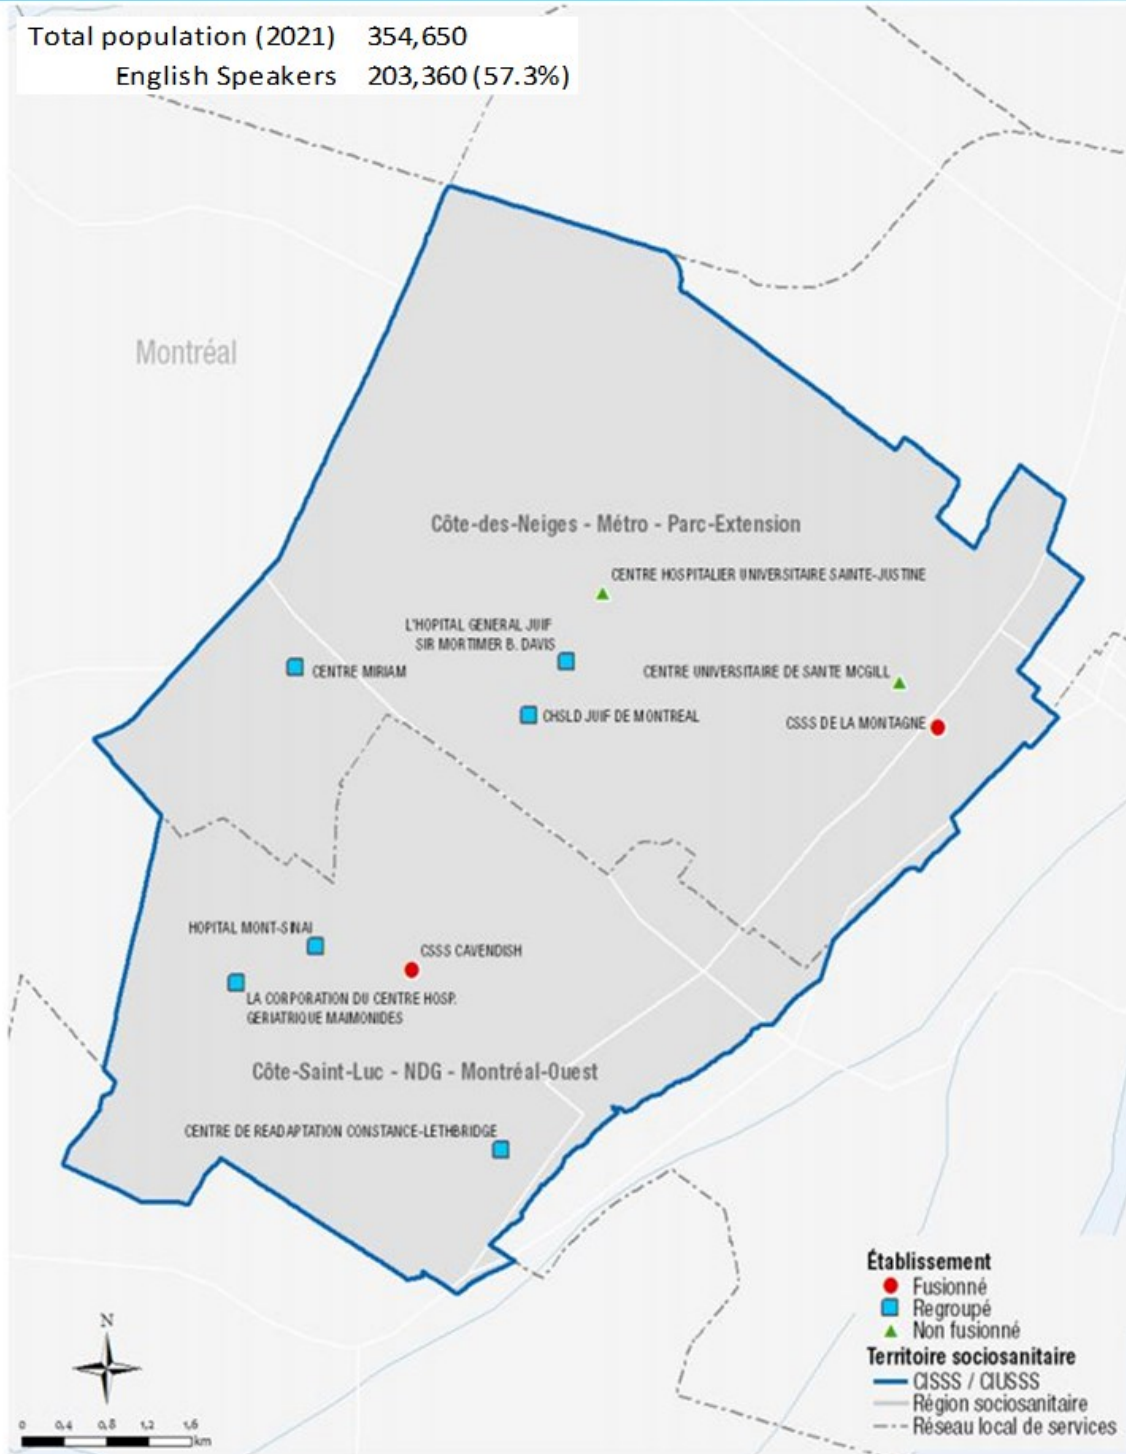

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2021 Census may also be consulted.³

Demographic Size

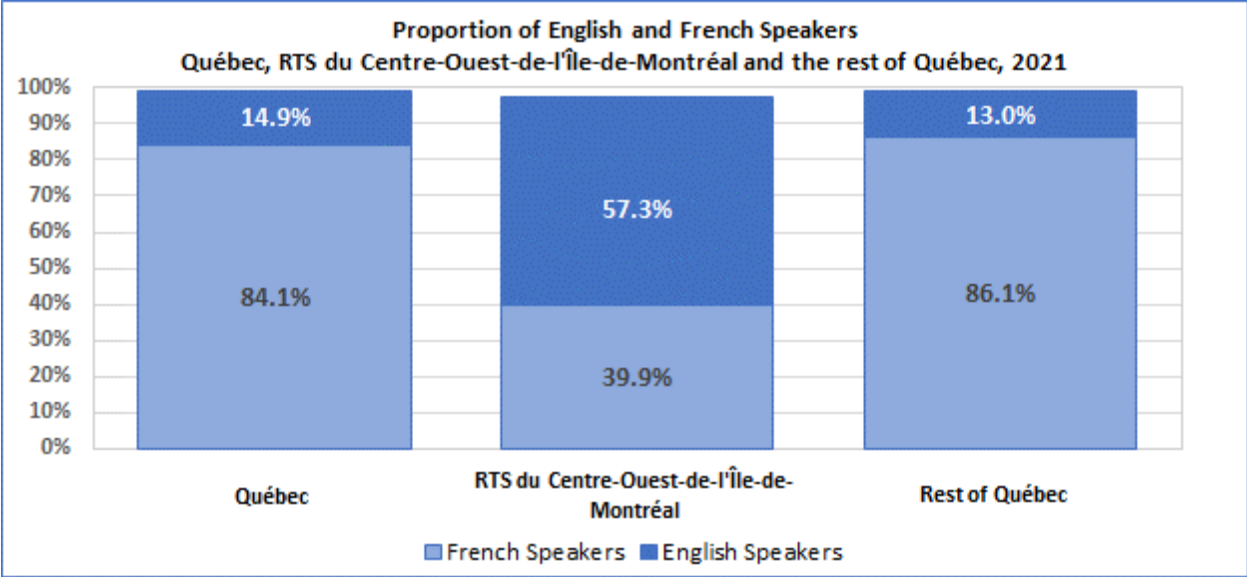

Québec’s English speakers form one of Canada’s official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users’ satisfaction with the services received.⁴ In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

Table 1 - Population Size

| Size of Population | | Québec | RTS du Centre-Ouest-de-l’Île-de-Montréal | Rest of Québec |
|--------------------|------------|-----------|--|----------------|
| English speakers | number | 1,253,580 | 203,360 | 1,050,220 |
| | percentage | 14.9% | 57.3% | 13.0% |
| French speakers | number | 7,074,330 | 141,520 | 6,932,810 |
| | percentage | 84.1% | 39.9% | 86.1% |
| Total population | number | 8,406,905 | 354,650 | 8,052,255 |
| | percentage | 100.0% | 100.0% | 100.0% |

⁴ See Bowen, S. (2001). *Language Barriers in Access to Health Care*, Ottawa: Health Canada. Also, Bowen, S. et al. (2010).” From ‘multicultural health’ to ‘knowledge translation’ – rethinking strategies to promote language access within a risk management framework”. *The Journal of Specialized Translation (Jostrans)*, Issue 14, http://www.jostrans.org/issue14/art_bowen.php.

- Across Québec, there were 1,253,580 English speakers, representing 14.9% of the provincial population.
- In 2021, there were 203,360 English speakers living in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they represented 57.3% of the population. This share is much higher than the overall provincial share for English speakers.
- In the rest of Québec, we find 1,050,220 English speakers where they represented 13.0% of the population. This proportion is much lower than that represented by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal territory.

Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. From Sanderson’s study we learn that the types of issues experienced by Quebec’s English-speaking seniors and their caregivers in accessing services differ from those of English speakers younger in age.⁵

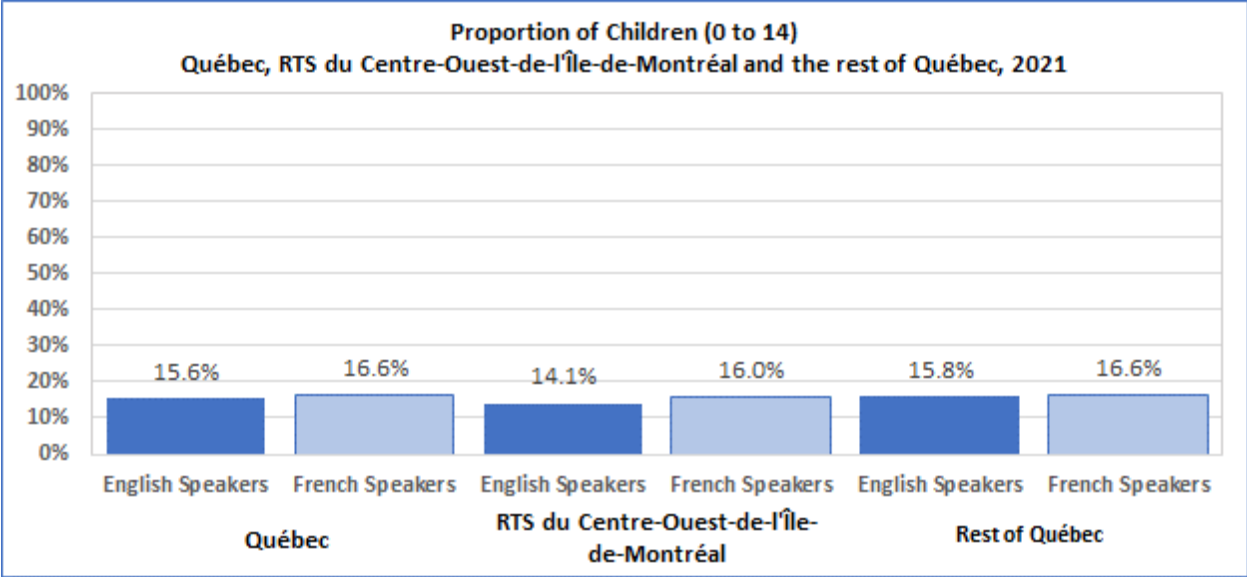

Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires attention to the problems that are pressing for the minority and may be overlooked by focusing on the majority, and awareness of problems that are shared by both language groups but are being met with system solutions that are not equally accessible for both.

Table 2 - Age Structure of the Population

| Age Structure of the Population | Québec | | RTS du Centre-Ouest-de-l’Île-de-Montréal | | Rest of Québec | |
|---------------------------------|-----------|-----------|--|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total - Age groups | 1,253,580 | 7,074,330 | 203,360 | 141,520 | 1,050,220 | 6,932,810 |
| 0-14 years | 195,065 | 1,174,295 | 28,680 | 22,605 | 166,385 | 1,151,690 |
| 15-24 years | 160,090 | 726,400 | 30,970 | 24,140 | 129,120 | 702,260 |
| 25-44 years | 376,685 | 1,792,825 | 63,900 | 40,415 | 312,785 | 1,752,410 |
| 45-64 years | 328,055 | 1,924,990 | 44,730 | 31,445 | 283,325 | 1,893,545 |
| 65+ years | 193,685 | 1,455,820 | 35,080 | 22,915 | 158,605 | 1,432,905 |
| Total - Age groups | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| 0-14 years | 15.6% | 16.6% | 14.1% | 16.0% | 15.8% | 16.6% |
| 15-24 years | 12.8% | 10.3% | 15.2% | 17.1% | 12.3% | 10.1% |

⁵ Sanderson, D. (2020). Language Related Difficulties Experienced by Caregivers of English-Speaking Seniors in Quebec. *SAGE Open*, 10(3). <https://doi.org/10.1177/2158244020951261>

Children (aged 0-14)

- Across Québec, there were 195,065 English-speaking children aged 0-14, representing 15.6% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2021, there were 28,680 English-speaking children aged 0-14 living in RTS du Centre-Ouest-de-l'Île-de-Montréal where they account for 14.1% of the population. The proportion of children in the regional English-speaking population is lower than their proportion in the regional French-speaking majority population. This proportion is lower than the level for English-speaking children across the province.
- In the rest of Québec, we find 166,385 English-speaking children aged 0-14 where they represent 15.8% of the population. This share is higher than that exhibited by English-speaking children across the RTS du Centre-Ouest-de-l'Île-de-Montréal region. The proportion of children in the territory's English-speaking population is similar to the share in the rest of Québec's French-speaking majority population.

Seniors (aged 65 and over)

- Across Québec, there were 193,685 English-speaking seniors aged 65+ representing 15.5% of the English-speaking population. The proportion of seniors in the English-speaking population is much lower than that found in the French-speaking majority population in Quebec.
- In 2021, there were 35,080 English-speaking seniors aged 65+ living in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they accounted for 17.3% of the population. This share is higher than that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is higher than the proportion in the French-speaking majority population.
- In the rest of Québec, we find 158,605 English-speaking seniors aged 65+ where they account for 15.1% of the population. This share is lower than that of English-speaking seniors across the RTS du Centre-Ouest-de-l'Île-de-Montréal region. The proportion of seniors in the English-speaking population is much lower than the proportion in the French-speaking majority population in the rest of Québec.

Income

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.⁶ For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution are linked to increases in social problems and poorer health status among the population as a whole.⁷

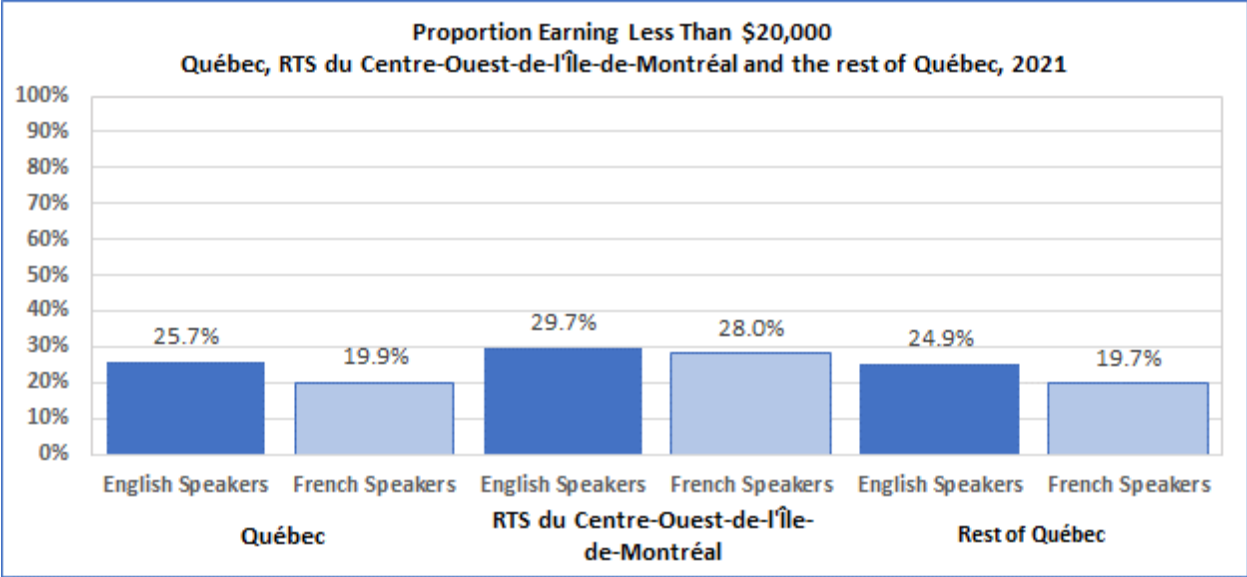

Table 3 - Income

| Population by Income Group | Québec | | RTS du Centre-Ouest-de-l'Île-de-Montréal | | Rest of Québec | |
|----------------------------|-----------|-----------|--|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total Population 15+ | 1,049,640 | 5,811,880 | 173,565 | 117,875 | 876,075 | 5,694,005 |
| Less than \$20,000 | 269,805 | 1,154,945 | 51,590 | 33,030 | 218,215 | 1,121,915 |
| \$20,000 - \$49,999 | 422,205 | 2,420,025 | 70,540 | 41,880 | 351,665 | 2,378,145 |
| \$50,000 + | 357,635 | 2,236,925 | 51,430 | 42,965 | 306,205 | 2,193,960 |
| Total Population 15+ | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| Less than \$20,000 | 25.7% | 19.9% | 29.7% | 28.0% | 24.9% | 19.7% |
| \$20,000 - \$49,999 | 40.2% | 41.6% | 40.6% | 35.5% | 40.1% | 41.8% |
| \$50,000 + | 34.1% | 38.5% | 29.6% | 36.4% | 35.0% | 38.5% |

Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample.

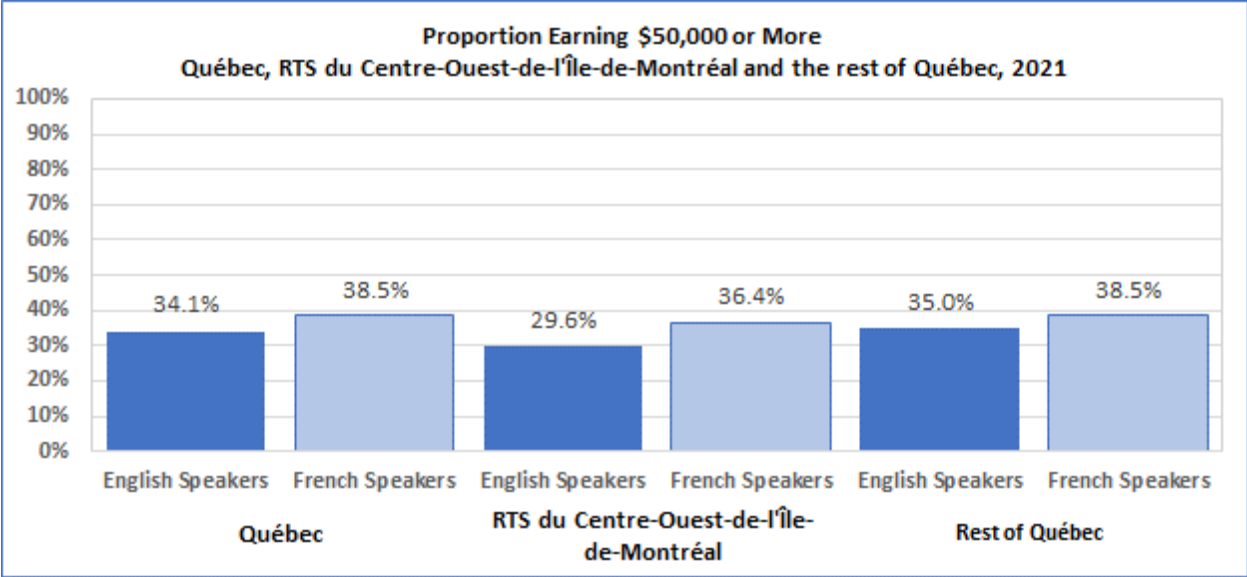

⁶ Public Health Agency of Canada, <http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence> accessed February 2023.

⁷ Ibid.

Income under \$20k

- Across Québec in 2021, there were 269,805 English speakers aged 15+ with income under \$20k. This group represents 25.7% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2021, there were 51,590 English speakers aged 15+ with income under \$20k in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they represent 29.7% of the English-speaking population aged 15 and over. This share is higher than that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is higher than the proportion in the French-speaking majority population.
- In the rest of Québec, we find 218,215 English speakers aged 15+ with income under \$20k where they account for 24.9% of the population. This share is lower than that experienced by English speakers across RTS du Centre-Ouest-de-l'Île-de-Montréal. The proportion of those with income under \$20k in the territory's English-speaking population is much higher than the proportion for the French-speaking majority population in the rest of Québec.

Earning \$50k and over

- Across Québec, there were 357,635 English speakers aged 15+ with a total income of \$50k or more, who represented 34.1% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2021, there were 51,430 English speakers aged 15+ with a total income of \$50k or more living in the RTS du Centre-Ouest-de-l'Île-de-Montréal region, where they represented 29.6% of the population. This proportion was lower than the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is lower than the share of high earners in the French-speaking majority population in the region.
- In the rest of Québec, we find 306,205 English-speaking high earners aged 15+, where they represent 35.% of the population. This share is higher than that experienced by English-speaking high earners across the RTS du Centre-Ouest-de-l'Île-de-Montréal region. The proportion of high earners in the territory's English-speaking population is lower than the proportion of high earners in the territory's French-speaking majority population.

Household Living Arrangements

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. Parents of minors living in lone-parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.⁸ Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to disability, illness or aging. COVID-19 pandemic uncovered the vulnerability of individuals living in low-income multi-generational households. The recent health crisis turned single households consisting of three or more generations into a high-risk factor for contagious infection.⁹

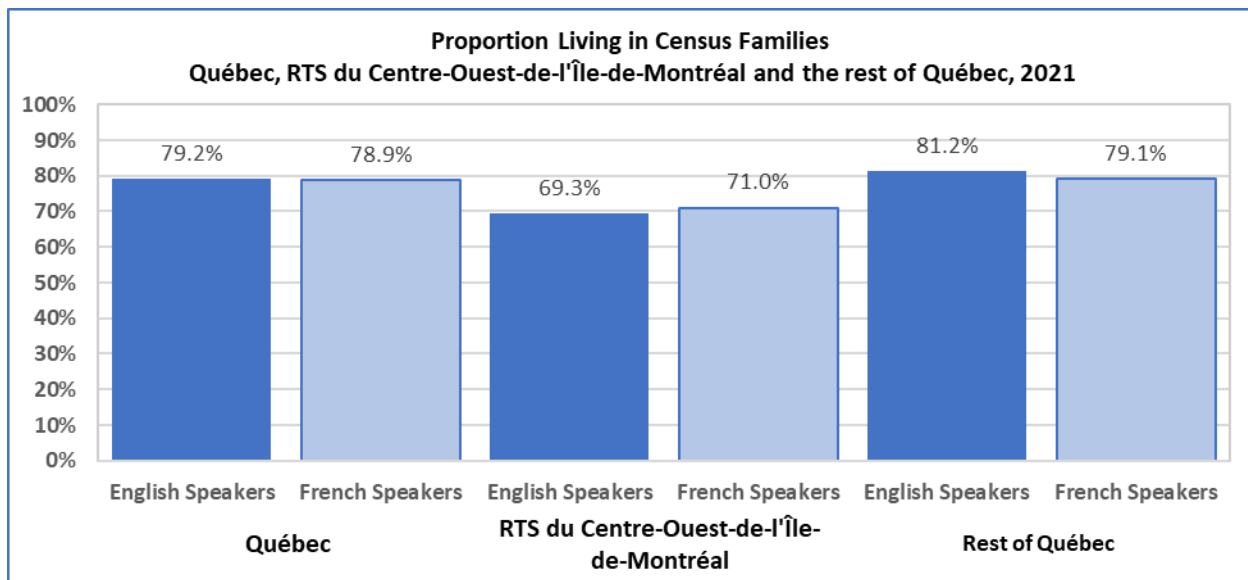

Table 4 - Population by Household Living Arrangements

| Population by Household Living Arrangements | Québec | | RTS du Centre- Ouest-de-l'Île-de- Montréal | | Rest of Québec | |
|--|-----------|-----------|--|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total - Household living arrangements | 1,244,440 | 6,985,640 | 202,265 | 140,530 | 1,042,175 | 6,845,110 |
| Total persons in census family households | 985,995 | 5,512,205 | 140,110 | 99,840 | 845,885 | 5,412,365 |
| Persons in two-parent households | 835,415 | 4,706,995 | 118,920 | 84,150 | 716,495 | 4,622,845 |
| Persons in single-parent households | 150,580 | 805,215 | 21,190 | 15,685 | 129,390 | 789,530 |

Living in census families¹⁰

- Across Québec, there were 985,995 English speakers living in census family households. This group represents 79.2% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2021, there were 140,110 English speakers living in census family households in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they comprise 69.3% of the population. This share is lower than that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population.
- In the rest of Québec, we find 845,885 English speakers living in census family households where they account for 81.2% of the population. This share is higher than that accounted for by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region. The proportion of persons living in census family households in the English-speaking population is similar to the proportion represented by the French-speaking majority population in the rest of Québec.

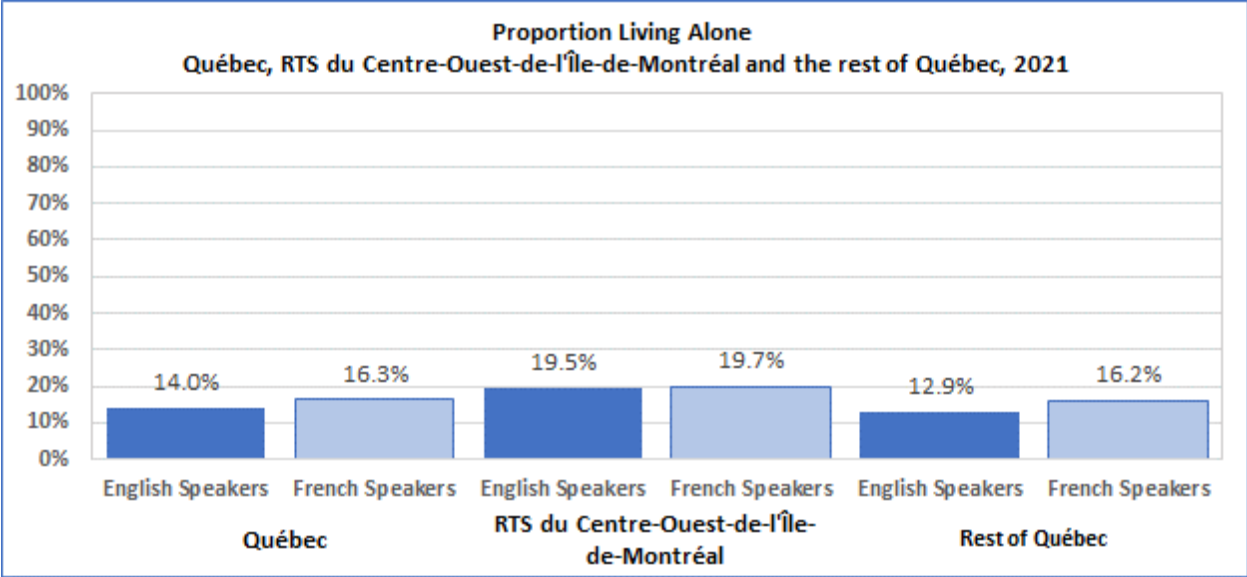

¹⁰According to Statistics Canada, a "Census family is defined as a married couple and the children, if any, of either and/or both spouses; a couple living common law and the children, if any, of either and/or both partners; or a parent of any marital status in a one-parent family with at least one child living in the same dwelling and that child or those children. All members of a particular census family live in the same dwelling. Children may be biological or adopted children regardless of their age or marital status as long as they live in the dwelling and do not have their own married spouse, common-law partner or child living in the dwelling. Grandchildren living with their grandparent(s) but with no parents present also constitute a census family."

Living in lone-parent families

- Across Québec, there were 150,580 English speakers living in lone-parent families. This group represents 12.1% of the English-speaking population. The proportion of English speakers living in lone-parent families is similar to the proportion found in the French-speaking majority population in Quebec.
- In 2021, there were 21,190 English speakers living in lone-parent families in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 10.5% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is lower than the proportion found in the regional French-speaking majority population. The proportion is lower than that found in the provincial English-speaking population.
- In the rest of Québec, we find 129,390 English speakers living in lone-parent families where they represent 12.4% of the population. This is higher than the proportion represented by the French-speaking majority population in the rest of Québec. The proportion of English speakers living in lone-parent families in the rest of Québec is higher than the proportion we find for English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Living alone

- Across Québec, there were 173,695 English speakers living alone. This group represents 14.0% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Quebec.
- In 2021, there were 39,515 English speakers living alone in the RTS du Centre-Ouest-de-l'Île-de-Montréal region, where they account for 19.5% of the population. This level is much higher than that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is similar to the proportion found in the regional French-speaking majority population.
- In the rest of Québec we find 134,180 English speakers living alone, where they represent 12.9% of the population. This share is much lower than that exhibited by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region. The proportion of those living alone in the territory's English-speaking population is much lower than the proportion exhibited by the French-speaking majority population in the rest of Québec.

Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in “straitened circumstances.”¹¹ The following tables consider the population living below LICO by language, administrative territory and age group.

Table 5 - Population Living Below LICO, Within Age Groups

| Population Living Below the Low-Income Cut-off (LICO), Across Age Groups | Québec | | RTS du Centre-Ouest-de-l'Île-de-Montréal | | Rest of Québec | |
|--|---------|---------|--|--------|----------------|---------|
| | English | French | English | French | English | French |
| Total - Age groups | 148,545 | 491,540 | 42,900 | 25,470 | 105,645 | 466,070 |
| 0-14 years | 16,915 | 56,870 | 3,490 | 2,880 | 13,425 | 53,990 |
| 15-24 years | 30,265 | 65,630 | 12,020 | 8,565 | 18,245 | 57,065 |
| 25-44 years | 44,260 | 105,500 | 14,050 | 6,480 | 30,210 | 99,020 |
| 45-64 years | 32,270 | 136,215 | 6,990 | 3,720 | 25,280 | 132,495 |

Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample. The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in 'Table 2 - Age Structure of the Population' of this document.

¹¹ For an explanation of how Statistics Canada calculates low income cut-off (LICO) <https://www150.statcan.gc.ca/n1/pub/75f0002m/2012002/lico-sfr-eng.htm> accessed February 2023.

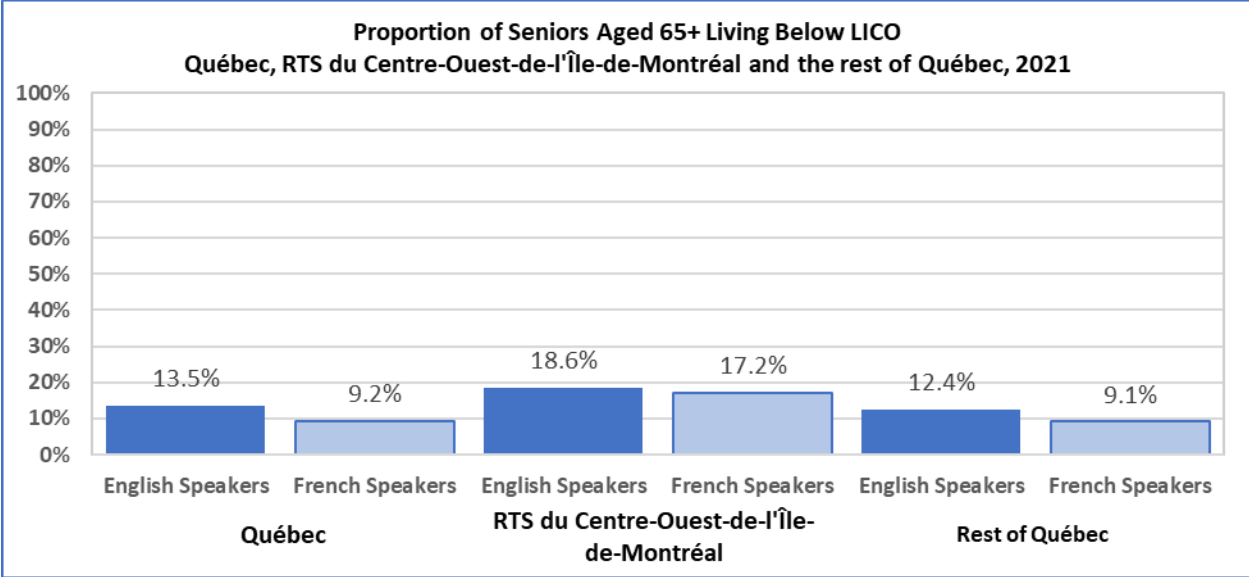

Population living below the low-income cut-off (LICO)

- Across Québec, there were 148,545 English speakers living below LICO. This group accounts for 12.1% of the English-speaking population. The proportion of English speakers living below LICO is much higher than the proportion in the French-speaking majority population in Quebec.
- In 2021, there were 42,900 English speakers living below LICO in the RTS du Centre-Ouest-de-l'Île-de-Montréal region, where they represent 21.2% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is higher than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in RTS du Centre-Ouest-de-l'Île-de-Montréal is much higher than the proportion for Quebec's English speakers in general.
- In the rest of Québec, we find 105,645 English speakers living below LICO, where they represent 10.3% of the English-speaking population. This level is much higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much lower than the proportion for English speakers across RTS du Centre-Ouest-de-l'Île-de-Montréal.

Children (0-14) living below the low-income cut-off (LICO)

- Across Québec, there were 16,915 English-speaking children living below LICO. This group represents 8.9% of the population of children. The proportion of English-speaking children living below LICO is much higher than the proportion found for children in the French-speaking majority population in Quebec.
- In 2021, there were 3,490 English-speaking children living below LICO in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 12.2% of the children in the regional English-speaking population. The proportion of children living below LICO in the regional English-speaking population is similar to the proportion in the regional French-speaking majority children's population. This proportion is much higher than that displayed by English-speaking children across the province.
- In the rest of Québec, we find 13,425 English-speaking children living below LICO where they represent 8.4% of the English-speaking children's population. This proportion is much higher than the proportion experienced by children in the French-speaking majority in the same territory. The proportion of children living below LICO in the territory's English-speaking population is much lower than the proportion experienced by English-speaking children across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Seniors (65+) living below the low-income cut-off (LICO)

- Across Québec, there were 24,845 English-speaking seniors living below LICO. This group represents 13.5% of the English-speaking senior population. The proportion of English-speaking seniors living below LICO is much higher than the proportion of seniors living below LICO in the French-speaking majority population in Quebec.
- In 2021, there were 6,355 English-speaking seniors living below LICO in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 18.6% of the regional English-speaking senior population. The proportion of those seniors living below LICO in the regional English-speaking senior population is higher than the proportion in the regional French-speaking majority senior population. This proportion is much higher than that experienced by English-speaking seniors across the province.
- In the rest of Québec, we find 18,490 English-speaking seniors living below LICO where they represent 12.4% of the English-speaking senior population. This is much higher than the proportion experienced by the French-speaking majority senior population living below LICO in the same territory. The proportion of seniors living below LICO in the territory's English-speaking population is much lower than the level displayed by English-speaking seniors across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Table 6 - Population Living Below LICO, by Household Living Arrangements

| Population Living Below the Low-Income Cut-off Level, by Household Living Arrangements | Québec | | RTS du Centre-Ouest-de-l'Île-de-Montréal | | Rest of Québec | |
|--|---------|---------|--|--------|----------------|---------|
| | English | French | English | French | English | French |
| Total - Household living arrangements | 148,545 | 491,540 | 42,900 | 25,470 | 105,645 | 466,070 |

| Living with non-relatives only | 53.4% | 34.7% | 65.3% | 59.6% | 48.1% | 33.7% |
| Living alone | 30.1% | 21.7% | 39.5% | 35.6% | 27.3% | 21.3% |
| Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document. | | | | | | |

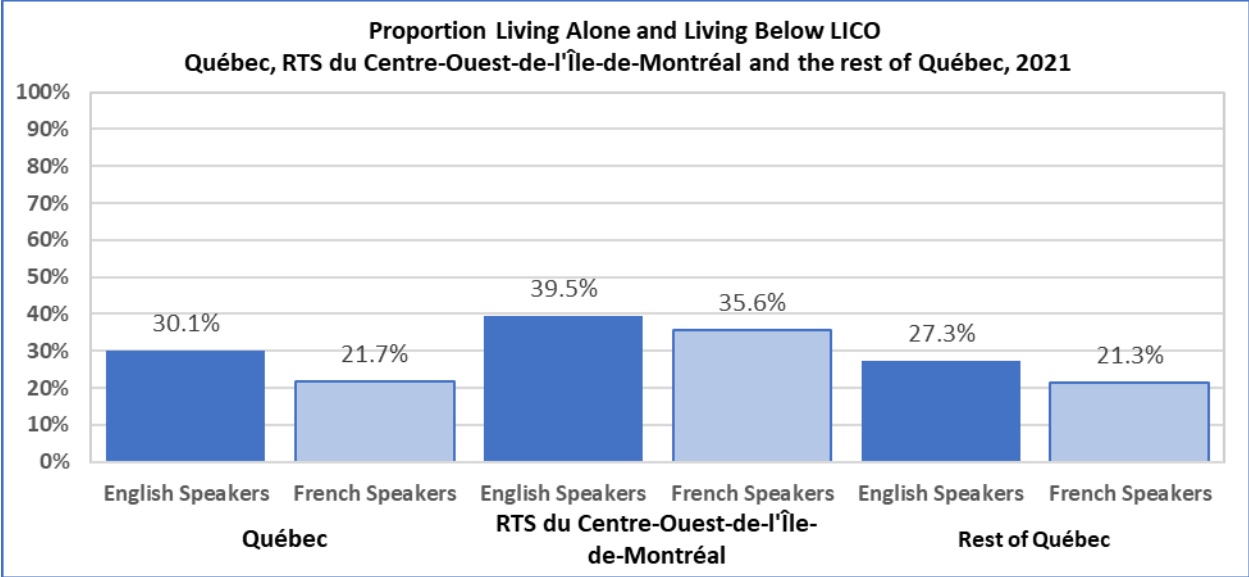

Persons in census family households living below the low-income cut-off (LICO)

- Across Québec, there were 63,075 English-speaking persons in census family households living below LICO. This group represents 6.5% of the English-speaking population in census family households. The proportion of English-speaking persons in census family households living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living below LICO in census family households.
- In 2021, there were 14,795 English-speaking persons in census family households living below LICO in the RTS du Centre-Ouest-de-l'Île-de-Montréal region, where they represent 10.6% of the regional English-speaking population. The proportion of persons in census family households living below LICO in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. The proportion in the regional English-speaking population is much higher than that found in the provincial English-speaking population.
- In the rest of Québec, we find 48,280 English-speaking persons in census family households living below LICO, where they account for 5.8% of the English-speaking population. This level is much higher than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is much lower than the proportion found in the English-speaking population of the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Persons in lone-parent families living below the low-income cut-off (LICO)

- Across Québec, there were 21,935 English-speaking persons in lone-parent families living below LICO. This group represents 15.1% of the English-speaking population living in lone-parent families. The proportion of English-speaking persons in lone-parent families living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living in lone-parent families.
- In 2021, there were 4,530 English-speaking persons in lone-parent families living below LICO in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 21.4% of the regional English-speaking lone-parent family population. The proportion of persons in lone-parent families living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The level for the English-speaking regional population is much higher than that found in the provincial English-speaking population.
- In the rest of Québec, we find 17,405 English-speaking persons in lone-parent families living below LICO where they account for 14.0% of the English-speaking lone-parent family population. This is much higher than the proportion experienced by the French-speaking majority lone-parent family population in the same territory. The proportion of persons in lone-parent families living below LICO in the territory's English-speaking population is much lower than the proportion experienced by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Persons living alone and below the low-income cut-off (LICO)

- Across Québec, there were 52,090 English-speaking persons living alone and below LICO. This group represents 30.1% of the English-speaking population living alone. The proportion of English-speaking persons living alone and below LICO is much higher than that found in the French-speaking majority population in Quebec living alone.
- In 2021, there were 15,610 English-speaking persons living alone and below LICO in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 39.5% of the regional English-speaking population living alone. The proportion of those persons living alone and below LICO in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much higher than that experienced by the provincial English-speaking population.
- In the rest of Québec, we find 36,480 English-speaking persons living alone and below LICO where they represent 27.3% of the English-speaking population living alone. This is much higher than the proportion experienced by the French-speaking majority population living alone in the same territory. The proportion of those persons living alone and below LICO in the territory's English-speaking population is much lower than the proportion experienced by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Highest Educational Attainment

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members¹². A case in point, Genereux's study of the psychosocial impact of the COVID-19 pandemic upon Québec communities demonstrates that key protective factors such as a sense of coherence are linked to levels of education.¹³

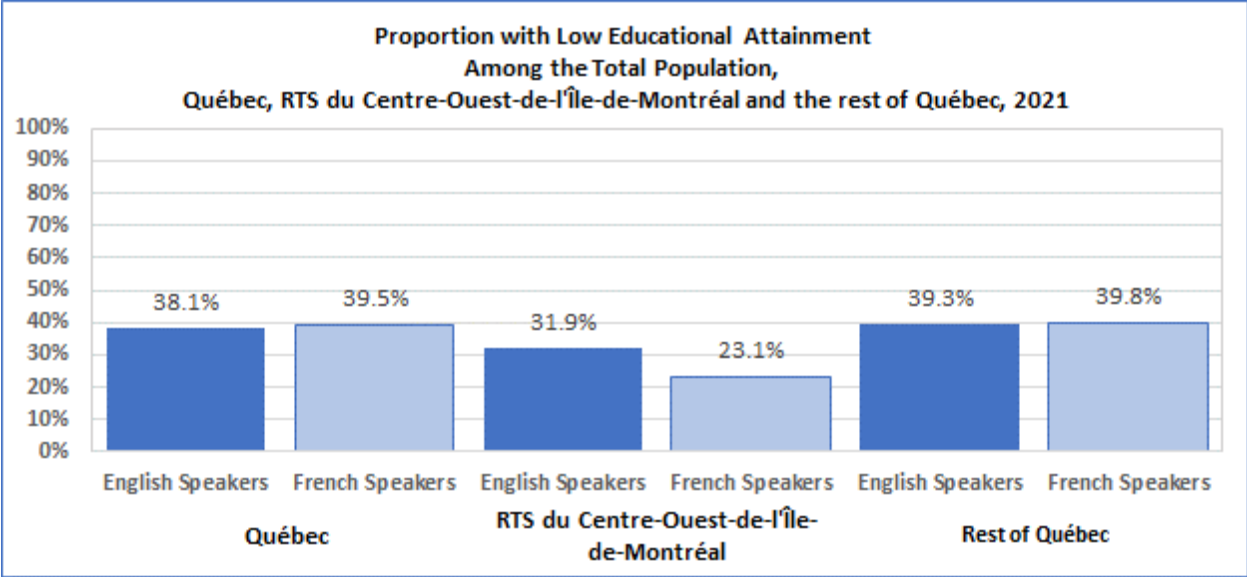

¹²For further discussion of education as a health determinant see Raphael, D., Bryant, T., Mikkonen, J. and Raphael, A. (2020). *Social Determinants of Health: The Canadian Facts*. (2nd edition) / *Déterminants sociaux de la santé : les réalités canadiennes*, (2e édition). Population aged 15+, high school diploma or less

- Across Québec, there were 399,730 English speakers aged 15 and over with a high school diploma or less. This group accounts for 38.1% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Québec.
- In 2021, there were 55,410 English speakers aged 15 and over with a high school diploma or less in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 31.9% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is lower than that exhibited by English speakers across the province.
- In the rest of Québec, we find 344,320 English speakers aged 15 and over with a high school diploma or less where they represent 39.3% of the English-speaking population aged 15 and over. This level is similar to the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is much higher than the proportion exhibited by the English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Population 25-44, high school diploma or less

- Across Québec, there were 90,820 English speakers aged 25-44 with a high school diploma or less. This group represents 24.1% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2021, there were 12,060 English speakers aged 25-44 with a high school diploma or less in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 18.8% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population in that age group. This proportion is much lower than that exhibited by English speakers across the province in the same age cohort.
- In the rest of Québec, we find 78,760 English speakers aged 25-44 with a high school diploma or less where they comprise 25.2% of the English-speaking 25-44 cohort. This is higher than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Population 45-64, high school diploma or less

- In Québec in 2021, there were 112,980 English-speaking aged 45-64 with a high school diploma or less. This group represents 34.4% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Québec.
- In 2021, there were 12,180 English speakers aged 45-64 with a high school diploma or less in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 27.3% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that exhibited by the province's English speakers.
- In the rest of Québec, we find 100,800 English speakers aged 45-64 with a high school diploma or less where they comprise 35.6% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the region.

Population aged 15+, university degree or higher

- In Québec in 2021, there were 353,815 English-speaking aged 15 and over with a university degree or higher. This group represents 33.7% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2021, there were 80,920 English speakers aged 15 and over with a university degree or higher in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they account for 46.6% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 272,895 English speakers aged 15 and over with a university degree or higher where they represent 31.1% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

Population 25-44, university degree or higher

- In Québec in 2021, there were 179,675 English speakers aged 25-44 with a university degree or higher. This group accounts for 47.6% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2021, there were 39,335 English speakers aged 25-44 with a university degree or higher in the RTS du Centre-Ouest-de-l'Île-de-Montréal where they represent 61.4% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 140,340 English speakers aged 25-44 with a university degree or higher where they comprise 44.8% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

Population 45-64, university degree or higher

- In Québec in 2021, there were 109,275 English speakers aged 45-64 with a university degree or higher. This group represents 33.3% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 21,615 English speakers aged 45-64 with a university degree or higher in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they represent 48.4% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is much lower than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much higher than that exhibited by the province's English speakers.
- In the rest of Québec, we find 87,660 English speakers aged 45-64 with a university degree or higher where they comprise 30.9% of the English-speaking population. This level is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

Labour Force Activity

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.¹⁴

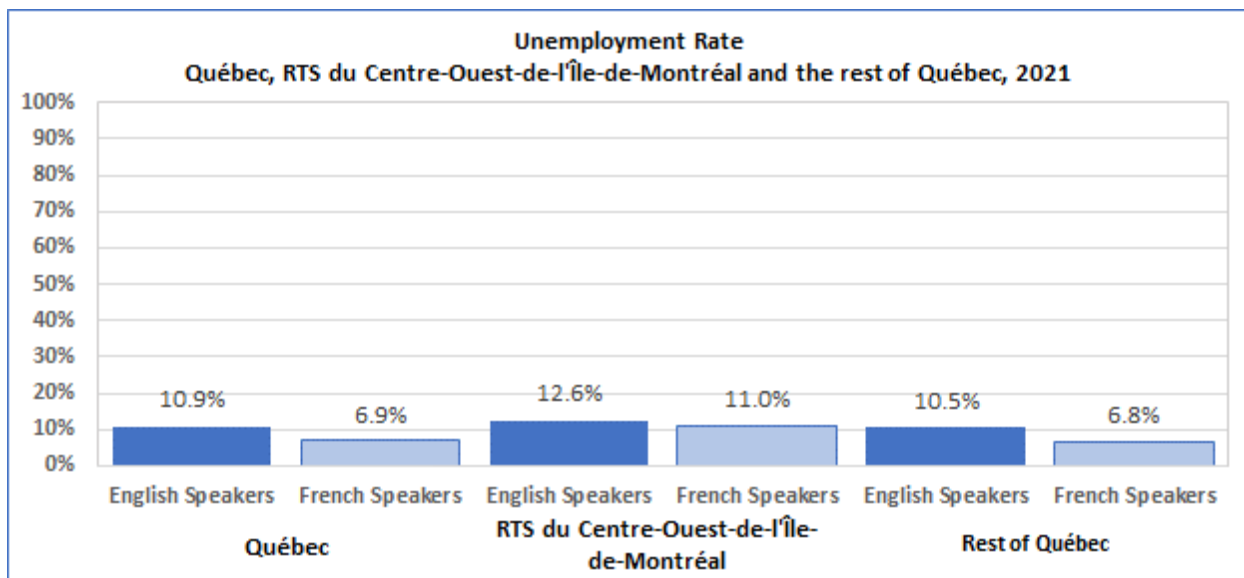

Table 8 - Labour Force Activity

| Total Population by Labour Force Activity | Québec | | RTS du Centre- Ouest-de-l'Île-de- Montréal | | Rest of Québec | |
|--|-----------|-----------|--|---------|----------------|-----------|
| | English | French | English | French | English | French |
| Total - Labour force activity | 1,049,640 | 5,811,880 | 173,565 | 117,875 | 876,075 | 5,694,005 |
| In the labour force | 699,015 | 3,721,255 | 111,170 | 77,440 | 587,845 | 3,643,815 |
| Employed | 623,105 | 3,465,265 | 97,190 | 68,945 | 525,915 | 3,396,320 |
| Unemployed | 75,910 | 255,990 | 13,985 | 8,495 | 61,925 | 247,495 |
| Out of the labour force | 350,625 | 2,090,630 | 62,395 | 40,425 | 288,230 | 2,050,205 |
| Total - Labour force activity | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% | 100.0% |
| In the labour force | 66.6% | 64.0% | 64.1% | 65.7% | 67.1% | 64.0% |
| Employed | 89.1% | 93.1% | 87.4% | 89.0% | 89.5% | 93.2% |
| Unemployed | 10.9% | 6.9% | 12.6% | 11.0% | 10.5% | 6.8% |
| Out of the labour force | 33.4% | 36.0% | 35.9% | 34.3% | 32.9% | 36.0% |

Unemployed

- Across Québec in 2021, there were 75,910 English speakers who were unemployed resulting in an unemployment rate of 10.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2021, there were 13,985 unemployed English speakers in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they experienced an unemployment rate of 12.6%. The unemployment rate of the regional English-speaking population was higher than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was higher than that experienced by the provincial English-speaking population.
- In the rest of Québec, we find 61,925 unemployed English speakers resulting in an unemployment rate of 10.5%. This is much higher than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is lower than the unemployment rate experienced by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

Out of the labour force¹⁵

- Across Québec in 2021, there were 350,625 English speakers out of the labour force in 2016. This group represents 33.4% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is lower than that found in the French-speaking majority population in Quebec aged 15 and over.
- In 2021, there were 62,395 English speakers out of the labour force in the RTS du Centre-Ouest-de-l'Île-de-Montréal region where they comprise 35.9% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is higher than that exhibited by the provincial English-speaking population.
- In the rest of Québec, we find 288,230 English speakers out of the labour force where they account for 32.9% of the English-speaking population. This is lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the RTS du Centre-Ouest-de-l'Île-de-Montréal region.

¹⁵The Statistics Canada category “[out of the labour force](http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf)” refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an “off” season who were not looking for work because of a long-term illness or disability.
