## Introduction

### ***About the 2022-2023 Report Series***

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI)<sup>1</sup>. The information presented is drawn from the 2021 Census of Canada and organized by province, region and MRC or their equivalent territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Québec's official language minority community.

### ***Baseline Data Report Series***

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region.

A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix "B".

### **Determinants of Health**

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.<sup>2</sup>

### **Language Barriers**

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and

## **Methodological Notes**

### **Data Source**

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2021 Census of Canada. The statistics are drawn from two different Statistics Canada data sources which vary according (1) to the definition of the population surveyed and (2) by the questionnaire that was administered.

The statistics for table 1 (Population Size) and table 2 (Age Structure) and the accompanying graphs are based on a 100% sample of Canadians including people in non-institutional collective dwellings. These individuals answered Statistics Canada's 2021 short form census questionnaire.

The statistics for all other tables and accompanying graphs are based on a 25% sample of Canadians living in private households. This sample excludes individuals in institutions and non-institutional collective dwellings. These individuals answered Statistics Canada's 2021 long form questionnaire.

The short form census questionnaire reaches a larger population, but the long form census is the primary source of exhaustive demographic data in Canada. Without the long form, the socio-demographic characteristics provided by tables 3 through 8 of this BDR report would not be attainable.

## **Linguistic definitions**

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the [First Official Language Spoken](#) (FOLS) definition with multiple responses proportionally distributed among declared languages since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three Census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include [Mother tongue](#) which refers to the first language learned at home in childhood and still understood. The [language most often spoken at home](#) is used to designate the home language. [Knowledge of official languages](#) indicates the official language in which a person can carry on a conversation. The [language used most often at work](#) indicates the language spoken most frequently at work.

## **Geographic Regions**

The 2022-2023 Baseline Data Report consists of a series of stand-alone documents which present key data for the MRC or equivalent territories in Québec in which there are at least 250 English-speaking residents.

## **Demographic and Socio-economic Characteristics**

The demographic and socio-economic variables addressed in the 2022-2023 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)

- Educational attainment
- Labour force activity

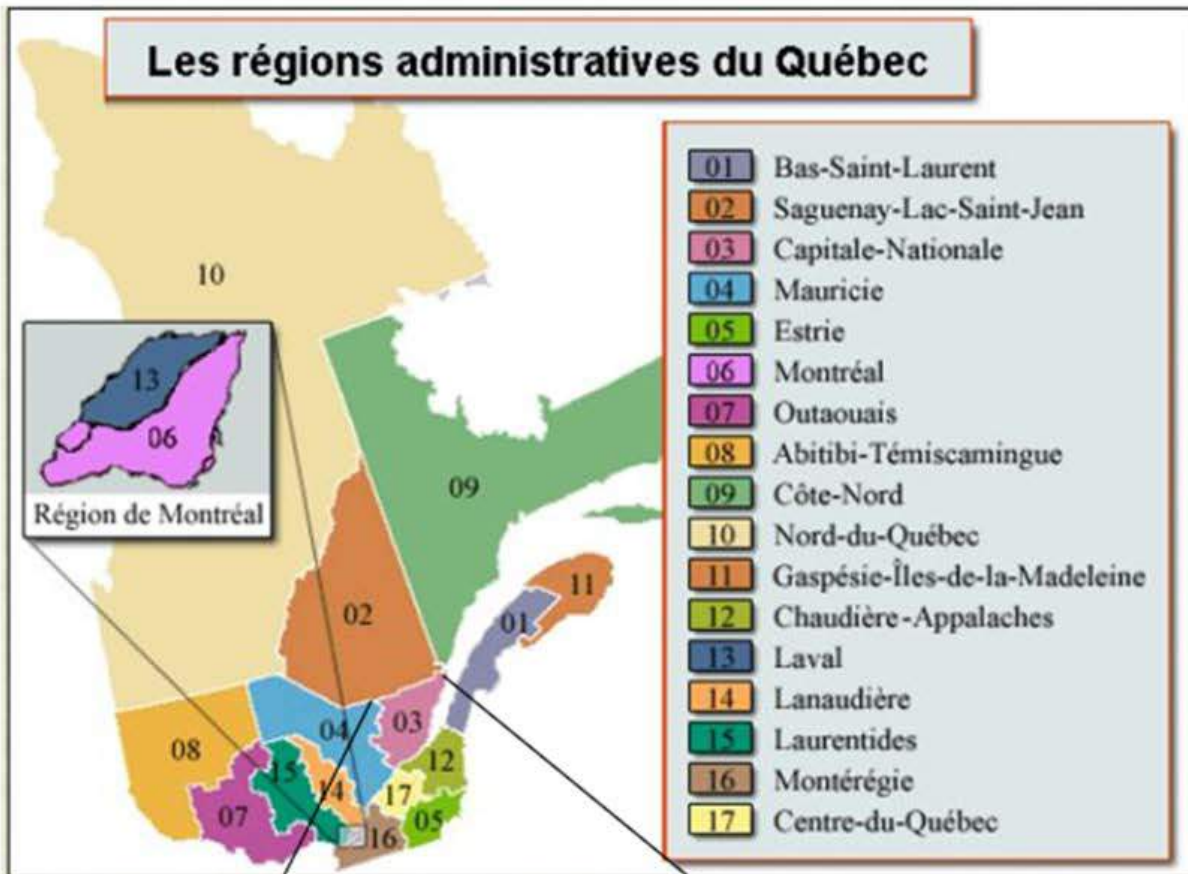

### **Statistics Canada Definitions**

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2021 Census may also be consulted.<sup>3</sup>

## Demographic Size

Québec’s English speakers form one of Canada’s official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users’ satisfaction with the services received.<sup>4</sup> In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

**Table 1 - Population Size**

Size of Population		Québec	Capitale-Nationale	MRC La Jacques-Cartier
English speakers	number	1,253,580	17,565	1,495
	percentage	14.9%	2.3%	3.1%
French speakers	number	7,074,330	728,220	46,295
	percentage	84.1%	97.4%	96.8%
Total population	number	8,406,905	748,030	47,815
	percentage	100.0%	100.0%	100.0%

<sup>4</sup> See Bowen, S. (2001). *Language Barriers in Access to Health Care*, Ottawa: Health Canada. Also, Bowen, S. et al. (2010).” From ‘multicultural health’ to ‘knowledge translation’ – rethinking strategies to promote language access within a risk management framework”. *The Journal of Specialized Translation (Jostrans)*, Issue 14, [http://www.jostrans.org/issue14/art\\_bowen.php](http://www.jostrans.org/issue14/art_bowen.php).

- Across Québec, there were 1,253,580 English speakers, representing 14.9% of the provincial population.
- In 2021, there were 17,565 English speakers living in the Capitale-Nationale region where they represented 2.3% of the population. This share is much lower than the overall provincial share for English speakers.
- In MRC La Jacques-Cartier, we find 1,495 English speakers where they represented 3.1% of the population. This proportion is much higher than that represented by English speakers across the Capitale-Nationale territory.

## Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. From Sanderson’s study we learn that the types of issues experienced by Quebec’s English-speaking seniors and their caregivers in accessing services differ from those of English speakers younger in age.<sup>5</sup>

Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires attention to the problems that are pressing for the minority and may be overlooked by focusing on the majority, and awareness of problems that are shared by both language groups but are being met with system solutions that are not equally accessible for both.

**Table 2 - Age Structure of the Population**

Age Structure of the Population	Québec		Capitale-Nationale		MRC La Jacques-Cartier	
	English	French	English	French	English	French
Total - Age groups	1,253,580	7,074,330	17,565	728,220	1,495	46,295
0-14 years	195,065	1,174,295	2,360	114,345	255	10,930
15-24 years	160,090	726,400	2,035	72,635	180	4,325
25-44 years	376,685	1,792,825	6,390	191,635	455	14,315
45-64 years	328,055	1,924,990	4,130	190,155	385	11,690
65+ years	193,685	1,455,820	2,645	159,445	220	5,035
Total - Age groups	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
0-14 years	15.6%	16.6%	13.4%	15.7%	17.1%	23.6%
15-24 years	12.8%	10.3%	11.6%	10.0%	12.0%	9.3%
25-44 years	30.0%	25.3%	36.4%	26.3%	30.4%	30.9%
45-64 years	26.2%	27.2%	23.5%	26.1%	25.8%	25.3%
65+ years	15.5%	20.6%	15.1%	21.9%	14.7%	10.9%

<sup>5</sup> Sanderson, D. (2020). Language Related Difficulties Experienced by Caregivers of English-Speaking Seniors in Quebec. *SAGE Open*, 10(3). <https://doi.org/10.1177/2158244020951261>

**Children (aged 0-14)**

- Across Québec, there were 195,065 English-speaking children aged 0-14, representing 15.6% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2021, there were 2,360 English-speaking children aged 0-14 living in Capitale-Nationale where they account for 13.4% of the population. The proportion of children in the regional English-speaking population is lower than their proportion in the regional French-speaking majority population. This proportion is lower than the level for English-speaking children across the province.
- In MRC La Jacques-Cartier, we find 255 English-speaking children aged 0-14 where they represent 17.1% of the population. This share is much higher than that exhibited by English-speaking children across the Capitale-Nationale region. The proportion of children in the territory's English-speaking population is much lower than the share in the rest of Québec's French-speaking majority population.

### Seniors (aged 65 and over)

- Across Québec, there were 193,685 English-speaking seniors aged 65+ representing 15.5% of the English-speaking population. The proportion of seniors in the English-speaking population is much lower than that found in the French-speaking majority population in Quebec.
- In 2021, there were 2,645 English-speaking seniors aged 65+ living in the Capitale-Nationale region where they accounted for 15.1% of the population. This share is similar to that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is much lower than the proportion in the French-speaking majority population.
- In MRC La Jacques-Cartier, we find 220 English-speaking seniors aged 65+ where they account for 14.7% of the population. This share is similar to that of English-speaking seniors across the Capitale-Nationale region. The proportion of seniors in the English-speaking population is much higher than the proportion in the French-speaking majority population in MRC La Jacques-Cartier.

## Income

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.<sup>6</sup> For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution are linked to increases in social problems and poorer health status among the population as a whole.<sup>7</sup>

**Table 3 - Income**

Population by Income Group	Québec		Capitale-Nationale		MRC La Jacques-Cartier	
	English	French	English	French	English	French
Total Population 15+	1,049,640	5,811,880	15,065	603,135	1,235	34,845
Less than \$20,000	269,805	1,154,945	3,635	101,285	230	4,910
\$20,000 - \$49,999	422,205	2,420,025	5,710	243,715	375	10,635
\$50,000 +	357,635	2,236,925	5,720	258,140	615	19,290
Total Population 15+	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Less than \$20,000	25.7%	19.9%	24.1%	16.8%	18.6%	14.1%
\$20,000 - \$49,999	40.2%	41.6%	37.9%	40.4%	30.4%	30.5%
\$50,000 +	34.1%	38.5%	38.0%	42.8%	49.8%	55.4%

*Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample.*

<sup>6</sup> Public Health Agency of Canada, <http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence> accessed February 2023.

<sup>7</sup> Ibid.

**Income under \$20k**

- Across Québec in 2021, there were 269,805 English speakers aged 15+ with income under \$20k. This group represents 25.7% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2021, there were 3,635 English speakers aged 15+ with income under \$20k in the Capitale-Nationale region where they represent 24.1% of the English-speaking population aged 15 and over. This share is lower than that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is much higher than the proportion in the French-speaking majority population.
- In MRC La Jacques-Cartier, we find 230 English speakers aged 15+ with income under \$20k where they account for 18.6% of the population. This share is much lower than that experienced by English speakers across Capitale-Nationale. The proportion of those with income under \$20k in the territory's English-speaking population is much higher than the proportion for the French-speaking majority population in MRC La Jacques-Cartier.

**Earning \$50k and over**

- Across Québec, there were 357,635 English speakers aged 15+ with a total income of \$50k or more, who represented 34.1% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2021, there were 5,720 English speakers aged 15+ with a total income of \$50k or more living in the Capitale-Nationale region, where they represented 38.% of the population. This proportion was higher than the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is lower than the share of high earners in the French-speaking majority population in the region.
- In MRC La Jacques-Cartier, we find 615 English-speaking high earners aged 15+, where they represent 49.8% of the population. This share is much higher than that experienced by English-speaking high earners across the Capitale-Nationale region. The proportion of high earners in the territory's English-speaking population is lower than the proportion of high earners in the territory's French-speaking majority population.

## Household Living Arrangements

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. Parents of minors living in lone-parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements.<sup>8</sup> Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to disability, illness or aging. COVID-19 pandemic uncovered the vulnerability of individuals living in low-income multi-generational households. The recent health crisis turned single households consisting of three or more generations into a high-risk factor for contagious infection.<sup>9</sup>

**Table 4 - Population by Household Living Arrangements**

Population by Household Living Arrangements	Québec		Capitale-Nationale		MRC La Jacques-Cartier	
	English	French	English	French	English	French
Total - Household living arrangements	1,244,440	6,985,640	17,375	717,370	1,490	45,745
Total persons in census family households	985,995	5,512,205	13,040	552,050	1,235	40,935
Persons in two-parent households	835,415	4,706,995	11,550	482,380	1,085	37,275
Persons in single-parent households	150,580	805,215	1,485	69,670	150	3,655
Total persons in non-census family households	258,445	1,473,435	4,330	165,315	245	4,805
Living with relatives	28,935	127,905	220	10,160	-	460
Living with non-relatives only	55,820	209,445	950	21,995	65	625
Living alone	173,695	1,136,085	3,170	133,170	170	3,720
Total - Household living arrangements	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
Total persons in census family households	79.2%	78.9%	75.1%	77.0%	82.9%	89.5%
Persons in two-parent households	67.1%	67.4%	66.5%	67.2%	72.8%	81.5%
Persons in single-parent households	12.1%	11.5%	8.5%	9.7%	10.1%	8.0%
Total persons in non-census family households	20.8%	21.1%	24.9%	23.0%	16.4%	10.5%
Living with relatives	2.3%	1.8%	1.3%	1.4%	-	1.0%
Living with non-relatives only	4.5%	3.0%	5.5%	3.1%	4.4%	1.4%
Living alone	14.0%	16.3%	18.2%	18.6%	11.4%	8.1%

<sup>8</sup> For discussion of the survey, see Pocock, J. (2008) "Baseline Data Report 2007-2008. Quebec's Social and Health Survey Information." Community Health and Social Services Network (CHSSN). [www.chssn.org](http://www.chssn.org)

<sup>9</sup> Yang, F. and Aitken, N. (2021). People living in apartments and larger households were at higher risk of dying from COVID-19 during the first wave of the pandemic. Statistics Canada. <https://www150.statcan.gc.ca/n1/pub/45-28-0001/2021001/article/00004-eng.htm> accessed February 2023.

### Living in census families<sup>10</sup>

- Across Québec, there were 985,995 English speakers living in census family households. This group represents 79.2% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2021, there were 13,040 English speakers living in census family households in the Capitale-Nationale region where they comprise 75.1% of the population. This share is lower than that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population.
- In MRC La Jacques-Cartier, we find 1,235 English speakers living in census family households where they account for 82.9% of the population. This share is higher than that accounted for by English speakers across the Capitale-Nationale region. The proportion of persons living in census family households in the English-speaking population is lower than the proportion represented by the French-speaking majority population in MRC La Jacques-Cartier.

<sup>10</sup>According to Statistics Canada, a "Census family is defined as a married couple and the children, if any, of either and/or both spouses; a couple living common law and the children, if any, of either and/or both partners; or a parent of any marital status in a one-parent family with at least one child living in the same dwelling and that child or those children. All members of a particular census family live in the same dwelling. Children may be biological or adopted children regardless of their age or marital status as long as they live in the dwelling and do not have their own married spouse, common-law partner or child living in the dwelling. Grandchildren living with their grandparent(s) but with no parents present also constitute a census family."

<https://www23.statcan.gc.ca/imdb/p3Var.pl?Function=Unit&Id=32746> accessed February 2023.

**Living in lone-parent families**

- Across Québec, there were 150,580 English speakers living in lone-parent families. This group represents 12.1% of the English-speaking population. The proportion of English speakers living in lone-parent families is similar to the proportion found in the French-speaking majority population in Quebec.
- In 2021, there were 1,485 English speakers living in lone-parent families in the Capitale-Nationale region where they account for 8.5% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is lower than the proportion found in the regional French-speaking majority population. The proportion is much lower than that found in the provincial English-speaking population.
- In MRC La Jacques-Cartier, we find 150 English speakers living in lone-parent families where they represent 10.1% of the population. This is much higher than the proportion represented by the French-speaking majority population in MRC La Jacques-Cartier. The proportion of English speakers living in lone-parent families in MRC La Jacques-Cartier is higher than the proportion we find for English speakers across the Capitale-Nationale region.

**Living alone**

- Across Québec, there were 173,695 English speakers living alone. This group represents 14.0% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Quebec.
- In 2021, there were 3,170 English speakers living alone in the Capitale-Nationale region, where they account for 18.2% of the population. This level is much higher than that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is similar to the proportion found in the regional French-speaking majority population.
- In MRC La Jacques-Cartier we find 170 English speakers living alone, where they represent 11.4% of the population. This share is much lower than that exhibited by English speakers across the Capitale-Nationale region. The proportion of those living alone in the territory's English-speaking population is much higher than the proportion exhibited by the French-speaking majority population in MRC La Jacques-Cartier.

## Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the “poverty line”, LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in “straitened circumstances.”<sup>11</sup> The following tables consider the population living below LICO by language, administrative territory and age group.

**Table 5 - Population Living Below LICO, Within Age Groups**

Population Living Below the Low-Income Cut-off (LICO), Across Age Groups	Québec		Capitale-Nationale		MRC La Jacques-Cartier	
	English	French	English	French	English	French
Total - Age groups	148,545	491,540	2,085	52,330	25	575
0-14 years	16,915	56,870	140	4,285	-	95
15-24 years	30,265	65,630	365	7,605	-	20
25-44 years	44,260	105,500	890	10,765	-	140
45-64 years	32,270	136,215	445	12,620	-	230
65+ years	24,845	127,330	260	17,060	-	95
<b>Proportion of those below LICO across age groups</b>						
Total - Age groups	12.1%	7.1%	12.0%	7.3%	1.7%	1.3%
0-14 years	8.9%	4.9%	6.1%	3.8%	-	0.9%
15-24 years	19.4%	9.1%	17.3%	10.7%	-	0.5%
25-44 years	11.9%	5.9%	13.6%	5.7%	-	1.0%
45-64 years	10.0%	7.1%	11.1%	6.7%	-	2.0%
65+ years	13.5%	9.2%	10.9%	11.3%	-	1.9%

*Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample. The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in 'Table 2 - Age Structure of the Population' of this document.*

<sup>11</sup> For an explanation of how Statistics Canada calculates low income cut-off (LICO) <https://www150.statcan.gc.ca/n1/pub/75f0002m/2012002/lico-sfr-eng.htm> accessed February 2023.

**Population living below the low-income cut-off (LICO)**

- Across Québec, there were 148,545 English speakers living below LICO. This group accounts for 12.1% of the English-speaking population. The proportion of English speakers living below LICO is much higher than the proportion in the French-speaking majority population in Quebec.
- In 2021, there were 2,085 English speakers living below LICO in the Capitale-Nationale region, where they represent 12.0% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is much higher than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in Capitale-Nationale is similar to the proportion for Quebec's English speakers in general.
- In MRC La Jacques-Cartier, we find 25 English speakers living below LICO, where they represent 1.7% of the English-speaking population. This level is much higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much lower than the proportion for English speakers across Capitale-Nationale.

**Table 6 - Population Living Below LICO, by Household Living Arrangements**

The number of English speakers for this measure was too low to report.

## ***Highest Educational Attainment***

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members<sup>12</sup>. A case in point, Genereux's study of the psychosocial impact of the COVID-19 pandemic upon Québec communities demonstrates that key protective factors such as a sense of coherence are linked to levels of education.<sup>13</sup>

**Population aged 15+, high school diploma or less**

- Across Québec, there were 399,730 English speakers aged 15 and over with a high school diploma or less. This group accounts for 38.1% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Quebec.
- In 2021, there were 4,495 English speakers aged 15 and over with a high school diploma or less in the Capitale-Nationale region where they account for 29.8% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is much lower than that exhibited by English speakers across the province.
- In MRC La Jacques-Cartier, we find 490 English speakers aged 15 and over with a high school diploma or less where they represent 39.7% of the English-speaking population aged 15 and over. This level is much higher than the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is much higher than the proportion exhibited by the English speakers across the Capitale-Nationale region.

**Population 25-44, high school diploma or less**

- Across Québec, there were 90,820 English speakers aged 25-44 with a high school diploma or less. This group represents 24.1% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2021, there were 1,105 English speakers aged 25-44 with a high school diploma or less in the Capitale-Nationale region where they account for 16.9% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population in that age group. This proportion is much lower than that exhibited by English speakers across the province in the same age cohort.
- In MRC La Jacques-Cartier, we find 150 English speakers aged 25-44 with a high school diploma or less where they comprise 28.6% of the English-speaking 25-44 cohort. This is much higher than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the Capitale-Nationale region.

**Population 45-64, high school diploma or less**

- In Québec in 2021, there were 112,980 English-speaking aged 45-64 with a high school diploma or less. This group represents 34.4% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 1,060 English speakers aged 45-64 with a high school diploma or less in the Capitale-Nationale region where they account for 26.3% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that exhibited by the province's English speakers.
- In MRC La Jacques-Cartier, we find 120 English speakers aged 45-64 with a high school diploma or less where they comprise 32.0% of the English-speaking population. This is higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the region.

### Population aged 15+, university degree or higher

- In Québec in 2021, there were 353,815 English-speaking aged 15 and over with a university degree or higher. This group represents 33.7% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2021, there were 6,380 English speakers aged 15 and over with a university degree or higher in the Capitale-Nationale region where they account for 42.3% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much higher than that exhibited by the province's English speakers.
- In MRC La Jacques-Cartier, we find 300 English speakers aged 15 and over with a university degree or higher where they represent 24.3% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

### Population 25-44, university degree or higher

- In Québec in 2021, there were 179,675 English speakers aged 25-44 with a university degree or higher. This group accounts for 47.6% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Québec.
- In 2021, there were 3,750 English speakers aged 25-44 with a university degree or higher in the Capitale-Nationale where they represent 57.4% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much higher than that exhibited by the province's English speakers.
- In MRC La Jacques-Cartier, we find 150 English speakers aged 25-44 with a university degree or higher where they comprise 28.6% of the English-speaking population. This is similar to the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

**Population 45-64, university degree or higher**

- In Québec in 2021, there were 109,275 English speakers aged 45-64 with a university degree or higher. This group represents 33.3% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 1,625 English speakers aged 45-64 with a university degree or higher in the Capitale-Nationale region where they represent 40.4% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much higher than that exhibited by the province's English speakers.
- In MRC La Jacques-Cartier, we find 80 English speakers aged 45-64 with a university degree or higher where they comprise 21.3% of the English-speaking population. This level is lower than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

## Labour Force Activity

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group.

Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.<sup>14</sup>

**Table 8 - Labour Force Activity**

Total Population by Labour Force Activity	Québec		Capitale-Nationale		MRC La Jacques-Cartier	
	English	French	English	French	English	French
Total - Labour force activity	1,049,640	5,811,880	15,065	603,135	1,235	34,845
In the labour force	699,015	3,721,255	10,380	391,105	805	26,320
Employed	623,105	3,465,265	9,450	365,005	775	25,065
Unemployed	75,910	255,990	935	26,095	40	1,255
Out of the labour force	350,625	2,090,630	4,690	212,035	415	8,525
Total - Labour force activity	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
In the labour force	66.6%	64.0%	68.9%	64.8%	65.2%	75.5%
Employed	89.1%	93.1%	91.0%	93.3%	96.3%	95.2%

(2020). *Social Determinants of Health: The Canadian Facts*. (2<sup>nd</sup> edition) / *Déterminants sociaux de la santé : les réalités canadiennes*, (2e édition). Oshawa: Ontario Tech University Faculty of Health Sciences and Toronto: York University School of Health Policy and Management.

<https://thecanadianfacts.org/>

**Unemployed**

- Across Québec in 2021, there were 75,910 English speakers who were unemployed resulting in an unemployment rate of 10.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2021, there were 935 unemployed English speakers in the Capitale-Nationale region where they experienced an unemployment rate of 9.0%. The unemployment rate of the regional English-speaking population was much higher than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was lower than that experienced by the provincial English-speaking population.
- In MRC La Jacques-Cartier, we find 40 unemployed English speakers resulting in an unemployment rate of 5.0%. This is similar to the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is much lower than the unemployment rate experienced by English speakers across the Capitale-Nationale region.

### Out of the labour force<sup>15</sup>

- Across Québec in 2021, there were 350,625 English speakers out of the labour force in 2016. This group represents 33.4% of the English-speaking population aged 15+. The proportion of English speakers out of the labour force is lower than that found in the French-speaking majority population in Quebec aged 15 and over.
- In 2021, there were 4,690 English speakers out of the labour force in the Capitale-Nationale region where they comprise 31.1% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is lower than that exhibited by the provincial English-speaking population.
- In MRC La Jacques-Cartier, we find 415 English speakers out of the labour force where they account for 33.6% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the Capitale-Nationale region.

<sup>15</sup>The Statistics Canada category “[out of the labour force](http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf)” refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an “off” season who were not looking for work because of a long-term illness or disability.  
<http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf>

**Appendix A – English speakers and French speakers by region and MRC or equivalent territories, 2021<sup>16</sup>**

<b>Number and Proportion of English and French Speakers in Capitale-Nationale by MRC Territory, 2021</b>
