#### Introduction

#### About the 2022-2023 Report Series

This volume of the Baseline Data Report (BDR) series presents demographic characteristics of the English-speaking population residing in the areas covered by the organizations participating in the *Networking and Partnership Initiative* (NPI)¹. The information presented is drawn from the 2021 Census of Canada and organized by province, region and MRC or their equivalent territories (see section below for regional definitions). The selection of characteristics is guided by their importance as determinants of the health status and vitality of Québec's official language minority community.

#### **Baseline Data Report Series**

The Baseline Data Report Series is intended to serve as a resource for NPI sponsor organizations and their health and social service partners (e.g. CISSS/CIUSSS) to better understand the demographic factors, health determinants and language barriers affecting the English-speaking population in their region.

A listing of the full series of BDRs from 2003 along with the data source for each volume is presented in Appendix "B".

#### **Determinants of Health**

National governments and health organizations around the world have identified a broad range of social, economic and environmental factors that have been demonstrated to have a strong influence on the health of populations and individuals. The Public Health Agency of Canada outlines various determinants of health – some of which are social determinants – such as income and social status, social support networks, education, employment and working conditions, health services, physical and social environments, biology and genetic endowment, personal health practices and coping skills, healthy child development, gender and culture.<sup>2</sup>

#### **Language Barriers**

Significant research has been conducted on the impact of language barriers on health, quality of healthcare and safety in recent years. In this approach, the study of linguistic differences between social actors in a health-related setting, such as language discordant encounters between patient and clinician who do not speak the same language, is prevalent. Studies include a focus upon the use of language production as a cue for social categorization and

#### **Methodological Notes**

#### **Data Source**

The information in this report is based on a series of tables developed by the Community Health and Social Services Network (CHSSN) based on data from the 2021 Census of Canada. The statistics are drawn from two different Statistics Canada data sources which vary according (1) to the definition of the population surveyed and (2) by the questionnaire that was administered.

The statistics for table 1 (Population Size) and table 2 (Age Structure) and the accompanying graphs are based on a 100% sample of Canadians including people in non-institutional collective dwellings. These individuals answered Statistics Canada's 2021 short form census questionnaire.

The statistics for all other tables and accompanying graphs are based on a 25% sample of Canadians living in private households. This sample excludes individuals in institutions and non-institutional collective dwellings. These individuals answered Statistics Canada's 2021 long form questionnaire.

The short form census questionnaire reaches a larger population, but the long form census is the primary source of exhaustive demographic data in Canada. Without the long form, the socio-demographic characteristics provided by tables 3 through 8 of this BDR report would not be attainable.

#### Linguistic definitions

There are numerous linguistic definitions that are used to identify the English-speaking population in Québec. The choice of linguistic indicator depends largely on the issue being examined. This report uses the <u>First Official Language Spoken</u> (FOLS) definition with multiple responses proportionally distributed among declared languages since it best reflects the total English-speaking health service users in the province. First Official Language Spoken is derived from three Census questions: knowledge of official languages, mother tongue and home language. Dual responses are divided equally among English-speaking and French-speaking groups.

Other definitions include <u>Mother tongue</u> which refers to the first language learned at home in childhood and still understood. The <u>language most often spoken at home</u> is used to designate the home language. <u>Knowledge of official languages</u> indicates the official language in which a person can carry on a conversation. The <u>language used most often at work</u> indicates the language spoken most frequently at work.

#### **Geographic Regions**

The 2022-2023 Baseline Data Report consists of a series of stand-alone documents which present key data for the MRC or equivalent territories in Québec in which there are at least 250 English-speaking residents.

#### **Demographic and Socio-economic Characteristics**

The demographic and socio-economic variables addressed in the 2022-2023 BDR are:

- Population size
- Age structure
- Household living arrangements
- Income
- Low-income cut-off (LICO)

- Educational attainment
- Labour force activity

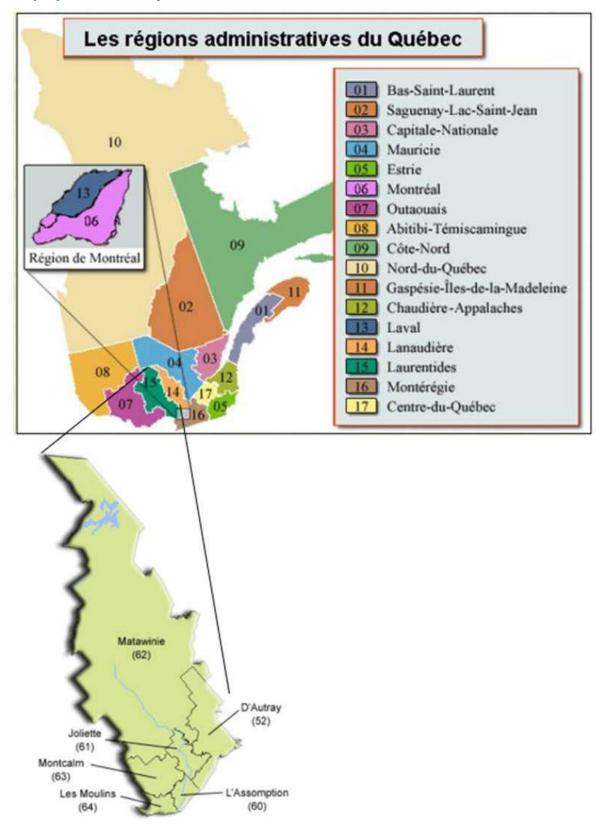

#### **Statistics Canada Definitions**

While for the most part the meaning of demographic and administrative terms are clarified as they arise in the report, the online Statistics Canada dictionary for the 2021 Census may also be consulted.<sup>3</sup>

Table 8 - Labour Force Activity	35

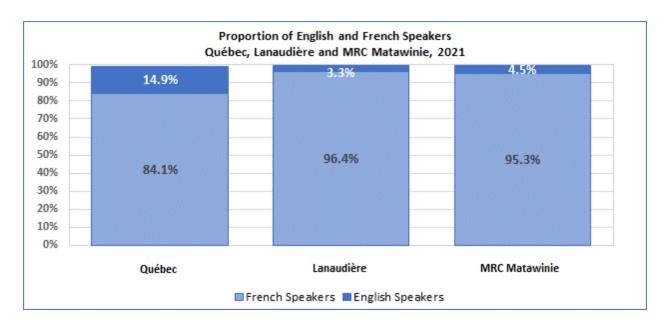

#### **Demographic Size**

Québec's English speakers form one of Canada's official language minority groups. Studies have confirmed that language barriers affect access and quality of care for linguistic minority communities. Obstacles to communication can reduce recourse to preventative services; increase consultation time including the number of tests and the possibility of diagnostic and treatment errors; affect the quality of services requiring effective communication such as social services; reduce the probability of treatment compliance and reduce users' satisfaction with the services received.<sup>4</sup> In the complex context of a medical situation, where the communication between care provider and patient is a key factor in the achievement of a positive health outcome, it is not surprising that the language spoken most often is considered the most effective. The treatment by health professionals of sensitive issues such as cancer, addiction, or depression, requires ease of communication as a feature of building trust and offering comfort to patients.

Table 1 - Population Size

Size of Population		Québec	Lanaudière	MRC Matawinie			
English speakers	number	1,253,580	17,485	2,490			
Liigiisii speakers	percentage	14.9%	3.3%	4.5%			
Franch speakers	number	7,074,330	505,255	52,450			
French speakers	percentage	84.1%	96.4%	95.3%			
Total population	number	8,406,905	523,985	55,060			
Total population	percentage	100.0%	100.0%	100.0%			
Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Total population excluding institutional residents - 100% sample.							

<sup>&</sup>lt;sup>4</sup> See Bowen, S. (2001). Language Barriers in Access to Health Care, Ottawa: Health Canada. Also, Bowen, S. et al. (2010)." From 'multicultural health' to 'knowledge translation' – rethinking strategies to promote language access within a risk management framework". The Journal of Specialized Translation (Jostrans), Issue 14, <a href="http://www.jostrans.org/issue14/art\_bowen.php">http://www.jostrans.org/issue14/art\_bowen.php</a>.

- Across Québec, there were 1,253,580 English speakers, representing 14.9% of the provincial population.
- In 2021, there were 17,485 English speakers living in the Lanaudière region where they represented 3.3% of the population. This share is much lower than the overall provincial share for English speakers.
- In MRC Matawinie, we find 2,490 English speakers where they represented 4.5% of the population. This proportion is much higher than that represented by English speakers across the Lanaudière territory.

#### Age Structure

The distribution of the English-speaking population across age categories, and the extent to which language majority and minority communities differ in accordance to age, is important in understanding their distinct health needs and resources. Each stage of life tends to be associated with specific health and social service needs. The strategy for meeting these needs by public agencies must also take the age and age-related competencies of the client group into consideration. From Sanderson's study we learn that the types of issues experienced by Quebec's English-speaking seniors and their caregivers in accessing services differ from those of English speakers younger in age.<sup>5</sup>

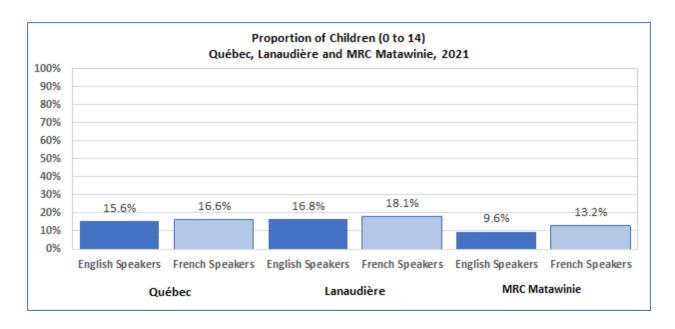

Typically, the age structure of the majority is important in shaping the scope and design of available health services and programs. Improving the health and the vitality of all citizens residing in a given territory requires attention to the problems that are pressing for the minority and may be overlooked by focusing on the majority, and awareness of problems that are shared by both language groups but are being met with system solutions that are not equally accessible for both.

**Table 2** - Age Structure of the Population

Age Structure of the Population	Québec		Lanaudière		MRC Ma	atawinie
	English	French	English	French	English	French
Total - Age groups	1,253,580	7,074,330	17,485	505,255	2,490	52,450
0-14 years	195,065	1,174,295	2,930	91,645	240	6,930
15-24 years	160,090	726,400	1,815	49,845	170	3,790
25-44 years	376,685	1,792,825	4,960	122,455	460	10,020
45-64 years	328,055	1,924,990	5,230	142,865	815	17,720
65+ years	193,685	1,455,820	2,545	98,445	800	13,990
Total - Age groups	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%
0-14 years	15.6%	16.6%	16.8%	18.1%	9.6%	13.2%
15-24 years	12.8%	10.3%	10.4%	9.9%	6.8%	7.2%
25-44 years	30.0%	25.3%	28.4%	24.2%	18.5%	19.1%
45-64 years	26.2%	27.2%	29.9%	28.3%	32.7%	33.8%
65+ years	15.5%	20.6%	14.6%	19.5%	32.1%	26.7%

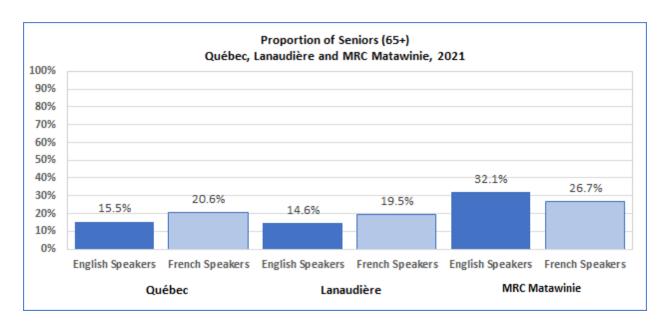

-

<sup>&</sup>lt;sup>5</sup> Sanderson, D. (2020). Language Related Difficulties Experienced by Caregivers of English-Speaking Seniors in Quebec. *SAGE Open*, *10*(3). <a href="https://doi.org/10.1177/2158244020951261">https://doi.org/10.1177/2158244020951261</a>

#### Children (aged 0-14)

- Across Québec, there were 195,065 English-speaking children aged 0-14, representing 15.6% of the English-speaking population. The proportion of children in the English-speaking population is lower than the level in the French-speaking majority population in Quebec.
- In 2021, there were 2,930 English-speaking children aged 0-14 living in Lanaudière where they account for 16.8% of the population. The proportion of children in the regional English-speaking population is lower than their proportion in the regional French-speaking majority population. This proportion is higher than the level for English-speaking children across the province.
- In MRC Matawinie, we find 240 English-speaking children aged 0-14 where they represent 9.6% of the population. This share is much lower than that exhibited by English-speaking children across the Lanaudière region. The proportion of children in the territory's English-speaking population is much lower than the share in the rest of Québec's French-speaking majority population.

#### Seniors (aged 65 and over)

- Across Québec, there were 193,685 English-speaking seniors aged 65+ representing 15.5% of the English-speaking population. The proportion of seniors in the English-speaking population is much lower than that found in the French-speaking majority population in Quebec.
- In 2021, there were 2,545 English-speaking seniors aged 65+ living in the Lanaudière region where they accounted for 14.6% of the population. This share is lower than that of English-speaking seniors across the province. The proportion of seniors in the regional English-speaking population is much lower than the proportion in the French-speaking majority population.
- In MRC Matawinie, we find 800 English-speaking seniors aged 65+ where they account for 32.1% of the population. This share is much higher than that of English-speaking seniors across the Lanaudière region. The proportion of seniors in the English-speaking population is much higher than the proportion in the French-speaking majority population in MRC Matawinie.

#### Income

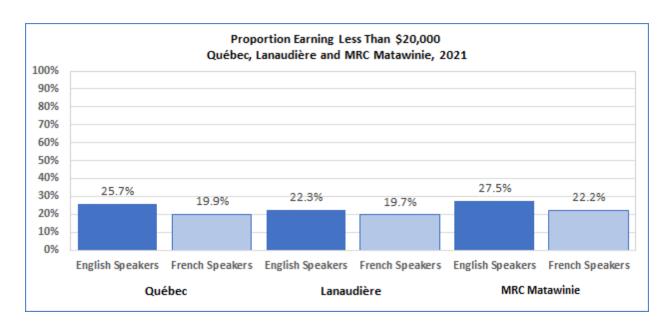

Long-standing and substantial research provides evidence that income and social status are key determinants of the level of health and well-being experienced by communities and their members. Low-income Canadians are more likely to die earlier and to suffer more illnesses than Canadians with higher incomes, regardless of age, sex, race and place of residence.<sup>6</sup> For vulnerable low-income households, language barriers in access to public health services loom large as they cannot afford private care services nor are they likely to have access to work-related benefits or private insurance coverage. Studies also suggest that the distribution of income in a given society may be a more important determinant of health than the total amount of income earned by society members. Large gaps in income distribution are linked to increases in social problems and poorer health status among the population as a whole.<sup>7</sup>

Table 3 - Income

Population by Income Group	Québec		Québec Lanaudiè		MRC Ma	atawinie	
	English	French	English	French	English	French	
Total Population 15+	1,049,640	5,811,880	14,700	408,560	2,270	45,080	
Less than \$20,000	269,805	1,154,945	3,285	80,295	625	9,990	
\$20,000 - \$49,999	422,205	2,420,025	6,070	170,450	1,085	21,465	
\$50,000 +	357,635	2,236,925	5,345	157,820	555	13,620	
Total Population 15+	100.0%	100.0%	100.0%	100.0%	100.0%	100.0%	
Less than \$20,000	25.7%	19.9%	22.3%	19.7%	27.5%	22.2%	
\$20,000 - \$49,999	40.2%	41.6%	41.3%	41.7%	47.8%	47.6%	
\$50,000 +	34.1%	38.5%	36.4%	38.6%	24.4%	30.2%	
Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample.							

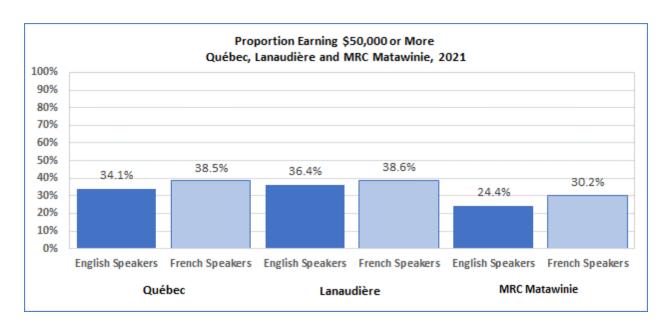

<sup>&</sup>lt;sup>6</sup> Public Health Agency of Canada, <a href="http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence">http://www.phac-aspc.gc.ca/ph-sp/determinants/determinants-eng.php#evidence</a> accessed February 2023.

<sup>&</sup>lt;sup>7</sup> Ibid.

#### Income under \$20k

- Across Québec in 2021, there were 269,805 English speakers aged 15+ with income under \$20k. This group represents 25.7% of the English-speaking population aged 15+. The proportion of English speakers with income under \$20k is much higher than that found in the French-speaking majority population in Quebec.
- In 2021, there were 3,285 English speakers aged 15+ with income under \$20k in the Lanaudière region where they represent 22.3% of the English-speaking population aged 15 and over. This share is lower than that displayed by the provincial English-speaking population. The proportion of those with income under \$20k in the region's English-speaking population is higher than the proportion in the French-speaking majority population.
- In MRC Matawinie, we find 625 English speakers aged 15+ with income under \$20k where they account for 27.5% of the population. This share is much higher than that experienced by English speakers across Lanaudière. The proportion of those with income under \$20k in the territory's English-speaking population is much higher than the proportion for the French-speaking majority population in MRC Matawinie.

#### Earning \$50k and over

- Across Québec, there were 357,635 English speakers aged 15+ with a total income of \$50k or more, who represented 34.1% of the English-speaking population in that age group. The proportion of high earners in the English-speaking population is lower than that found in the French-speaking majority population in Quebec.
- In 2021, there were 5,345 English speakers aged 15+ with a total income of \$50k or more living in the Lanaudière region, where they represented 36.4% of the population. This proportion was higher than the proportion of English-speaking high earners across the province. The proportion of high earners in the regional English-speaking population is lower than the share of high earners in the French-speaking majority population in the region.
- In MRC Matawinie, we find 555 English-speaking high earners aged 15+, where they represent 24.4% of the population. This share is much lower than that experienced by English-speaking high earners across the Lanaudière region. The proportion of high earners in the territory's English-speaking population is lower than the proportion of high earners in the territory's French-speaking majority population.

#### **Household Living Arrangements**

Household living arrangements may be used as an indicator of groups within a population who are vulnerable to a poor health status. Parents of minors living in lone-parent households were more likely to report food insecurity, high levels of psychological distress and having more than one health problem compared to parents with other household arrangements. Individuals living alone may lack the important health benefits of a strong support network in the event of activity limitations due to disability, illness or aging. COVID-19 pandemic uncovered the vulnerability of individuals living in low-income multi-generational households. The recent health crisis turned single households consisting of three or more generations into a high-risk factor for contagious infection.

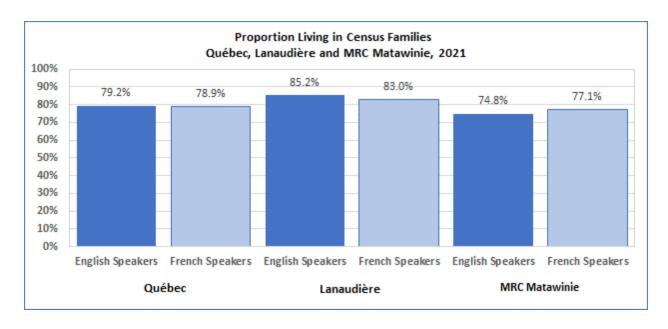

**Table 4 - Population by Household Living Arrangements** 

Population by Household Living Arrangements	Québec		Lanaudière		MRC Matawinie		
	English	French	English	French	English	French	
Total - Household living arrangements	1,244,440	6,985,640	17,675	500,085	2,555	51,960	
Total persons in census family households	985,995	5,512,205	15,060	414,985	1,910	40,055	
Persons in two-parent households	835,415	4,706,995	13,065	353,310	1,575	34,470	
Persons in single-parent households	150,580	805,215	1,990	61,670	335	5,590	
Total persons in non-census family households	258,445	1,473,435	2,615	85,105	640	11,905

<sup>&</sup>lt;sup>8</sup> For discussion of the survey, see Pocock, J. (2008) "Baseline Data Report 2007-2008. Quebec's Social and Health Survey Information." Community Health and Social Services Network (CHSSN). <a href="https://www.chssn.org">www.chssn.org</a>

<sup>&</sup>lt;sup>9</sup> Yang, F. and Aitken, N. (2021). People living in apartments and larger households were at higher risk of dying from COVID-19 during the first wave of the pandemic. Statistics Canada. https://www150.statcan.gc.ca/n1/pub/45-28-0001/2021001/article/00004-eng.htm accessed February 2023.

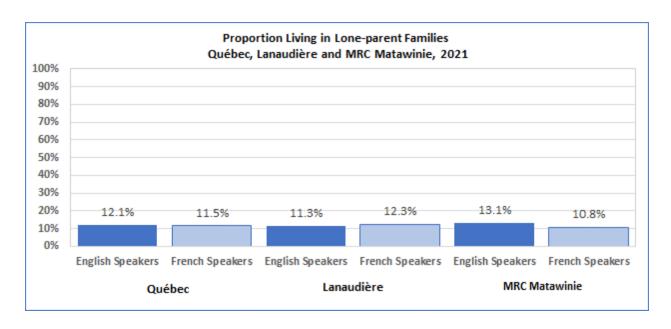

#### Living in census families 10

- Across Québec, there were 985,995 English speakers living in census family households. This group represents 79.2% of the 15+ English-speaking population. The proportion of English speakers living in census family households is similar to that found in the French-speaking majority population in Quebec.
- In 2021, there were 15,060 English speakers living in census family households in the Lanaudière region where they comprise 85.2% of the population. This share is higher than that displayed by the provincial English-speaking population. The proportion of those living in census family households in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population.
- In MRC Matawinie, we find 1,910 English speakers living in census family households where they account for 74.8% of the population. This share is lower than that accounted for by English speakers across the Lanaudière region. The proportion of persons living in census family households in the English-speaking population is similar to the proportion represented by the French-speaking majority population in MRC Matawinie.

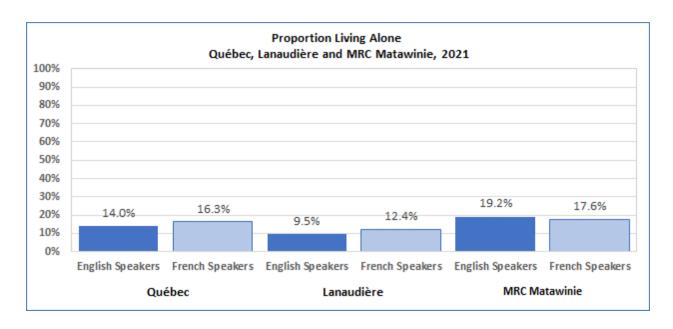

CHSSN Baseline Data Report 2022-2023

<sup>&</sup>lt;sup>10</sup>According to Statistics Canada, a "Census family is defined as a married couple and the children, if any, of either and/or both spouses; a couple living common law and the children, if any, of either and/or both partners; or a parent of any marital status in a one-parent family with at least one child living in the same dwelling and that child or those children. All members of a particular census family live in the same dwelling. Children may be biological or adopted children regardless of their age or marital status as long as they live in the dwelling and do not have their own married spouse, common-law partner or child living in the dwelling. Grandchildren living with their grandparent(s) but with no parents present also constitute a census family." https://www23.statcan.gc.ca/imdb/p3Var.pl?Function=Unit&Id=32746 accessed February 2023.

#### Living in lone-parent families

- Across Québec, there were 150,580 English speakers living in lone-parent families. This
  group represents 12.1% of the English-speaking population. The proportion of English
  speakers living in lone-parent families is similar to the proportion found in the Frenchspeaking majority population in Quebec.
- In 2021, there were 1,990 English speakers living in lone-parent families in the Lanaudière region where they account for 11.3% of the population. The proportion of those living in lone-parent families in the regional English-speaking population is lower than the proportion found in the regional French-speaking majority population. The proportion is lower than that found in the provincial English-speaking population.
- In MRC Matawinie, we find 335 English speakers living in lone-parent families where they represent 13.1% of the population. This is much higher than the proportion represented by the French-speaking majority population in MRC Matawinie. The proportion of English speakers living in lone-parent families in MRC Matawinie is higher than the proportion we find for English speakers across the Lanaudière region.

#### Living alone

- Across Québec, there were 173,695 English speakers living alone. This group represents 14.0% of the English-speaking population. The proportion of English speakers living alone is lower than the level in the French-speaking majority population in Quebec.
- In 2021, there were 1,685 English speakers living alone in the Lanaudière region, where they account for 9.5% of the population. This level is much lower than that displayed by the provincial English-speaking population. The proportion of those living alone in the regional English-speaking population is much lower than the proportion found in the regional French-speaking majority population.
- In MRC Matawinie we find 490 English speakers living alone, where they represent 19.2% of the population. This share is much higher than that exhibited by English speakers across the Lanaudière region. The proportion of those living alone in the territory's English-speaking population is higher than the proportion exhibited by the French-speaking majority population in MRC Matawinie.

#### Low-Income Cut-off

Although there is no official measure of poverty in Canada, the Statistics Canada measure of Low-income cut-offs (LICO) is probably the best known. Commonly known as the "poverty line", LICO uses the income levels of a given family and considers how large a share of its income is spent on necessities such as food, shelter and clothing. If the amount a family spends is 20% higher than an average family in a year, it falls into the low-income cut-off category. People who live below-income cut-offs may be said to live in "straitened circumstances." The following tables consider the population living below LICO by language, administrative territory and age group.

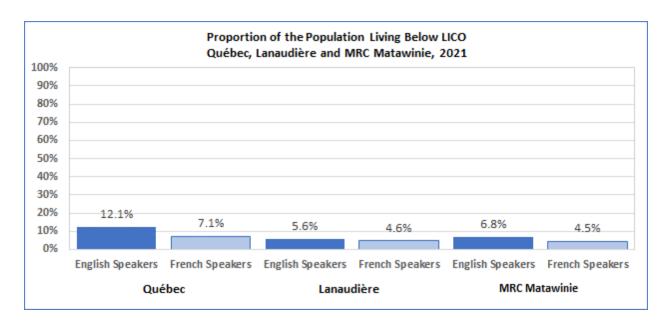

Table 5 - Population Living Below LICO, Within Age Groups

Population Living Below the Low-Income Cut-off (LICO), Across Age Groups	Québec		Québec Lanaudière		MRC Ma	atawinie
	English	French	English	French	English	French
Total - Age groups	148,545	491,540	980	23,090	165	2,240

The percentages given here compare the number below LICO in a given age group with the total number in that age group as presented in 'Table 2 - Age Structure of the Population' of this document.

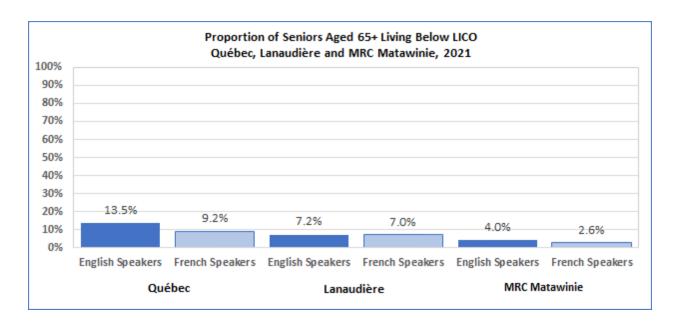

CHSSN Baseline Data Report 2022-2023

<sup>&</sup>lt;sup>11</sup> For an explanation of how Statistics Canada calculates low income cut-off (LICO) https://www150.statcan.gc.ca/n1/pub/75f0002m/2012002/lico-sfr-eng.htm accessed February 2023.

#### Population living below the low-income cut-off (LICO)

- Across Québec, there were 148,545 English speakers living below LICO. This group
  accounts for 12.1% of the English-speaking population. The proportion of English speakers
  living below LICO is much higher than the proportion in the French-speaking majority
  population in Quebec.
- In 2021, there were 980 English speakers living below LICO in the Lanaudière region, where they represent 5.6% of the regional English-speaking population. The proportion of those living below LICO in the regional English-speaking population is much higher than the proportion found in the regional French-speaking majority population. This English-speaking regional proportion in Lanaudière is much lower than the proportion for Quebec's English speakers in general.
- In MRC Matawinie, we find 165 English speakers living below LICO, where they represent 6.8% of the English-speaking population. This level is much higher than the proportion for the French-speaking majority population in the same territory. The proportion of those living below LICO in the territory's English-speaking population is much higher than the proportion for English speakers across Lanaudière.

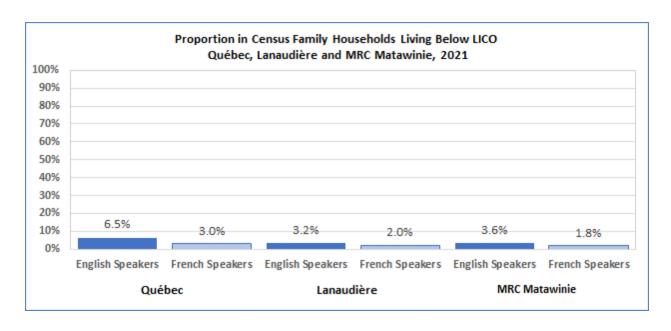

#### Seniors (65+) living below the low-income cut-off (LICO)

- Across Québec, there were 24,845 English-speaking seniors living below LICO. This group represents 13.5% of the English-speaking senior population. The proportion of Englishspeaking seniors living below LICO is much higher than the proportion of seniors living below LICO in the French-speaking majority population in Quebec.
- In 2021, there were 170 English-speaking seniors living below LICO in the Lanaudière region where they account for 7.2% of the regional English-speaking senior population. The proportion of those seniors living below LICO in the regional English-speaking senior population is similar to the proportion in the regional French-speaking majority senior population. This proportion is much lower than that experienced by English-speaking seniors across the province.
- In MRC Matawinie, we find 30 English-speaking seniors living below LICO where they represent 4.0% of the English-speaking senior population. This is much higher than the proportion experienced by the French-speaking majority senior population living below LICO in the same territory. The proportion of seniors living below LICO in the territory's English-speaking population is much lower than the level displayed by English-speaking seniors across the Lanaudière region.

Table 6 - Population Living Below LICO, by Household Living Arrangements

	<u> </u>

Source: JPocock Research Consulting, 2021 Census, Statistics Canada. Population in private households - 25% sample. The percentages given here compare the number below LICO in a given household living arrangement with the total number in that arrangement as presented in "Table 4 - Household Living Arrangements" in this document.

#### Persons in census family households living below the low-income cut-off (LICO)

- Across Québec, there were 63,075 English-speaking persons in census family households living below LICO. This group represents 6.5% of the English-speaking population in census family households. The proportion of English-speaking persons in census family households living below LICO is much higher than the proportion found in the French-speaking majority population in Quebec living below LICO in census family households.
- In 2021, there were 485 English-speaking persons in census family households living below LICO in the Lanaudière region, where they represent 3.2% of the regional English-speaking population. The proportion of persons in census family households living below LICO in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. The proportion in the regional English-speaking population is much lower than that found in the provincial English-speaking population.
- In MRC Matawinie, we find 65 English-speaking persons in census family households living below LICO, where they account for 3.6% of the English-speaking population. This level is much higher than the proportion experienced by the French-speaking majority population in the same territory. The proportion of those persons in census family households living below LICO in the territory's English-speaking population is higher than the proportion found in the English-speaking population of the Lanaudière region.

#### Persons living alone and below the low-income cut-off (LICO)

- Across Québec, there were 52,090 English-speaking persons living alone and below LICO. This group represents 30.1% of the English-speaking population living alone. The proportion of English-speaking persons living alone and below LICO is much higher than that found in the French-speaking majority population in Quebec living alone.
- In 2021, there were 350 English-speaking persons living alone and below LICO in the Lanaudière region where they account for 20.6% of the regional English-speaking population living alone. The proportion of those persons living alone and below LICO in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that experienced by the provincial English-speaking population.
- In MRC Matawinie, we find 75 English-speaking persons living alone and below LICO where they represent 15.5% of the English-speaking population living alone. This is much higher than the proportion experienced by the French-speaking majority population living alone in the same territory. The proportion of those persons living alone and below LICO in the territory's English-speaking population is much lower than the proportion experienced by English speakers across the Lanaudière region.

#### **Highest Educational Attainment**

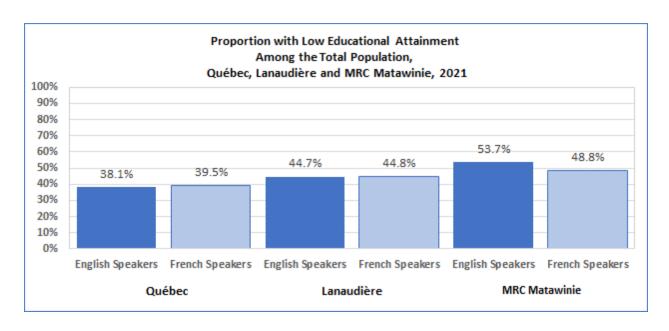

In many ways, education is an important determinant of the health status of a community. In Canada, the level of education achieved by an individual tends to be an indicator of social status, and ideally, a predictor of economic opportunity. The overall level of health literacy and preventative health practice enjoyed by a community also tends to be associated with the years of schooling by those included among its members<sup>12</sup>. A case in point, Genereux's study of the psychosocial impact of the COVID-19 pandemic upon Québec communities demonstrates that key protective factors such as a sense of coherence are linked to levels of education.<sup>13</sup>

<sup>&</sup>lt;sup>12</sup>For further discussion of education as a health determinant see Raphael, D., Bryant, T., Mikkonen, J. and Raphael, A. (2020). *Social Determinants of Health: The Canadian Facts.* (2<sup>nd</sup> edition) / *Déterminants sociaux de la santé : les réalités canadiennes*, (2e edition). #### Population aged 15+, high school diploma or less

- Across Québec, there were 399,730 English speakers aged 15 and over with a high school diploma or less. This group accounts for 38.1% of the English-speaking population aged 15 and over. The proportion of English speakers aged 15 and over with a high school diploma or less is similar to the level found in the French-speaking majority population aged 15 and over in Quebec.
- In 2021, there were 6,565 English speakers aged 15 and over with a high school diploma or less in the Lanaudière region where they account for 44.7% of the regional English-speaking population aged 15 and over. The proportion of those aged 15 and over with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. The level for the English-speaking regional proportion is higher than that exhibited by English speakers across the province.
- In MRC Matawinie, we find 1,220 English speakers aged 15 and over with a high school diploma or less where they represent 53.7% of the English-speaking population aged 15 and over. This level is higher than the proportion exhibited by the French-speaking majority population aged 15 and over in the same territory. The proportion of those aged 15 and over with a high school diploma or less in the English-speaking population is much higher than the proportion exhibited by the English speakers across the Lanaudière region.

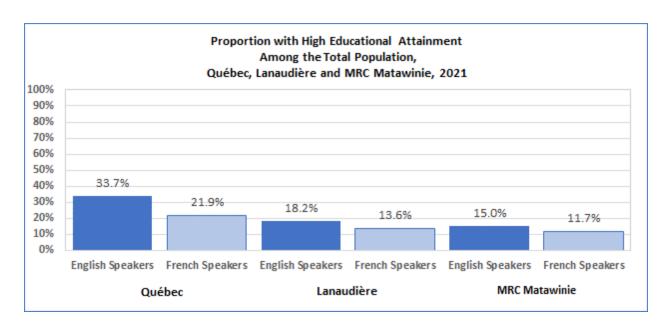

#### Population 25-44, high school diploma or less

- Across Québec, there were 90,820 English speakers aged 25-44 with a high school diploma or less. This group represents 24.1% of the English-speaking population aged 25 to 44. The proportion of English speakers aged 25-44 with a high school diploma or less is higher than that found in the French-speaking majority population in Quebec in the same age cohort.
- In 2021, there were 1,540 English speakers aged 25-44 with a high school diploma or less in the Lanaudière region where they account for 30.5% of the regional English-speaking population. The proportion of those aged 25-44 with a high school diploma or less in the regional English-speaking population is higher than the proportion in the regional French-speaking majority population in that age group. This proportion is much higher than that exhibited by English speakers across the province in the same age cohort.
- In MRC Matawinie, we find 215 English speakers aged 25-44 with a high school diploma or less where they comprise 42.6% of the English-speaking 25-44 cohort. This is much higher than the proportion in the French-speaking majority 25-44 cohort in the same territory. The proportion of those aged 25-44 with a high school diploma or less in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the Lanaudière region.

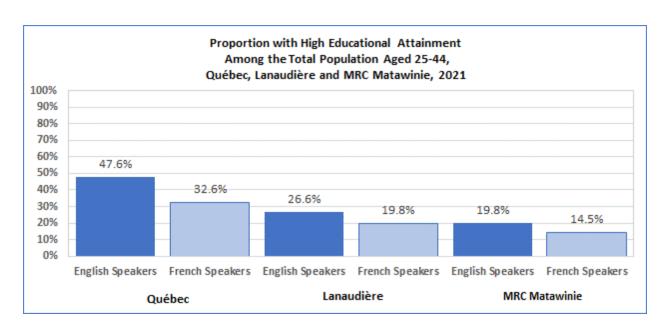

#### Population 45-64, high school diploma or less

- In Québec in 2021, there were 112,980 English-speaking aged 45-64 with a high school diploma or less. This group represents 34.4% of the English-speaking population. The proportion of English speakers aged 45-64 with a high school diploma or less is similar to that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 2,210 English speakers aged 45-64 with a high school diploma or less in the Lanaudière region where they account for 41.2% of the regional English-speaking population. The proportion of those aged 45-64 with a high school diploma or less in the regional English-speaking population is similar to the proportion in the regional French-speaking majority population. This English-speaking regional proportion is higher than that exhibited by the province's English speakers.
- In MRC Matawinie, we find 405 English speakers aged 45-64 with a high school diploma or less where they comprise 49.1% of the English-speaking population. This is higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a high school diploma or less in the territory's English-speaking population is higher than the proportion exhibited by English speakers across the region.

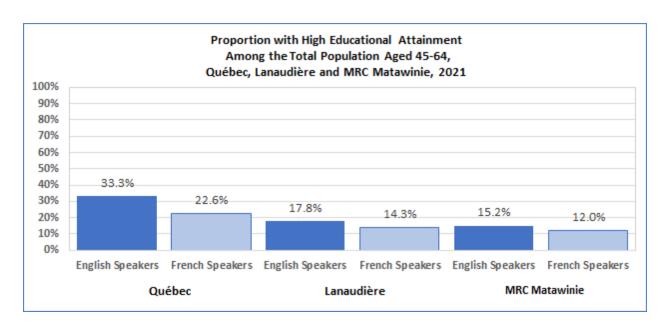

#### Population aged 15+, university degree or higher

- In Québec in 2021, there were 353,815 English-speaking aged 15 and over with a university degree or higher. This group represents 33.7% of the English-speaking population. The proportion of English speakers aged 15 and over with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 2,680 English speakers aged 15 and over with a university degree or higher in the Lanaudière region where they account for 18.2% of the regional English-speaking population. The proportion of those aged 15 and over with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is much lower than that exhibited by the province's English speakers.
- In MRC Matawinie, we find 340 English speakers aged 15 and over with a university degree or higher where they represent 15.0% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 15 and over with a university degree or higher in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the region.

#### Population 25-44, university degree or higher

- In Québec in 2021, there were 179,675 English speakers aged 25-44 with a university degree or higher. This group accounts for 47.6% of the English-speaking population. The proportion of English speakers aged 25-44 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 1,345 English speakers aged 25-44 with a university degree or higher in the Lanaudière where they represent 26.6% of the regional English-speaking population. The proportion of those aged 25-44 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much lower than that exhibited by the province's English speakers.
- In MRC Matawinie, we find 100 English speakers aged 25-44 with a university degree or higher where they comprise 19.8% of the English-speaking population. This is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 25-44 with a university degree or higher in the territory's English-speaking population is much lower than the proportion exhibited by English speakers across the region.

#### Population 45-64, university degree or higher

- In Québec in 2021, there were 109,275 English speakers aged 45-64 with a university degree or higher. This group represents 33.3% of the English-speaking population. The proportion of English speakers aged 45-64 with a university degree or higher is much higher than that found in the same age cohort in the French-speaking majority population in Quebec.
- In 2021, there were 955 English speakers aged 45-64 with a university degree or higher in the Lanaudière region where they represent 17.8% of the regional English-speaking population. The proportion of those aged 45-64 with a university degree or higher in the regional English-speaking population is much higher than the proportion in the regional French-speaking majority population. This regional English-speaking proportion is much lower than that exhibited by the province's English speakers.
- In MRC Matawinie, we find 125 English speakers aged 45-64 with a university degree or higher where they comprise 15.2% of the English-speaking population. This level is much higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those aged 45-64 with a university degree or higher in the territory's English-speaking population is lower than the proportion exhibited by English speakers across the region.

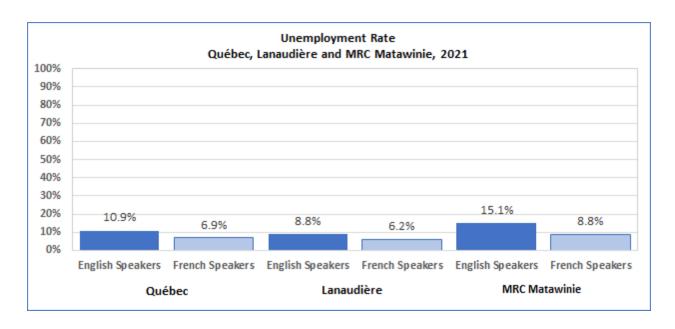

#### **Labour Force Activity**

The rate and type of labour force participation experienced by a community and its members is strongly associated with health status. In industrial nations like Canada, labour force activity is linked with level of income as well as the level of social integration enjoyed by a group. Employment is an important source of social identity and a key context for the establishment of a social support network that extends beyond the workplace. For an individual, work is an important source of the self-esteem and sense of control typically associated with good mental health.<sup>14</sup>

Table 8 - Labour Force Activity

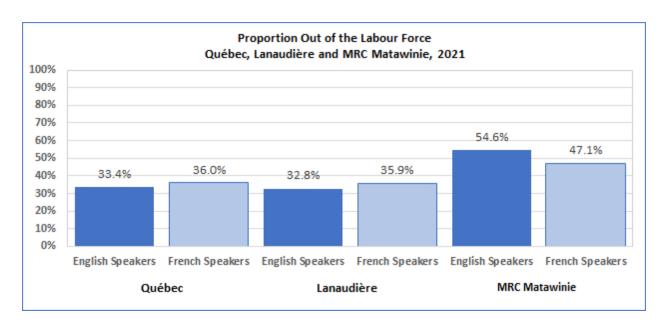

Total Population by Labour Force Activity	Québec		Lanaudière		MRC Matawinie	
	English	French	English	French	English	French
Total - Labour force activity	1,049,640	5,811,880	14,700	408,560	2,270	45,080

#### Unemployed

- Across Québec in 2021, there were 75,910 English speakers who were unemployed resulting in an unemployment rate of 10.9%. The unemployment rate of Quebec's English speakers was much higher than the unemployment rate of the French-speaking majority.
- In 2021, there were 870 unemployed English speakers in the Lanaudière region where they experienced an unemployment rate of 8.8%. The unemployment rate of the regional English-speaking population was much higher than the unemployment rate in the regional French-speaking majority population. Their unemployment rate was lower than that experienced by the provincial English-speaking population.
- In MRC Matawinie, we find 155 unemployed English speakers resulting in an unemployment rate of 15.1%. This is much higher than the unemployment rate experienced by the French-speaking majority population in the same territory. The unemployment rate of the English-speaking population is much higher than the unemployment rate experienced by English speakers across the Lanaudière region.

#### Out of the labour force<sup>15</sup>

- Across Québec in 2021, there were 350,625 English speakers out of the labour force in 2016.
  This group represents 33.4% of the English-speaking population aged 15+. The proportion of
  English speakers out of the labour force is lower than that found in the French-speaking
  majority population in Quebec aged 15 and over.
- In 2021, there were 4,815 English speakers out of the labour force in the Lanaudière region where they comprise 32.8% of the regional English-speaking population aged 15+. The proportion of those out of the labour force in the regional English-speaking population is lower than the proportion in the regional French-speaking majority population. This English-speaking regional proportion is similar to that exhibited by the provincial English-speaking population.
- In MRC Matawinie, we find 1,240 English speakers out of the labour force where they account for 54.6% of the English-speaking population. This is higher than the proportion exhibited by the French-speaking majority population in the same territory. The proportion of those out of the labour force in the territory's English-speaking population is much higher than the proportion exhibited by English speakers across the Lanaudière region.

<sup>&</sup>lt;sup>15</sup>The Statistics Canada category "out of the labour force" refers to persons 15 years and over, excluding institutional residents, who were neither employed nor unemployed during the week of Sunday May 1 to Saturday May 7, 2011. It includes students, homemakers, retired workers, and seasonal workers in an "off" season who were not looking for work because of a long-term illness or disability. http://www12.statcan.gc.ca/nhs-enm/2011/ref/dict/99-000-x2011001-eng.pdf

# Appendix A – English speakers and French speakers by region and MRC or equivalent territories, $2021^{16}$

Number and Proportion of English and French Speakers in Lanaudière by MRC Territory, 2021								
Geography	Total Population	French Speakers	English Speakers	Proportion of English Speakers				
Québec	8,406,905	7,074,330	1,253,580	14.9%
